

KODAK

## **The Digitized Kodak Catalog Project (1886 - 1941): A Very Brief History**

Most camera collectors at some point in their collecting careers pass through a Kodak phase - some never come out of it. And if there ever was one name that came to be associated with both cameras and collecting, it was Kodak.

George Eastman received his first patent (for coating dry plates) and bought his first manufacturing facility in 1880, and in 1881 he started the Eastman Dry Plate Company. In 1886 he received a patent for the near-mythical Eastman Detective Camera, but it wasn't until 1888 that the first camera bearing the name "Kodak" was introduced.

One of the nice things about collecting Kodak is that the product line is pretty well known, and because the company produced annual catalogs for many years, collectors can be reasonably sure of what they're looking at, when it was made, the variations and so on - presuming that they have access to either the appropriate catalog, or a number of the many books which document Kodak, each to some greater or lesser extent.

But what would be really nice would be to have a complete set of Kodak catalogs in an easily accessible form and readily available. And since the advent of portable computing devices (PC, Macintosh, etc.) that's been possible - except for the difficulty of assembling a complete set of Kodak catalogs in one spot and then scanning them and making the results available.

The idea of digitizing a complete set of Kodak catalogs has kicked around the collecting community for many years. It's been proposed on a number of online forums, during meetings of various photohistory groups, and for years there have been many incomplete "Kodak CDs" on eBay but at best, they only contained a few catalogs - whatever the owner had available. But assembling a complete set of catalogs, then scanning and processing perhaps 3,000 to 4,000 pages, was a daunting task - if not completely overwhelming - and nothing ever came of it.

Until now.

In early 2010, the idea came up again, but this time we - "we" as in "the collecting community" - were lucky. A number of collectors were willing to loan their catalogs to this project and a couple of insane - wait, let's call them "dedicated" - dedicated enthusiasts - neither of whom collected Kodak, but both of whom enjoyed the challenge of such a project - were willing to put in the time and effort to scan and pull together the entire set of catalogs into a full-blown Kodak Catalog Digital Library.

Our initial objective was to include just the annual amateur catalogs, but it turns out that many cameras only appear in certain professional and specialty catalogs. We included as many of those as we could obtain so that almost every Kodak camera made in the US, Canada and Europe, would be documented - at least up to about 1941. After that, it becomes much more difficult as Kodak stopped producing annual catalogs as their product line became increasingly more diversified.

However, even with the additional "non-amateur" catalogs, we weren't completely successful in illustrating "every" camera Kodak ever made. There are an elusive few that might appear in specialty catalogs that we simply couldn't track down. If you can't find one of those odd cameras, that's no doubt why. We may do a revision at some point in the future if someone is willing to loan us a catalog that includes a camera that isn't already recorded.

In this project, a total of 67 catalogs were used from 1886 through 1941 including a number of professional and dealer catalogs, and in some years, two or even three different catalogs to cover all the bases. With the cooperation of a number of dedicated collectors, we were able to pull together all those catalogs and in June 2010, the project started in earnest.

By November 2010, we had scanned everything we needed and eventually all 67 catalogs were then reassembled as image folders and converted to the universally accepted PDF format and finally, converted into individually searchable PDFs which could then be searched globally as a collection.

For those of you interested in the statistics: about 200 hours of scanning time (we never want to hear that sound again), 67 catalogs and 3,908 page scans - which generated 7,917 original and processed images - and 11.4 GB of disk space. Additionally, another 100+ hours of technical development time was needed to convert the digital catalogues into a fully searchable "knowledgebase" that could be launched from most any standard web browser.

The overwhelming number of catalogs was loaned to us by that most remarkable of Kodak collectors, Charlie Kamerman of Eagle Creek, Oregon. Without Charlie, it's very doubtful that this project could even have been attempted.

But as it turned out, even Charlie didn't have all the publications that were needed, but he was able to track down the five that he lacked and was able to secure either a copy or high resolution images that we could work with. And so, our thanks to the contributors of the catalogs and scans that we used:

Charlie Kamerman for the vast majority of catalogs used and all his help,  
Steve Shohet for loaning a variety of test catalogs,  
Ryerson University (Toronto) for the 1886 Eastman Catalog  
George Layne for the 1890 New Kodaks Catalog,  
Mike Kessler for the 1891 Dealer Display Catalog,  
Ralph London for the 1893 UK Catalog,  
Michael Pritchard for the 1897 UK Catalog.

The digital side of the project - also known as "all of the work" - was done by Rob Niederman of Medina, Minnesota, and Milan Zahorcak of Tualatin, Oregon. Remarkably we're still friends and in a few years, we'll probably be able to talk about this project rationally.

And there you have it, a more-or-less done deal. We're fairly sure that it isn't quite perfect, and expect there will be some carping about something or other; but all-in-all, we believe this to be a pretty good product and can now move on to something else.

Our thanks to all of those involved.

Rob Niederman  
Milan Zahorcak

Fall, 2011

# KODAKS

AND

## KODAK SUPPLIES

EASTMAN KODAK COMPANY

ROCHESTER, NEW YORK

"THE KODAK CITY"

# “KODAK”

Is our registered and common-law trade mark and cannot be rightfully applied except to goods of our manufacture. When a dealer tries to sell you a camera or films or other goods not of our manufacture under the Kodak name, you can be sure that he has an inferior article that he is trying to market on the Kodak reputation, and he also makes himself liable to suit by us for damages and injunction.

*If it isn't an Eastman,  
it isn't a Kodak*

## The Whole World Kodaks

IN the whole world there is probably no trade mark name so well known; there is probably no specific manufactured article of any kind so widely distributed as the Kodak.

Surely an enviable distinction, but of more importance, both from your standpoint and our own, are the reasons why this is so.

The whole world makes pictures because the appeal of photography is universal — the desire for pictures of the things that interest the individual is innate in mankind.

And the whole world Kodaks because the peoples of Europe and Australia, of the Orient and of the Occident, as well as of this hemisphere, have come to know that in the photographic field, the Kodak is preeminent in quality and dependability as no other one article in any other field is; and they have come to the further realization of the fact, even though they never may have heard the phrase—Kodak means photography with the bother left out.

“The whole world Kodaks” then, because of the convenience —the simplicity of the Kodak. Thirty-two years ago, we started to manufacture photographic goods. In the production of these goods, we conceived the idea of a camera which would make picture taking easier than any of the then existing cameras, and in 1888, or twenty-four years ago, we offered such a camera, built

upon the idea of simplicity. This camera was considered a remarkably compact and ingenious instrument. Its simplicity made it very popular. It was the first Kodak.

To-day the idea upon which this Kodak was built still obtains. It has been the underlying idea in the construction of every Kodak, year after year, from that time up to the present.

Twenty-four years of Kodak making, twenty-four years of striving after simplicity, have produced the marvelously simple Kodaks of to-day, which, if compared with the model of 1888, the simplest camera of its time, would make it seem a crude, clumsy, subject for ridicule. Simplicity, combined with quality and dependability, is the foundation of the Kodak reputation.

"The whole world Kodaks" because we have simplified as well all the processes for the making of the pictures. The Kodak Film Tank has made development, that former bugbear for the beginner, a perfectly simple matter. It will automatically develop film without the use of a dark room, just as well for the novice as for the veteran, and do it more perfectly than could an expert by the old dark room method. The transparent non-curling Kodak film and Velox paper have made the finishing of prints a simple delight. The dark room is absolutely eliminated. All chemicals come ready prepared; the carefully written instruction books explain briefly but clearly every step of picture making for those who wish to do it all.

But if you prefer not to develop and print, the old offer—"you press the button; we do the rest"—holds good, not only so far as we are concerned, but there are thousands of others the world over, who will finish your pictures for you.

"The whole world Kodaks" because Kodakery, as well as simplifying, has wonderfully increased the scope of amateur photography. Faster film, faster lenses, accurate shutters, have made picture taking easy under conditions formerly considered impossible. And Kodak film gives truer color values than does any other film. It has unmatched orthochromatic quality. But

most important of all is the dependability of Kodak Film—the certainty with which it gives the best possible results from every exposure, the latitude which makes up in a remarkable degree for errors of judgment in exposures by the amateur.

“The whole world Kodaks” because there is a Kodak or Brownie camera to suit the requirements and the purse of everyone. The Folding Pocket Kodaks, differing little except in size, are, perhaps, best suited to the average man or woman. The Special Kodaks are equally simple and with their high speed lenses are instruments of wonderful capabilities, while the Speed Kodaks not only cover the special field of their own, which their name indicates, but are perfectly practical for every kind of work that any hand camera will do. And then there is the new Vest Pocket Kodak. Wherever you are going, however cramped for space, this wonderfully compact little camera can accompany you unobtrusively — and it is always ready for action.

The Brownie cameras are often called “little cousins of the Kodaks,” for they are made in Kodak factories by Kodak workmen, and they load in daylight with Kodak cartridges. Very simple in construction, very inexpensive, they are used with marked success, not only by school children, but by thousands of grown up amateurs, the world over.

If you have read so far, a word of warning will not be amiss. So great has the reputation of Kodak become that there are those who would wrongfully trade upon it. Genuine Kodak goods are made only by the Eastman Kodak Company. Look for the name “Eastman” on the goods, taking especial care in the purchase of films, particularly when traveling, that no inferior substitute is thrust upon you. Look for “N. C.” on the carton and “Kodak” on the spool end.

*If it isn't an Eastman, it isn't a Kodak.*

EASTMAN KODAK CO.

ROCHESTER, NEW YORK  
“The Kodak City”

## Automatic Shutters

### Kodak Ball Bearing Shutter

This shutter is automatic and embodies a new principle in shutter construction, operating with remarkable smoothness and precision. The leaves are made in five segments, mounted entirely on ball bearings, and open and close in the form of a star, admitting a much larger amount of light in the same space of time than any other type of shutter. All but the No. 0 work with bulb or finger release and have variable indicated speeds of  $\frac{1}{25}$ ,  $\frac{1}{30}$  and  $\frac{1}{100}$  second, as well as bulb and bulb time exposures.

They are also fitted with indicator for registering each exposure as made and iris diaphragm.

Supplied with Folding Pocket Kodaks, Nos. 1A, R. R. Type; 3, 3A and 4. The No. 0 is supplied with the Vest Pocket Kodak and is similar to the above in all respects excepting that it works with finger release only, has variable speeds of  $\frac{1}{25}$  and  $\frac{1}{30}$  second and has no registering device.

### Pocket Automatic Shutter

This shutter has star-shaped opening and is automatic in action. For snap-shots, a single pressure of the lever makes the exposure. When set at "B", the shutter opens at one pressure and closes when released. At "T", one pressure opens the shutter and another closes it. Fitted with iris diaphragm stops and regularly supplied with Nos. 1 and 1A Folding Pocket Kodaks, and Nos. 2 and 2A Folding Pocket Brownies.

# Automatic Shutters

## F. P. K. Automatic Shutter

This shutter is always set, works with either bulb or finger release for time, bulb or snap-shot exposures. When set at "I" pressure on release makes instantaneous exposure of  $\frac{1}{50}$  of a second. When set at "B", the shutter opens at one pressure and closes when released. At "T", one pressure opens the shutter and another closes it.

This shutter is fitted with iris diaphragm stops, graduated from No. 4 to 128.

Supplied on the Nos. 3 and 3A Folding Brownies.

## Compound Shutter

The Compound Shutter is an automatic and setting shutter combined. Automatically, either time or bulb exposures may be made, while it may be set for speeds of from 1 to  $\frac{1}{150}$ ,  $\frac{1}{200}$  and  $\frac{1}{250}$  second, according to size of shutter. The shutter leaves are formed of segments opening in star shape, giving even illumination over the entire plate the instant the exposure is started, and an iris diaphragm is supplied for stopping down.

Case is made of aluminum, and accurate adjustments can be made with the shutter in any position.

Regularly supplied on the Nos. 1A, 3 and 3A Special Kodaks and as a special equipment with the Nos. 1A, R. R. Type; 3, 3A, 4 and 4A Folding Kodaks.

# Kodak Automatic Shutter and Kodak Autotime Scale

The Kodak Automatic Shutter is carefully adjusted for time, bulb and instantaneous exposures. It is also graduated for fractional parts of a second, and is unusually accurate upon all its speeds.

This shutter is regularly fitted with the Kodak Autotime Scale and is supplied as a special equipment on the Nos. 1A R. R. Type, 3, 3A and 4 Folding Pocket Kodaks.

The Kodak Autotime Scale greatly reduces the liability of error in exposure, as it automatically indicates the proper time and stop opening for subjects under any condition of outdoor photography. It is exceedingly simple to use. The speed indicator is merely set at the

point on the scale indicating the kind of light prevailing and the diaphragm indicator at the point indicating the character of the subject. No calculations are necessary.

These scales are also supplied at a nominal charge for the following shutters, and will be found a very great convenience. They can be readily attached by any amateur in a few moments. Always designate by Style letter as below.

Style A. For use with Kodak Ball Bearing shutter,  $2\frac{1}{2} \times 4\frac{1}{4}$  and  $3\frac{1}{4} \times 4\frac{1}{4}$ .

Style AA. For use with Kodak Ball Bearing shutter,  $3\frac{1}{4} \times 5\frac{1}{2}$  and  $4 \times 5$ .

Style B. For use with F. P. K. Automatic,  $2\frac{1}{2} \times 4\frac{1}{4}$  and  $3\frac{1}{4} \times 4\frac{1}{4}$ , No. 1 S. V. (Blair or Premo) Automatic, or No. 1 B. & L. S. V. Automatic shutters.

Style BB. For use with F. P. K. Automatic,  $3\frac{1}{4} \times 5\frac{1}{2}$  and  $4 \times 5$ , No. 2 S. V. (Blair or Premo) Automatic, or No. 2 B. & L. S. V. Automatic shutters.

Style C. For use with Kodak Automatic shutter,  $3\frac{1}{4} \times 4\frac{1}{4}$ .

Style CC. For use with Kodak Automatic shutter,  $3\frac{1}{4} \times 5\frac{1}{2}$  and  $4 \times 5$ .

Style D. For use with B. & L. Automatic and Century Automatic shutters,  $3\frac{1}{4} \times 4\frac{1}{4}$ .

Style DD. For use with B. & L. Automatic and Century Automatic shutters,  $3\frac{1}{4} \times 5\frac{1}{2}$  and  $4 \times 5$ .

Style DDD. For use with B. & L. Automatic shutter,  $4\frac{1}{4} \times 6\frac{1}{2}$ .

Autotime Scale, any style, \$1.00.

## No. 1 Folding Pocket Kodak

This excellent little Kodak is designed for those who wish a compact folding camera, which can be easily carried in the pocket and which will make pictures without the necessity of focusing or estimating distances.

Upon opening the camera the front springs automatically into position, ready at once for making pictures of objects at any distance. A reversible finder makes composition easy, and slight pressure of the shutter lever makes the exposure.

When closed the bed folds over front and bellows, concealing all adjustments, and the camera can then be very conveniently carried in any coat pocket. The lens is a meniscus achromatic of the best quality, and camera is made of aluminum, with best seal grain leather covering and nicked fittings. With the aid of a Kodak Portrait Attachment this camera will make good size bust portraits.

### In Detail

For rectangular pictures,  $2\frac{1}{4} \times 3\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $6\frac{3}{4} \times 3\frac{1}{2} \times 1\frac{5}{8}$  inches. Weight, 16 ounces. Lens, meniscus achromatic, 4-inch focus. Shutter, Pocket Automatic. (See page 6.) Brilliant reversible finder.

### The Price

No. 1 F. P. K., with meniscus achromatic lens, Pocket Automatic shutter	\$10.00
Black Sole Leather Carrying Case, with strap	1.25
N. C. Film Cartridge, 12 exposures, $2\frac{1}{4} \times 3\frac{1}{4}$	.40
Ditto, 6 exposures	.20
Kodak Portrait Attachment	.50

## No. 1A Folding Pocket Kodak

Made upon the same principle as the No. 1, this model is operated in precisely the same way, but makes  $2\frac{1}{2} \times 4\frac{1}{4}$  pictures. This is one of the most desirable amateur sizes, as it lends itself to many artistic compositions. It is particularly pleasing for horizontal landscapes, for full and three-quarter length portraits and for bust pictures when the camera is fitted with Kodak Portrait Attachment.

Like the No. 1, the camera requires no focusing, it may be carried in any coat pocket without trouble, and it is always ready for action.

It offers opportunity for making good size, artistic pictures with the minimum of effort and at very slight expense. Made of aluminum, with seal grain covering. All metal parts nickeled.

### In Detail

For rectangular pictures,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $7\frac{3}{4} \times 3\frac{7}{8} \times 1\frac{3}{4}$  inches. Weight, 20 ounces. Lens, meniscus achromatic, 5-inch focus. Shutter, Pocket Automatic. (See page 6.) Brilliant reversible finder.

### The Price

No. 1A Folding Pocket Kodak, with meniscus achromatic lens, Pocket Automatic shutter . . . . .	\$12.00
Black Sole Leather Case, with shoulder strap . . . . .	1.25
N. C. Film Cartridge, 12 exposures, $2\frac{1}{2} \times 4\frac{1}{4}$ . . . . .	.50
Ditto, 6 exposures . . . . .	.25
Kodak Portrait Attachment . . . . .	.50

## No. 1A Folding Pocket Kodak—R. R. Type

The  $2\frac{1}{2} \times 4\frac{1}{4}$  size is such an all-around desirable size for amateur pictures that a model with greater capabilities than the regular No. 1A is preferred by many. This model offers the advantage of double R. R. lens, which means more speed and better definition. And the lens is mounted in the Kodak Ball Bearing shutter. This equipment cannot be excelled outside of the anastigmats.

A compact, inexpensive outfit considering its capabilities, and one which, though suitable for the most serious work, will slip readily into the pocket, and is so simple that it may be effectively handled by the beginner.

### In Detail

For rectangular pictures,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $8 \times 2 \times 3\frac{3}{4}$  inches. Weight, 23 ounces. Lens, double combination, rapid rectilinear, speed,  $f. 8$ , focal length, 5 inches. Shutter, Kodak Ball Bearing. (See page 6.) Automatic focusing lock. Two tripod sockets. Brilliant reversible finder.

### The Price

No. 1A F. P. K., R. R. Type, R. R. lens, Kodak Ball Bearing shutter . . .	\$15.00
Ditto, with Kodak Automatic shutter and Zeiss Kodak anastigmat lens, $f. 6.3$ . . .	40.50
Ditto, with Compound shutter, highest speed $\frac{1}{250}$ second . . . . .	46.30
Black Sole Leather Carrying Case, with strap . . . . .	1.25
N. C. Film Cartridge, 12 exposures, $2\frac{1}{2} \times 4\frac{1}{4}$ . . . . .	.50
Ditto, 6 exposures . . . . .	.25
Kodak Portrait Attachment . . . . .	.50

## Vest Pocket Kodak

No matter how many cameras you may have, there are times when a vest pocket edition of your larger instrument will be appreciated. That's just what the Vest Pocket Kodak is—a miniature Kodak—so flat and smooth and small as to go readily into a vest pocket, so carefully made as to be capable of the highest grade of work.

The pictures that this little Kodak make are  $1\frac{5}{8} \times 2\frac{1}{2}$  inches. Owing, however, to the superior definition given by the Vest Pocket Kodak lens, enlargements may readily be made from the negatives. In post-card size ( $3\frac{1}{4} \times 5\frac{1}{2}$  inches) they are particularly attractive, and may be had at fifteen cents each, or the Kodaker may readily make his own, in this size, with a Vest Pocket Kodak Enlarging camera. (See page 39.) Of course, enlargements may be made in a still greater size by the usual methods.

Made to be always ready for action, it is only necessary to pull out the front to its full extent and the Vest Pocket Kodak is in focus for objects at any distance. The shutter is the Kodak Ball Bearing, working automatically for time, bulb,  $\frac{1}{25}$  and  $\frac{1}{30}$  of a second with an exceptionally convenient finger release, and is fitted with iris diaphragm and the Kodak Autotime Scale. The lens is a meniscus achromatic of exceptional quality and each one is given a rigid test.

Actual Size

## Vest Pocket Kodak

The Film Cartridges for the Vest Pocket Kodak contain eight exposures each and, of course, have the Kodak daylight loading feature. Another feature is the extreme simplicity in loading — nothing trappy or fussy about it. Indeed, the operation of the camera is simple in every detail, nothing in the way of simplicity or efficiency having been sacrificed in order to reduce the size.

Quality marks the Vest Pocket Kodak in every detail. It is not made small so that we can produce a cheap camera ; it is made small for the sake of convenience. The small price is simply the result of our manufacturing facilities.

### In Detail

For rectangular pictures,  $1\frac{5}{8} \times 2\frac{1}{2}$  inches. Capacity, 8 exposures without reloading. Size of Kodak,  $1 \times 2\frac{3}{8} \times 4\frac{3}{4}$ . Weight, 9 ounces. Lens, meniscus achromatic, 3-inch focus. Shutter, Kodak Ball Bearing No. 0. (See page 6.) Brilliant reversible finder. All metal body, black enamel finish and black leather bellows.

### Price

Vest Pocket Kodak, meniscus achromatic lens and Kodak Ball Bearing shutter . . . . .	\$6.00
Leather Case . . . . .	.75
N. C. Film Cartridge, 8 exposures, $1\frac{5}{8} \times 2\frac{1}{2}$ . . . . .	.20
Kodak Portrait Attachment . . . . .	.50

## No. 3 Folding Pocket Kodak

Those who prefer pictures of the  $3\frac{1}{4} \times 4\frac{1}{4}$  size will find this model a wonderfully compact, convenient and efficient camera, with which they can secure pictures of this pleasing proportion.

It is a splendid camera for snap-shot photography, for it is fitted with the best R. R. lens obtainable, mounted in the Kodak Ball Bearing shutter. This shutter having star shaped leaves, admits much more light than the ordinary two winged shutter, and it is graduated for  $\frac{1}{25}$ ,  $\frac{1}{30}$  and  $\frac{1}{60}$  second, as well as for time and bulb exposures.

The camera is equipped with rising and sliding front—a great convenience in architectural and many forms of landscape photography, and an automatic focusing lock is provided so that the camera can quickly be brought to focus for any distance. It has brilliant reversible finder, two tripod sockets and automatic standard clamp locking firmly at any point on the bed where released.

While the camera, of course, is designed for the use of our roll films, it can be loaded with plates at any time by the addition of a simple plate adapter or combination back. This is interchangeable with the regular back, is provided with ground glass for focusing and takes double plate holders. (See similar back illustrated on page 16.)

For those who make lantern slides, this camera is especially desirable, for the size,  $3\frac{1}{4} \times 4\frac{1}{4}$ , is just right for slide making without either enlargement or reduction.

The instrument can be readily carried in the ordinary coat pocket and is handsomely finished throughout. Box and bed are of aluminum, metal parts are highly nickeled, and covering is of fine quality grain leather.

# No. 3 Folding Pocket Kodak

## In Detail

For rectangular pictures,  $3\frac{1}{4} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $7\frac{1}{2} \times 4\frac{1}{2} \times 1\frac{3}{4}$  inches. Weight, 23 ounces. Lens, double combination, rapid rectilinear, speed,  $f. 8$ , focal length, 5 inches. Shutter, Kodak Ball Bearing, (See page 6.) Rising and sliding front. Two tripod sockets. Brilliant reversible finder with hood. Automatic focusing lock.

## The Price

No. 3 F. P. K., R. R. lens, Kodak Ball Bearing shutter . . . . .	\$17.50
Ditto, with Kodak Automatic shutter . . . . .	22.50
Ditto, with Kodak Automatic shutter and Zeiss Kodak anastigmat lens, $f. 6.3$ . . . . .	43.00
Ditto, with Compound shutter, highest speed $\frac{1}{250}$ second . . . . .	48.80
Black Sole Leather Case, with strap . . . . .	1.25
Combination Back, for $3\frac{3}{4} \times 4\frac{1}{4}$ plates . . . . .	3.50
Double Glass Plate Holder, $3\frac{1}{4} \times 4\frac{1}{4}$ . . . . .	1.00
N. C. Film Cartridge, 12 exposures, $3\frac{1}{4} \times 4\frac{1}{4}$ . . . . .	.70
Ditto, 6 exposures . . . . .	.35
Ditto, "double-two" cartridge, 4 exposures . . . . .	.25
Kodak Portrait Attachment . . . . .	.50

## No. 3A Folding Pocket Kodak

Of all amateur pictures, the 3A ( $3\frac{1}{4} \times 5\frac{1}{2}$ ) is the most popular size. Its proportions are just right for post-cards, it is unusually effective for landscape photography and for street scenes when used horizontally; while vertically it is ideal for portraiture whether full length, or head and shoulders with the Kodak Portrait Attachment. It is a general favorite among tourists, automobilists, vacationists and others requiring a light, compact outfit which can be thoroughly depended upon.

This model is fitted with Kodak Ball Bearing shutter, which makes it especially effective for instantaneous work, and the best R. R. lens obtainable outside of the anastigmats. It has rising, sliding and falling front, automatic focusing lock, reversible finder and two tripod sockets. And while thus equipped for the most serious work, it can be effectively handled even by the absolute novice.

Like the No. 3, it will accommodate plates as well as films by the simple addition of a combination back, which is interchangeable with the regular back. This may be secured from any dealer, it is fitted with ground glass and

Showing Combination Back with Focusing Screen takes double plate holders.

This camera is covered with fine grain best quality leather, has nicked fittings and in every detail is an attractive and capable instrument.

# No. 3A Folding Pocket Kodak

## In Detail

For rectangular pictures,  $3\frac{1}{4} \times 5\frac{1}{2}$  inches. Capacity, 10 exposures without reloading. Size of Kodak,  $9\frac{1}{2} \times 4\frac{3}{4} \times 1\frac{7}{8}$  inches. Weight, 41 ounces. Lens, double combination, rapid rectilinear, speed,  $f. 8$ , focal length,  $6\frac{1}{2}$  inches. Shutter, Kodak, Ball Bearing. (See page 6.) Two tripod sockets. Brilliant reversible finder with hood. Automatic focusing lock for films. Double focusing scale for films or plates.

## The Price

No. 3A F. P. Kodak, R. R. lens, Kodak Ball Bearing shutter . . . . .	\$20.00
Ditto, with Kodak Automatic shutter . . . . .	25.00
Ditto, with Compound shutter, highest speed $\frac{1}{200}$ second, and Zeiss Kodak anastigmat lens, $f. 6.3$ . . . . .	61.40
Black Sole Leather Case, with strap . . . . .	1.50
Combination Back . . . . .	3.50
Double Glass Plate Holders, $3\frac{1}{4} \times 5\frac{1}{2}$ , each . . . . .	1.00
N. C. Film Cartridge, 10 exposures, $3\frac{1}{4} \times 5\frac{1}{2}$ . . . . .	.70
Ditto, 6 exposures . . . . .	.40
Ditto, "double-two" cartridge, 4 exposures . . . . .	.30
Kodak Portrait Attachment . . . . .	.50

## Special Kodaks

The idea of the Special Kodaks is to provide an instrument for general amateur photography, which, without sacrifice of the underlying idea of Kodak simplicity, will leave nothing to be desired by the user, whether he be a beginner or an expert.

Aside from the requirements of the focal plane specialists, for whom we supply the Speed Kodaks, there is no condition under which amateur pictures can possibly be made, in which these cameras will not produce the best of results. Two years ago, we offered the No. 3A Special, last year, the No. 3, and this year we have added the No. 1A Special. So that now those who wish the very best to be had can get a Special Kodak in any one of the three most popular amateur sizes.

These cameras are fitted with the Zeiss Kodak Anastigmat lens and Compound shutter, which latter attains a speed of  $\frac{1}{250}$  second in the 1A and 3 sizes, and  $\frac{1}{300}$  second in the 3A size. These fast lenses give the Specials a great advantage over the ordinary camera in dull lights, and in combination with the Compound shutter, make them second only to cameras having focal plane shutters for photographing rapidly moving objects.

They have rising and sliding fronts, reversible finders, rack and pinion for focusing, spirit levels, in fact every convenience that can be put into a film camera. The 3 and 3A sizes will take plates by addition of a combination back (supplied extra).

Made as the last word in photographic perfection, these cameras are beautifully finished. Covered with genuine Persian morocco, with rich black leather bellows and nicked fittings, they bear the impress of the quality that is in them.

Ditto, "double-two" cartridge, 4 exposures . . . . .		.25	.30

## No. 4 Folding Pocket Kodak

The No. 4 Folding Pocket Kodak is designed to provide those who prefer 4 x 5 pictures with a camera having the same conveniences and the same dependability as the 3A. It is, in fact, similar to that model in every essential respect excepting

in the size of the pictures which it makes. And there are many photographers who prefer the 4 x 5 proportion on account of its suitability for compositions of any character in either the vertical or horizontal position, and also the comparatively large size which it is possible to get of the objects in the composition.

The optical equipment is precisely the same as that of the 3A — the best quality of R. R. lens, mounted in the Kodak Ball Bearing shutter. This equipment makes the camera very effective for snap-shot work as the lens works at *f.* 8 and the star shaped shutter leaves admit much more light in a given time than does the ordinary shutter.

The camera is provided with rising and sliding front, reversible brilliant finder, automatic focusing lock and two tripod sockets. While thus equipped for a wide range of work, it may be carried in a top coat pocket and may be easily handled by the beginner as well as the advanced amateur.

Fitted with Kodak Portrait Attachment, this model is excellent for bust portraits, as it can be focused as close as 2 feet 8 inches to the subject, producing a very large portrait.

A glass plate adapter with focusing screen, and interchangeable with the regular back, may be had from your dealer, and the camera can then be loaded with plates whenever desired.

Constructed with the usual Kodak skill, covered with best quality seal grain leather and all metal parts are beautifully nicked.

## No. 4 Folding Pocket Kodak

### In Detail

For rectangular pictures, 4 x 5 inches. Capacity, 12 exposures without reloading. Size of Kodak,  $9 \times 5\frac{3}{4} \times 2\frac{1}{4}$  inches. Weight, 2 pounds 11 ounces. Lens, double combination, rapid rectilinear, speed,  $f. 8$ , focal length,  $6\frac{1}{2}$  inches. Shutter, Kodak Ball Bearing. (See page 6) Two tripod sockets. Brilliant reversible finder. Automatic focusing lock.

Ditto, "double-two" cartridge, 4 exposures . . . . .	.30
Kodak Portrait Attachment . . . . .	.50

## No. 4A Folding Kodak

For very large size pictures, we offer the No. 4A Folding Kodak—a camera which combines all the simple and convenient Kodak features in a very light and compact camera, considering the proportions of the picture it makes. It is fully equipped for out of the ordinary work, as well as for snap-shot and general amateur photography.

One of its special features is its adaptability to home portraiture. Fitted with the Kodak Portrait Attachment, it will make bust portraits up to the full size of the film, as it may be operated as close as  $3\frac{1}{2}$  feet to the subject. A plate adapter with focusing screen, interchangeable with the regular back, will permit the use of dry plates if desired.

The shutter supplied with this model is a double valve automatic, which works not only for time and bulb exposures, but is also graduated in fractional parts of a second from  $\frac{1}{100}$  to 1. The lens is a Rapid Rectilinear of the same high quality as those supplied with the preceding Kodaks.

The camera is equipped with rising and sliding front, rack and pinion for easy focusing two tripod sockets and a very positive automatic standard clamp. The regular finder is a brilliant reversible, but when desired, a direct view finder can be furnished for specially quick snap-shot work with the camera held on a level with the eyes.

Constructed with the same care and attention to detail as the preceding model, the No. 4A is just as simple to operate, and is finished in the same style, with seal grain covering and nickeled fittings.

## No. 4A Folding Kodak

### In Detail

For rectangular pictures,  $4\frac{1}{4} \times 6\frac{1}{2}$  inches. Capacity, 6 exposures without reloading. Size of Kodak,  $11 \times 6\frac{1}{2} \times 2\frac{5}{8}$  inches. Weight, 4 pounds 4 ounces. Lens, double combination, rapid rectilinear, speed,  $f. 8$ , focal length,  $8\frac{1}{4}$  inches. Shutter, B. & L. Automatic. Rising and sliding front. Rack and pinion for focusing. Two tripod sockets. Brilliant reversible finder with hood.

### The Price

Ditto, "double-two" cartridge, 4 exposures . . . . .	.45
Direct View Finder . . . . .	3.00
Kodak Portrait Attachment . . . . .	.50

## No. 1A Speed Kodak

Simple to operate, small enough to be carried in a top coat pocket, this Kodak, as its name implies, is suitable for the very highest speed photography.

And although it will easily make pictures of the fastest moving objects, such as automobiles, express trains, athletes and race horses, it can be just as easily used for home portraiture, and all other ordinary amateur work.

Its high speed is attained by the incorporation of a focal plane shutter in its construction.

This shutter is of the well known Graflex Focal Plane type, which is provided with a curtain having a series of slots of varying widths. This curtain, in combination with a speed tension regulator, permits a latitude of exposures varying from  $\frac{1}{1000}$  of a second to very slow instantaneous, bulb, or time exposures. The shutter can be instantly wound by the half turn of a key, and released by merely touching a lever.

The finder of the No. 1A Speed is of the direct view type for use with the camera held on a level with the eyes. This is supplemented by a mirror attachment, which springs up at an angle of 45 degrees, for location and composition of subjects with the Kodak held in any other position.

Rack and pinion is furnished for easy focusing, metal parts have gun-metal finish, and covering is a very fine grain leather. The size of picture,  $2\frac{1}{2} \times 4\frac{1}{4}$ , is suitable for any style of composition, and is very desirable for portraiture.

## No. 1A Speed Kodak

### In Detail

For rectangular pictures,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $2\frac{1}{4} \times 4\frac{1}{2} \times 9\frac{3}{4}$  inches. Weight, 3 pounds. Shutter, Graflex focal plane, speed  $\frac{1}{1000}$  second to slow instantaneous. Rack and pinion for focusing, automatic standard clamp, and tripod socket. Direct view finder with mirror attachment. Automatic safety blind for protecting film when shutter is wound.

### The Price

No. 1A Speed Kodak, Graflex focal plane shutter, without lens . . . . .	\$38.00
Ditto, with Zeiss Kodak anastigmat lens No. 2, <i>f.</i> 6.3 . . . . .	60.00

N. C. Film Cartridge, 12 exposures, $2\frac{1}{2} \times 4\frac{1}{4}$ . . . . .	.50
Ditto, 6 exposures . . . . .	.25

## No. 4A Speed Kodak

The shape of the pictures made by this camera is of splendid proportions for the very high speed work for which it is adapted, as well as for the general run of amateur work. And the pictures are of that larger size which many photographers, who make a specialty of some particular class of work, prefer.

This camera attains a maximum speed exposure of  $\frac{1}{1000}$  of a second—thanks to the Kodak Focal Plane shutter, which is built into the camera box. The shutter is provided with a curtain having an adjustable opening, which, in combination with a speed tension device, regulates the duration of the exposure. The shutter is in no way complicated, but can be easily understood and operated by anyone who follows the simple directions included with the camera.

The 4A Speed shutter, of course, works for time as well as instantaneous exposures, and besides being wonderfully efficient for making pictures of automobiles, aeroplanes, race horses, athletes, and other rapidly moving objects, is a perfectly satisfactory camera for home portraiture and other work for which the ordinary camera is regularly used.

The camera is fitted with direct view finder, it is beautifully finished, metal parts are nicked, and covering is of the finest grain leather.

## No. 4A Speed Kodak

### In Detail

For rectangular pictures,  $4\frac{1}{4} \times 6\frac{1}{2}$  inches. Capacity, 6 exposures without reloading. Size of Kodak,  $11\frac{3}{4} \times 3\frac{7}{8} \times 6\frac{1}{2}$  inches. Weight, 6 pounds. Shutter, Kodak focal plane, speed  $\frac{1}{1000}$  of a second to slow instantaneous. Rising and sliding front, rack and pinion for focusing. Two tripod sockets. Brilliant reversible finder, with hood, also direct view finder and focusing scale.

Ditto, "double-two" cartridge, 4 exposures . . . . .	.45

## Panoram Kodaks

A wonderfully inviting field is opened to the amateur by the Panoram Kodaks.

As their name indicates, they are intended for picturing wide expanses of landscape and similar subjects, and this without the exceedingly small images incident to the use of extreme wide angle lenses, heretofore the only method of securing such pictures.

Aside from the remarkable horizontal views, decidedly unique pictures of high waterfalls, mountain peaks and similar subjects may be made by holding the camera vertically. Two tripod sockets are supplied for use with the camera either vertically or horizontally.

For taking outdoor group pictures the Panorams are unequaled, as the subjects may be arranged in a semi-circle, at a given distance from the Kodak, thus permitting all of them to be in the "front row" and of proper relative size.

Though possessing such remarkable advantages, the Panoram Kodaks are exceedingly simple in construction and operation.

The compassing of so wide an angle of view is accomplished by swinging the lens on a pivot during the exposure, the shutter being accurately adjusted to insure even illumination throughout the exposure.

The brilliant finder shows the sky and foreground, and the entire view may be examined by simply swinging the camera in position so as to take in the full view, as indicated by the V-shaped lines on the top of the camera. The No. 1 Panoram takes a view of 112 degrees, while the No. 4 has the great scope of 142 degrees. The Panoram Kodaks use the regular daylight loading cartridges. Not adapted to indoor work. Covered with best black leather and have nickeled fittings.

# Panoram Kodaks

## No. 1 Panoram Kodak

### In Detail

For rectangular pictures,  $2\frac{1}{4} \times 7$  inches. Capacity, 6 exposures without reloading. Size of Kodak,  $3\frac{3}{8} \times 4\frac{1}{4} \times 7\frac{3}{8}$  inches. Weight, 24 ounces. Lens, specially selected as to quality and focal length. Shutter, Panoram. Two tripod sockets. Brilliant finder with hood. Uses No. 1 F. P. Kodak cartridges.

Ditto, 2 exposures . . . . .	.45

## No. 2 Flexo Kodak

This Kodak is of the simplest form of picture-taking instruments. It has a fixed focus, requires no estimating of distances, and with automatic shutter is always ready for action.

The No. 2 Flexo makes a square picture,  $3\frac{1}{2} \times 3\frac{1}{2}$  inches in size, and is a thoroughly satisfactory instrument for all kinds of general amateur work.

The shutter works for time or instantaneous exposures, and with the Kodak Portrait Attachment excellent results may be secured in home portraiture.

Complete in every respect, with finder and tripod socket, the price includes every requisite for picture making except the film.

Loads and unloads in daylight, and is constructed with the same care as given to the higher priced Kodaks.

### In Detail

For square pictures,  $3\frac{1}{2} \times 3\frac{1}{2}$  inches. Capacity, 12 exposures without reloading. Size of Kodak,  $5\frac{7}{8} \times 4\frac{5}{8} \times 4\frac{3}{8}$  inches. Weight, 19 ounces. Lens, single achromatic,  $4\frac{1}{2}$ -inch focus. Shutter, Eastman Rotary, with three stops. Tripod socket and finder.

### The Price

No. 2 Flexo Kodak, achromatic lens, Eastman Rotary shutter . . . . .	\$5.00

Ditto, 6 exposures . . . . .	.30
Ditto, "double-two" cartridge, 4 exposures . . . . .	.20
Kodak Portrait Attachment . . . . .	.50

## Nos. 2 and 3 Bull's-Eye Kodaks

The Bull's-Eye Kodak for years has been a general favorite with those amateurs who wish a simple, inexpensive, yet reliable instrument for photographing the things they are interested in.

These two cameras differ only in the size of the pictures which they make, both have automatic shutters for time or instantaneous work, finders and tripod sockets for vertical or horizontal exposures, and are easily opened for loading or unloading in daylight. They are of the fixed focus type and are always ready to operate. With Kodak Portrait Attachment either can be depended upon for first-rate portraits.

The covering is seal grain leather of fine quality, and metal parts are highly nicked. Cut shows the No. 3.

### In Detail

For pictures, No. 2,  $3\frac{1}{2} \times 3\frac{1}{2}$  inches; No. 3,  $3\frac{1}{4} \times 4\frac{1}{4}$  inches. Capacity, each 12 exposures without reloading. Size of Kodak, No. 2,  $5\frac{3}{4} \times 4\frac{5}{8} \times 4\frac{1}{2}$  inches; No. 3,  $4\frac{5}{8} \times 5\frac{1}{2} \times 6\frac{1}{2}$  inches. Weight, No. 2, 22 ounces; No. 3, 24 ounces. Lens, meniscus achromatic,  $4\frac{1}{2}$ -inch focus. Shutter, Eastman Rotary, with three stops. Tripod socket, No. 2, 1; No. 3, 2. Brilliant finders.

### The Price

Ditto, "double-two" cartridge, 4 exposures . . . . .	.20	.25
Kodak Portrait Attachment . . . . .	.50	.50

## No. 1 Brownie

Only immense manufacturing facilities and enormous production of these little Brownies make it possible to supply a camera which will take good pictures at such a trifling price.

The No. 1 Brownie is well made in every respect, and each camera undergoes the usual Kodak inspection for reliability before being sent out.

It is fitted with meniscus lens and the shutter works automatically for time or snap-shot exposures. V-shaped lines at the top indicate the scope of view, or, if preferred, the Brownie finder (detachable) illustrated below can be fitted at an extra charge of 25 cents.

Very simple to load and operate, inexpensive and thoroughly practical, this is an excellent instrument for starting the children along the delightful road of photography.

### In Detail

For square pictures,  $2\frac{1}{4} \times 2\frac{1}{4}$  inches. Capacity, 6 exposures without reloading. Size of camera,  $4\frac{7}{8} \times 3\frac{1}{8} \times 3$  inches. Weight, 8 ounces. Lens, meniscus,  $3\frac{3}{4}$ -inch focus. Shutter, Eastman Rotary, with one stop.

### The Price

Brownie Finder, detachable . . . . .	.25
No. 1 Brownie Developing and Printing Outfit, including paper for 24 prints . . . . .	.90

## Nos. 2 and 2A Brownies

These convenient fixed focus cameras are as simple to operate as the No. 1 Brownie, but have greater capabilities and make larger pictures. They differ from each other only in the size of the pictures which they make, and under average conditions, will produce excellent pictures.

They are especially desirable for the children on account of their low cost, strong construction and simple operation, but they are perfectly suitable for the use of grown up people and thousands are being used by such with great satisfaction.

These cameras have two finders, automatic shutters, meniscus lenses of first quality, and are covered with imitation leather.

### In Detail

For rectangular pictures, No. 2,  $2\frac{1}{4} \times 3\frac{3}{4}$  inches; No. 2A,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, No. 2, 6 exposures without reloading; No. 2A, 12 exposures without reloading. Size of camera, No. 2,  $5\frac{5}{8} \times 4 \times 3\frac{1}{4}$  inches; No. 2A,  $3\frac{7}{8} \times 5\frac{1}{8} \times 6\frac{1}{8}$  inches. Weight, No. 2, 13 ounces; No. 2A, 21 ounces. Lens, meniscus. Shutter, Eastman Rotary, with three stops. Two finders.

## No. 3 Brownie

The  $3\frac{1}{4} \times 4\frac{1}{4}$  is such a popular amateur size that this model, combining all the simple, reliable Brownie features, will appeal to very many.

Like all Brownies, it is furnished at a very moderate price and is suitable alike for the children or the grown up people. Equipped with an excellent meniscus achromatic lens and automatic shutter, it is thoroughly dependable for general amateur photography and the negatives which it makes are of such quality as to yield excellent  $6\frac{1}{2} \times 8\frac{1}{2}$  enlargements by use of the Brownie Enlarging Camera.

When fitted with Kodak Portrait Attachment the camera will make bust portraits of good size.

### In Detail

For rectangular pictures,  $3\frac{1}{4} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of camera,  $6\frac{1}{8} \times 4\frac{3}{8} \times 5\frac{1}{8}$  inches. Weight, 24 ounces. Lens, meniscus achromatic, 5-inch focus. Shutter, Eastman Rotary, with three stops. Two tripod sockets. Two finders.

### The Price

No. 3 Brownie Camera, meniscus achromatic lens, Eastman Rotary shutter	\$4.00
No. 3 Brownie Carrying Case, with shoulder strap . . . . .	1.00
N. C. Film Cartridge, 12 exposures, $3\frac{1}{4} \times 4\frac{1}{4}$ . . . . .	.70
Ditto, 6 exposures . . . . .	.35
Ditto, "double-two" cartridge, 4 exposures . . . . .	.25
Kodak Portrait Attachment . . . . .	.50

## No. 2 Folding Pocket Brownie

The folding type of Brownie camera is made upon the same idea of simplicity and low cost as the box forms, but they are of course much more compact and, in some features, more convenient.

The No. 2 is a very dainty little camera which will slip readily into an ordinary pocket, and makes excellent pictures the all-by-day-light-way.

It is fitted with our pocket automatic shutter working for time, bulb and snap-shot exposures, in which is mounted an excellent meniscus lens. Fitted with Kodak Portrait Attachment, this becomes a good camera for home portraiture, and the negatives which it makes will yield excellent 5 x 7 enlargements by use of the Brownie Enlarging Camera.

The camera is carefully finished throughout, it has imitation leather covering and nickeled fittings.

### In Detail

For rectangular pictures,  $2\frac{1}{4} \times 3\frac{1}{4}$  inches. Capacity, 6 exposures without reloading. Size of camera,  $6\frac{7}{8} \times 3\frac{5}{8} \times 2\frac{1}{8}$  inches. Weight, 16 ounces. Lens, meniscus,  $4\frac{1}{2}$ -inch focus. Shutter, Pocket Automatic. (See page 6.) Two tripod sockets. Automatic focusing lock. Reversible finder.

### The Price

No. 2 Folding Pocket Brownie, meniscus lens, Pocket Automatic shutter	\$5.00
No. 2 Folding Pocket Brownie Carrying Case . . . . .	.70
N. C. Film Cartridge, 6 exposures, $2\frac{1}{4} \times 3\frac{1}{4}$ . . . . .	.25
Kodak Portrait Attachment . . . . .	.50

## No. 2A Folding Pocket Brownie

The pleasing proportions of the pictures taken by this little Brownie, combined with its simple operation and reliability, have made it one of the most popular cameras of the whole Brownie line.

For effective landscape composition and full and three-quarter length portraits, the shape of its pictures is ideal. And when fitted with Kodak Portrait Attachment, it may be operated close up to the subject for excellent bust pictures.

Identical in construction and general design with the No. 2, this model can as easily be carried in the pocket, works for time, bulb and instantaneous exposures, and is well finished throughout. Attractively covered with best imitation leather, and metal parts are highly nickeled.

### In Detail

For rectangular pictures,  $2\frac{1}{2} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of camera,  $8\frac{1}{2} \times 2 \times 3\frac{5}{8}$  inches. Weight, 23 ounces. Lens, meniscus achromatic, 5-inch focus. Shutter, Pocket Automatic. Two tripod sockets. Automatic focusing lock. Reversible finder.

### The Price

No. 2A Folding Pocket Brownie Carrying Case . . . . .	.90
N. C. Film Cartridge, 12 exposures, $2\frac{1}{2} \times 4\frac{1}{4}$ inches . . . . .	.50
Ditto, 6 exposures . . . . .	.25
Kodak Portrait Attachment . . . . .	.50

## No. 3 Folding Brownie

For  $3\frac{1}{4} \times 4\frac{1}{4}$  pictures, this model offers all the Brownie simplicity at modest Brownie prices, and the choice of either single or double lens fitted to F. P. K. Automatic shutter with bulb and finger release. It will make any kind of pictures, it works for time, bulb and instantaneous exposures, and with Kodak Portrait Attachment is an excellent instrument for home portraiture.

These cameras are well finished, complete in every detail, and with the Brownie Enlarging Camera, good  $6\frac{1}{2} \times 8\frac{1}{2}$  enlargements can be made easily from No. 3 Folding Brownie negatives.

### In Detail

For rectangular pictures,  $3\frac{1}{4} \times 4\frac{1}{4}$  inches. Capacity, 12 exposures without reloading. Size of camera,  $8\frac{3}{8} \times 4\frac{5}{8} \times 2\frac{5}{8}$  inches. Weight, 25 ounces. Lens, meniscus achromatic, 5-inch focus. Shutter, F. P. K. Automatic with bulb. (See page 7.) Automatic focusing lock. Two tripod sockets. Reversible finder.

Automatic shutter . . . . .	\$9.00
Ditto, with R. R. lens and F. P. K. Automatic shutter . . . . .	11.00
No. 3 Folding Brownie Carrying Case . . . . .	1.00
N. C. Film Cartridge, 12 exposures, $3\frac{1}{4} \times 4\frac{1}{4}$ . . . . .	.70
Ditto, 6 exposures . . . . .	.35
Ditto, "double-two" cartridge, 4 exposures . . . . .	.25
Kodak Portrait Attachment . . . . .	.50

## No. 3A Folding Brownie

If there is any one particular size favored by the majority of amateurs, it is the  $3\frac{1}{4} \times 5\frac{1}{2}$ , or post-card size, and here is a Brownie with all the Brownie features, for this effective size.

It offers the choice of either single or double lens and is fitted with F. P. K. Automatic shutter — a most efficient equipment for the ordinary run of amateur photography. Supplied with reversible finder, two tripod sockets and automatic focusing lock, it is furnished at a very moderate price, considering the large size pictures which it makes and the quality of the instrument.

Covered with durable imitation leather. Metal parts nickeled.

### In Detail

For rectangular pictures,  $3\frac{1}{4} \times 5\frac{1}{2}$  inches. Capacity, 10 exposures without reloading. Size of camera,  $2\frac{5}{8} \times 4\frac{5}{8} \times 9\frac{7}{8}$  inches. Weight, 34 ounces. Lens, meniscus achromatic,  $6\frac{1}{2}$ -inch focus. Shutter, F. P. K. Automatic, with bulb release. (See page 7.) Automatic focusing lock. Two tripod sockets. Reversible finder.

### The Price

No. 3A Folding Brownie Camera, meniscus achromatic lens, F. P. K. Automatic shutter . . . . .	\$10.00
Ditto, with R. R. lens and F. P. K. Automatic shutter . . . . .	12.00
No. 3A Folding Brownie Carrying Case . . . . .	1.00
N. C. Film Cartridge, 10 exposures . . . . .	.70
Ditto, 6 exposures . . . . .	.40
Ditto, "double-two" cartridge, 4 exposures . . . . .	.30
Kodak Portrait Attachment . . . . .	.50

## Brownie Enlarging Cameras

With one of these cameras it's just as easy to make first-class enlargements from your favorite negatives as it is to print on Velox paper. In fact, the two processes are very much the same excepting that, in ordinary printing, the negative and paper are in close contact, while in enlarging, the paper is at some distance from the negative, with a lens in between.

The Brownie Enlarging Camera consists of a light-tight cone with attachments to hold a negative at the small end, and a sheet of Bromide or Velox paper at the other. They are collapsible so that they fold flat and may be conveniently carried in a suit case.

- |   |        |
|---|--------|
| No. 2. Brownie Enlarging Camera, for 5 x 7 enlargements from 2¼ x 3¼ negatives . . . . .                | \$2.00 |
| No. 3. Ditto, for 6½ x 8½ enlargements from 3¼ x 4¼ negatives . . . . .                                 | 3.00   |
| No. 4. Ditto, for 8 x 10 enlargements from 4 x 5 negatives (will also take 3¼ x 5½ negatives) . . . . . | 4.00   |

## V. P. Kodak Enlarging Camera

Made upon the same principle as the Brownie Enlarging Camera, the Vest Pocket operates in the same simple manner, but it is so small of itself that it is not made collapsible.

It makes 3¼ x 5½ enlargements from 1½ x 2½ negatives.

Vest Pocket Kodak Enlarging Camera, \$1.75

## Brownie Enlarging Camera Illuminator

A very convenient device, providing a strong, even light by which to print Brownie or Vest Pocket Enlargements. It is collapsible, but when set up, has the form of a half round, light-proof box with socket through which is inserted an electric light bulb.

The inner walls of this box are white and act as a splendid reflector when the light is turned on. At the end is a ground glass, which diffuses the light, so that by placing negative end of the enlarging camera in contact with this glass and turning on the electricity, an excellent steady printing light is obtained.

The glass is provided with a hinged protector of ruby cloth, which may be closed as soon as the exposure is completed, and the illuminator then becomes a perfect lamp for the developing and subsequent operations with the paper.

Brownie Enlarging Camera Illuminator, \$3.00

## Kodak Film Tank

The Kodak Film Tank has so thoroughly demonstrated the superiority of the time and temperature method of development that the old hand development of dark room days is practically obsolete, except for the development of extra large glass plates.

The Kodak Tank is immeasurably more convenient—can be carried and used anywhere; but that is not its greatest advantage. It eliminates the dark room entirely, developing film in broad daylight; but even this is not its greatest advantage. For with both these extraordinary features it produces *better results*; and this is its greatest advantage—the assurance that

every roll of film put into the tank, where the simple directions are implicitly followed, will come out developed as well or better than that roll of film could be developed in the dark room by the most experienced photographer.

The Kodak Film Tank consists of a winding box, a light-proof apron, and a heavily nickeled brass solution cup with cover. All articles can be packed in the box, making the entire outfit self-contained.

The film to be developed is placed upon a reel in the winding box, the cover is placed on the box and the film is wound around a central axis in combination with the apron, in such fashion that,

when completely wound, the apron protects the film effectually from light, and may be removed from the winding box safely at any time. It is then lowered into the cup of developer, the cover attached and the film left to develop for twenty minutes. After development the film is removed for fixing.

Every step may be performed in daylight and the entire operation is so simple as to be readily understood by the absolute novice. The exact time necessary for development, in combination with the chemical formula, has been scientifically worked out, so that all differences of exposure within reasonable bounds are taken care of. Snap-shots and time exposures go into the tank at the same time and come out together, developed to their full values. With the Kodak Film Tank, the amateur can develop a number of rolls at once by means of duplicating outfits.

#### The Price

Brownie Kodak Film Tank, for use with No. 1, No. 2 and No. 2 Folding Pocket Brownie cartridges, complete . . . . .	\$2.50
Vest Pocket Kodak Film Tank, for Vest Pocket cartridges, complete . . . . .	2.50
3½-inch Kodak Film Tank, for use with all Kodak and Brownie cartridges having a film width of 3½ inches or less, complete . . . . .	5.00
5-inch Kodak Film Tank, for use with all Kodak and Brownie cartridges having a film width of 5 inches or less, complete . . . . .	6.00
7-inch Kodak Film Tank, for use with No. 5 Cartridge Kodak or shorter film cartridges, complete . . . . .	7.50
Duplicating Outfit, consisting of one solution cup, one transferring reel, and one apron, for Brownie Kodak Film Tank . . . . .	1.25
Ditto, for Vest Pocket Film Tank . . . . .	1.25
Ditto, for 3½-inch Kodak Film Tank . . . . .	2.50
Ditto, for 5-inch Kodak Film Tank . . . . .	3.00
Ditto, for 7-inch Kodak Film Tank . . . . .	3.75
Kodak Tank Developer Powders for Brownie Kodak Film Tank, per package, half dozen . . . . .	.15
Ditto for Vest Pocket Tank . . . . .	.15
Ditto, for 3½-inch tank, per package, half dozen . . . . .	.20
Ditto, for 5-inch tank, per package, half dozen . . . . .	.25
Ditto, for 7-inch tank, per package, half dozen . . . . .	.25
Kodak Acid Fixing Powder, per ¼-pound package . . . . .	.10
Ditto, per ½-pound package . . . . .	.15
Ditto, per 1-pound package . . . . .	.25

## No. 2 Brownie Developing Box

Offering the same assurance of perfectly developed film as the Kodak Film Tank, the Brownie Developing Box is a modified form of the same, so simple to use that any boy or girl can readily understand and operate it.

It consists of a metal box with cover, just long enough to accommodate a roll of No. 1 or No. 2 Brownie Film in one loop.

To develop, the roll of film is inserted in the spool carrier, and by means of a cord and winding shaft the film is unrolled and carried around a roller bearing, thus exposing the film to the action of the developer.

Before unrolling the film the developer is poured in the box and the cover put in place; all these operations being performed in daylight. The film is then unrolled by turning the crank, when the box is rocked on its standard for six minutes. The developer is then poured off and box filled with water to wash out developer, after which film is removed and fixed in daylight.

This is an excellent means, for those who have No. 1 or No. 2 Brownie Cameras, of developing their films without the need of skill or experience.

### The Price

No. 2 Brownie Developing Box . . . . .	\$1.00
Brownie Developing Box Powders, per package of 6 . . . . .	.15
Kodak Acid Fixing Powders, ½-pound package . . . . .	.15
Ditto, ¼-pound package . . . . .	.10

## Eastman Plate Tank

What the film tank has done for films, the plate tank does for plates. The idea of the two tanks is based upon the same time and temperature fact of development, with, of course, such differences in actual construction of the tanks as are required by the physical difference between films and plates. And as plates must be unloaded in a dark room, the plate tank cannot offer the advantage of daylight quite all the way, but it takes only a few moments in the dark room to load this tank, after which it may be brought out into any light for development.

The device consists of a metal solution cup with cover, a cage for holding 12 or less plates, and a loading block for loading the plates in the cage.

The exposed plates are loaded into the cage and placed in the tank, which has been filled with developer, in the dark room and the tank cover fastened in place. On the front of the tank is a dial for registering time. Development is allowed to continue for fifteen minutes, the tank being reversed several times. After development the developer is washed out of the plates, and the fixing bath poured into the tank, after which the plates are ready for washing in the usual manner.

### The Price

Eastman Plate Tank, for 4 x 5, 3¼ x 5½, and smaller plates, includes solution cup, plate cage, loading block and adjustable kit . . . . .	\$3.50
Ditto, 5 x 7, without kit . . . . .	4.50
Adjustable Kit, for 4 x 5 or 3¼ x 5½ tank, to take smaller plates . . . . .	.50
Separate Kits, for 5 x 7 tank, to take 3¼ x 5½, 4¼ x 6½ or 4¾ x 6½ plates, each . . . . .	.75
Metal Insert, for 5 x 7 tank, to take 4 x 5 plates . . . . .	.20
Eastman Plate Tank Developer Powders, for 4x5 tank, per package, ½ dozen . . . . .	.20
Ditto, for 5 x 7 tank, per package, ½ dozen . . . . .	.35
Kodak Acid Fixing Powder, per 1-pound package . . . . .	.25
Ditto, per ½ pound . . . . .	.15

## Kodak Portrait Attachment

There is no greater pleasure in photography than Home Portraiture, and this little attachment, fitted to a Kodak or Brownie camera, will enable one to work up close to the subject

Made with Kodak and Kodak Portrait Attachment

and thereby secure bust portraits of excellent quality. The attachments are simply extra lenses, which slip on in front of the regular lens, and they in no way affect the operation of the instrument, excepting to make the lens cut sharp at short distances.

With a small Kodak or a Brownie camera, good size head and shoulder pictures can be secured while with the larger Kodaks, one can

make bust pictures, limited in size only by the dimensions of the film.

These attachments are not only serviceable for portraiture, but also for photographing any small object, such as flowers, fruits, still life composition, at close range. Please order by number, or if required for older models or cameras with special equipments specify shutter and size of camera.

### The Price

No. 1. For No. 2 Brownie, No. 2 and No. 2A F.P. Brownie, Vest Pocket and No. 1 and No. 1A F. P. K. . . . .	\$0.50
No. 2. For No. 2A Brownie . . . . .	.50
No. 3. For No. 1A F. P. K., R. R. Type; No. 3 F. P. K., No. 3 Folding Brownie . . . . .	.50
No. 4. For No. 2 and No. 3 Bull's-Eye, No. 2 Flexo, No. 3 Brownie . . . . .	.50
No. 5. For Nos. 3A, 4 and 4A Folding Kodaks and No. 3A Folding Brownie . . . . .	.50
No. 6 For No. 3, 3 Special and 1A Special Kodaks . . . . .	\$0.50
No. 7 For No. 3A Special Kodaks . . . . .	.50

### Kodak Color Screens

These screens are of great value in outdoor photography, and for all subjects embracing colors which act weakly on the sensitive film, as they hold back the strong blue and violet rays, affording the weaker colors time to record. The Kodak Color Screens are mounted in the same manner as the Kodak Portrait Attachment.

#### The Price

No. 1. For Vest Pocket, Nos. 1 and 1A Folding Pocket Kodaks, Nos. 2 and 2A Folding Pocket Brownies . . . . .	\$0.50
No. 2. For No. 2A Brownie . . . . .	.50
No. 3. For Nos. 2 and 3 Folding Pocket Kodaks; No. 1A F. P. Kodak, R. R. Type; and No. 3 Folding Brownie . . . . .	.75
No. 4. For Nos. 2 and 3 Bull's-Eye, No. 2 Flexo and No. 3 Brownie . . . . .	.75
No. 5. For Nos. 3A, 4 and 4A Kodaks, No. 3A Folding Brownie . . . . .	1.00
No. 6. For Nos. 1A and 3 Special Kodaks . . . . .	.75
No. 7. For No. 3A Special Kodak . . . . .	1.00

### Kodak Wide Angle Lenses

These lenses have a speed of *f*. 16 and are interchangeable with the lenses furnished with the Nos. 3A and 4 Folding Pocket Kodaks, and the No. 4A Folding Kodak.

The wide angle Kodak lenses are rectilinear, carefully tested, and are absolutely high grade in every instance. With each one we furnish a leather case and a graduated focusing scale for attaching to the camera bed.

In ordering a Kodak wide angle lens, give size (No.) of Kodak and be sure to specify the shutter that the lens is to be used with.

#### The Price

No. 4. (4 x 5) Wide Angle Kodak Lens, equivalent focus, 4½ inches . . . . .	\$5.00
(Also adapted to 3A Kodak.)	
No. 5. (5 x 7) Wide Angle Kodak Lens, equivalent focus, 5½ inches . . . . .	7.50
(Also adapted to 4A Kodak.)	

## Anastigmat Lenses

The steadily increasing demand for anastigmat lenses among amateur photographers, the extraordinary sale of Kodaks like the Nos. 3 and 3A Special, is due to the fact that amateur photographers are beginning to realize the advantages and possibilities of the anastigmat as compared with the ordinary Rapid Rectilinear.

In an R. R. lens the opening, or working aperture, must not be larger than one-eighth the focal length of the lens. If it were made larger, each negative would be blurred and unsatisfactory. An opening of this size admits sufficient light on clear, bright days to produce well timed exposures even as fast as  $\frac{1}{100}$  of a second; but in dull lights, snap-shots are impossible, and at higher speed, hopelessly underexposed negatives are the results.

But with an anastigmat, the construction and optical corrections are such that satisfactory pictures can be made at an opening more than one-seventh the focal length of the lens; hence admitting more light in a given time than the R. R. For instance the Zeiss Kodak Anastigmat lens working at  $f. 6.3$  admits 60 per cent more light than an R. R. In combination with a focal plane shutter, exposures as short as  $\frac{1}{1000}$  of a second can be successfully made, while on dull days, and even indoors near a window, where with an R. R. lens little or no impression could be obtained, the anastigmat admits so much more light that slow snap-shots can be made.

### The Zeiss Kodak Anastigmat Lens, $f. 6.3$

From the above it will be obvious that the natural step for us was to provide an anastigmat lens peculiarly suited to Kodak requirements, and in the Zeiss Kodak Anastigmat, we offer a lens which is worthy in every respect of bearing the name Kodak — a lens that we can unqualifiedly recommend to the most critical photographer as perfectly suited to hand camera work.

It encompasses all the quality and dependability which the name Kodak implies, and it is apparent that we would not have given the name Kodak to any article unless we had absolutely assured ourselves from rigid tests and comparisons, that it would bear the name worthily.

# Anastigmat Lenses

## Special Lens and Shutter Equipments

The No. 1A, R. R. Type, No. 1A Special, No. 3 Special, No. 3A Special, No. 3, No. 3A and No. 4 Folding Pocket, No. 4A Folding Kodaks, No. 1A and No. 4A Speed Kodaks may be equipped as follows:

Style of Kodak	Fitted with Zeiss Kodak Anastigmat Lens, <i>f.</i> 6.3		Fitted with B. & L. Zeiss Tessar Lens Series II-B, <i>f.</i> 6.3		Fitted with Cooke Lens Series III-A, <i>f.</i> 6.5

Wherever, in the above list, any of the lenses are not listed with Kodak Automatic Shutter, it is because such lenses cannot be worked at their full advertised aperture with said shutters. Price of Speed Kodaks includes Focal Plane Shutter only.

# Developing and Printing Outfits

Eastman's A B C Developing and Printing Outfit includes every requisite for developing by the dark room method, printing and finishing twenty-four 4 x 5 or smaller pictures.

One Kodak Candle Lamp . . . . .	\$0.25
One 4 x 5 Printing Frame . . . . .	.25
One 4 x 5 Glass for Frame . . . . .	.05
One 4-ounce Graduate . . . . .	.15
One Stirring Rod . . . . .	.05
Four 4½ x 5½ Developing Trays . . . . .	.40
Five tubes Eastman's Special Developer . . . . .	.25
One-half pound Kodak Acid Fixing Powder . . . . .	.15
One package Potassium Bromide . . . . .	.05
Two dozen 4 x 5 Velox Paper . . . . .	.50
Two ounces Nepera Solution for developing Velox . . . . .	.10
Instruction Book . . . . .	.10

Price, complete, neatly packed, \$1.50 \$2.30

EASTMAN 3A OUTFIT, similar to above but providing for 3¼ x 5½ prints . . . . . \$1.50

EASTMAN'S BULL'S-EYE Developing and Printing Outfit, complete, for developing and printing 12 pictures 3½ x 3½. Similar to above outfit. Price, complete, neatly packed . . . . . 1.25

BROWNIE Developing and Printing Outfit, complete, for developing and printing 24 pictures 2¼ x 2¼. Price, complete . . . . . .90

*Note*— These outfits cannot be shipped by mail.

# The Kodak Box No. 2

The Kodak Box No. 2 contains everything for picture making by the daylight method. No dark room is necessary, and even the beginner can get good results by following the simple, explicit directions contained in the instruction book. This outfit is simple enough for boys and girls, while at the same time it will make pictures which will please the grown-up people.

## The Price

Price, complete, neatly packed, \$4.00

## Kodak Tripods

### Kodak Metal

Combining light weight and compactness with exceptional rigidity, this is an ideal tripod for cameras up to 5 x 7.

Has telescoping legs of brass tubing—lower ones nicked—the upper black enameled, and should a part become inoperative through wear or accident, any section may be removed for repairs. This is a unique feature among metal tripods. When extended each section catches and holds firmly. To close, it is necessary to press in top catch only, the others then releasing automatically.

The Nos. 1 and 2 have revolving heads for attaching to camera. With this construction the camera may be swung, so as to take in the desired view without moving the tripod, a distinct advantage over other types of metal tripods. The Nos. 1 and 2 also have straps for holding the legs in place when closed.

	Sections	Length		Weight	Price
		Closed	Extended		
Kodak Metal Tripod No. 0	3	15½ inches	39½ inches	15 ounces	\$1.60
Kodak Metal Tripod No. 1	4	15 inches	48½ inches	24½ ounces	2.50
Kodak Metal Tripod No. 2	5	13½ inches	49½ inches	25 ounces	3.25
Leather Carrying Case, either style					1.50

### Eastman Folding Head

For 4 x 5 cameras, or smaller

In the Eastman Folding Head Tripod the head itself folds, and the tripod then makes a compact, rectangular package. Length, folded, 17 inches; extended, 52½ inches. Weight, 25 ounces.

Eastman Folding Head Tripod . . . . \$3.50  
 Black Sole Leather Carrying Case . . . . 1.50

### The Eastman

Three sections. No. 1, maple, for cameras up to 6½ x 8½.

Price, \$1.70

# Kodak Tripods

## The Bull's-Eye

Two sections. Aluminum revolving head. Made of maple, with brass fittings. For 4 x 5 cameras, or smaller. Length, extended, 42½ inches; folded, 24 inches. The only two-section tripod that will go into a suit case.

Price, \$1.50

## The Standard

The feature of this tripod is the automatic locking of the sections when they are extended. Light, compact and rigid. Fixed, non-detachable head. Length, folded, 21 inches; extended, 53½ inches. Weight, 18 ounces. Cherry finish, brass trimmings.

Price, \$1.75

## The Flexo

Two sections. Fixed, non-detachable head. Only clear, straight-grained wood is used in its construction.

Price, \$0.90

## The Bullet

Two sections. Spruce, solid head. For small cameras.

Price, \$0.70

## Velox Paper

Velox is the very best paper for amateur use for it is simple to use, thoroughly dependable and is made in a variety of grades and surfaces to fit all sorts of amateur negatives.

It prints in any light, requires no dark room and permits the amateur to utilize his evening hours in print making. Its simplicity of manipulation and extreme gradation make it suitable for photographic work of every kind.

Velox is divided broadly into two kinds of paper called "Regular" and "Special" (slow and fast) each division containing a variety of surfaces. "Regular" papers develop quickly and are best suited for negatives lacking contrast. "Special" papers develop slowly, and give soft effects from hard negatives. Use "Special" Velox for negatives producing good results on "Printing Out" paper (such as Solio), and "Regular" only with very flat negatives.

Velox surfaces: In the "Regular" class are Carbon (matte surface), Glossy, Glossy double weight, Velvet, and Velvet double weight. "Regular" Velvet Velox is semi-gloss and gives prints of exceptional beauty. This paper will give satisfactory results from very flat negatives.

In the "Special" class, the surfaces are Carbon (matte surface), Portrait (smooth matte), Portrait double weight, Rough, Rough double weight, Glossy, Glossy double weight, Velvet, and Velvet double weight.

"Special" Velvet Velox has a greater range than any of the other "Special" papers.

Royal Velox is coated on a soft, mellow-tinted stock, which when re-developed affords all the soft delicacy of a rare old etching. It is made in two grades, "Regular" and "Special" and one surface, just rough enough to produce the desired effect.

Ditto, ¼ pound . . . . .	.10
Velox Amateur Printer No. 1 (with gas pillar; adapted for electric socket) . . . . .	2.00
Electric Attachment (extra). Comprising socket, plug and 6-foot cord . . . . .	.75

## Kodak Velvet Green

Effects heretofore to be had only by the laborious carbon process can now be secured by any amateur photographer with this new paper.

For landscapes, for marines, and in fact, for the majority of outdoor amateur negatives, the rich green of prints on Kodak Velvet Green produces most beautiful harmonious effects, with an indescribable "atmosphere" of nature itself.

And to use this paper the amateur has to learn no new processes nor possess extraordinary skill. Anyone who can print on Velox paper can print just as successfully on Kodak Velvet Green, as the two processes after exposure are identical, and the developing solution is only slightly changed.

The surface — a smooth semi-matte — brings out detail fully, and the paper is supplied in both single and double weights.

Kodak Velvet Green Post-cards are very appropriate for use at vacation time.

Prices same as for Velox. (See page 53.)

## Angelo Platinum Paper

Angelo Platinum Paper is exceedingly simple to handle and yields prints that are marvelous in gradation and delicacy. Made in Sepia only.

Angelo Sepia, unlike most Sepia Platinum Papers, develops in a cold solution. Angelo Platinum Paper is furnished in two grades, "Smooth" and "Rough".

Size	Price per Doz.	Size	Price per Doz.
3½ x 3½ . . . . .	\$0.25	3½ x 5½ . . . . .	\$0.40
3½ x 4¼ . . . . .	.25	4¼ x 6½ . . . . .	.55
4 x 5 . . . . .	.40	5 x 7 . . . . .	.65

### ANGELO SOLUTION

Angelo Sepia Solution (2-ounce bottle) . \$0.30	Angelo Sepia Salts (2-ounce package) . \$0.10
---	---

## Aristo Gold Post-cards

Rich sepia and purple tones. Print, wash and fix.

Aristo Gold Post-cards, per dozen . . . . .	\$0.30
---	--------

## Eastman Etching Black Platinum

A black and white platinum, with a soft pleasing warmth, found in no other platinum paper—decidedly away from the ordinary cold blue black. Perfectly simple cold development. Two surfaces, smooth and rough.

Size	Price per Doz.	Size	Price per Doz.
3½ x 3½	\$0.35	5 x 7	\$0.90
3¼ x 4¼	.35	Eastman E. B. Developer, ½-pound package	.35
4 x 5	.55	Eastman E. B. Developer, ¼-pound package	.20
3¼ x 5½	.55		
4¼ x 6½	.75		

## Eastman Etching Sepia Platinum

A new hot bath paper of unusual brilliancy, combined with extreme richness of tone and coated on a mellow buff stock. Made in both smooth and rough surfaces. Prices for paper and developer, same as for Etching Black above.

## Solio Paper

A rapid, glossy printing-out paper.

Size	Per Package, 2 Doz.	Size	Per Package, 2 Doz.
2½ x 2½	\$0.20	2¼ x 7 (No. 1 Panoram Kodak)	\$0.25
2¼ x 3¼	.20		Per Doz.

3¼ x 4¼	.16	.15	5 x 7	.35	.30
4 x 5	.20	.20	3½ x 12	.40	.35

Post-cards, 1 dozen, 15 cents. Brownie Post-cards, 2¼ x 4¼, 1 dozen, 10 cents.

## Eastman Permanent Bromide Papers

For enlargements. Grades: Velvet, Royal, Standard, Platino, Enameled and Matte-enamel.

Size	Per Doz.	Size	Per Doz.	Size	Per Doz.
5 x 7	\$0.35	8 x 10	\$0.80	14 x 17	\$2.40
5 x 8	.40	10 x 12	1.20	16 x 20	3.20
6½ x 8½	.60	11 x 14	1.60	18 x 22	4.00

Other sizes in proportion.

## The Universal Album

(Patent Applied For)

Made on a new principle, which does away with mounting prints by paste or otherwise. They are merely slipped into pocket strips at top and bottom, and will not come out unless removed by hand. Handsome grain leather cover and black leaves with linen finish.

A, 2½ x 3¼, 25 leaves, 3 on . . . . . \$2.25	E, 3¼ x 5½, 50 leaves, 3 on . . . . . \$3.50
B, 2½ x 4¼, 25 leaves, 3 on . . . . . 2.50	F, 4 x 5, 25 leaves, 2 on . . . . . 2.60
C, 3¼ x 4¼, 25 leaves, 3 on . . . . . 2.50	G, 4¼ x 6½, 25 leaves, 2 on . . . . . 2.75
D, 3¼ x 5½, 25 leaves, 3 on . . . . . 2.75	H, 5 x 7, 25 leaves, 2 on . . . . . 3.00

## The Interchange Album

An unusually long-lived album on the loose leaf principle. Has special embossed leather cover with grain leather corners and back. Furnished with 50 linen finish leaves—black only.

A, 5 x 8 . . . \$2.50	B, 7 x 11 . . . \$3.00	C, 10 x 12 . . . \$4.25	D, 11 x 14 . . . \$5.00
-----------------------	------------------------	-------------------------	-------------------------

## The De Luxe Album

A very rich album with heavy grey padded cover of walrus grain leather, and 50 grey leaves with silver edges; or brown padded cover, as above, with 50 brown leaves with gold edges.

11 Grey, 5½ x 7¾ . . . . . \$2.25	15 Grey, 11 x 14 . . . . . \$5.00
12 Brown, 5½ x 7¾ . . . . . 2.25	16 Brown, 11 x 14 . . . . . 5.00
13 Grey, 7 x 10 . . . . . 3.00	17 Grey, 11 x 14, for 200 Post-cards . . . 5.00
14 Brown, 7 x 10 . . . . . 3.00	18 Brown, 11 x 14, for 200 Post-cards . . . 5.00

## The Tribune Album

Heavy leather embossed Baby Walrus. Black or grey leaves, linen finish, 50 leaves

A 1, 50 Grey leaves; A 2, 50 Black leaves, 5 x 8 . . . . . \$1.35
B 1, 50 Grey leaves; B 2, 50 Black leaves, 7 x 11 . . . . . 1.90
C 1, 50 Grey leaves; C 2, 50 Black leaves, 10 x 12 . . . . . 3.25
D 1, 50 Grey leaves; D 2, 50 Black leaves, 11 x 14 . . . . . 4.00

## The Stadium Album

Padded black grain leather cover.

H 1, 50 Grey leaves; H 2, 50 Black leaves, 5 x 8 . . . . . \$1.25
J 1, 50 Grey leaves; J 2, 50 Black leaves, 5½ x 7 . . . . . 1.25
R 1, 50 Grey leaves; R 2, 50 Black leaves, 7 x 11 . . . . . 1.90
L 1, 50 Grey leaves; L 2, 50 Black leaves, 10 x 7 . . . . . 1.90
M 1, 50 Grey leaves; M 2, 50 Black leaves, 11 x 14 . . . . . 3.75

## The Arena Album

Flexible, finest quality black grain leather cover.

J, 50 Black leaves, or S, 50 Sepia leaves, 5½ x 7 . . . . . \$1.00

Compliments of the Digitized Kodak Catalog Project: 1886 - 1941

## Flash-Light Material

The simplest and safest method of making flash-light pictures is by means of the Eastman Flash Sheets and Eastman Flash Sheet Holder. The sheets burn slowly, giving a broad, soft light, and not startling the subject so as to give a staring effect to the eyes.

The holder is a genuine innovation. A spring finger holds the sheet in proper position and it is lighted from the back through an aperture provided for the purpose. In this manner the holder is always between the operator and the flash sheet, and it may be held in the hand or supported on a tripod, a socket being provided for the latter purpose.

Flash cartridges are recommended only where absolutely instantaneous exposures are required.

No. 1 Flash Sheets, per package of 1/2 dozen sheets, 3 x 4 . . . . .	\$0.25
No. 2 Flash Sheets, per package of 1/2 dozen sheets, 4 x 5 . . . . .	.40
No. 3 Flash Sheets, per package of 1/2 dozen sheets, 5 x 7 . . . . .	.60
Eastman Flash Sheet Holder . . . . .	1.00
Eastman Spreader Flash Cartridges, for use with pistol or fuse (price includes both fuse and cap), per package of 1/2 dozen . . . . .	.25
Eastman Spreader Flash Cartridge pistol . . . . .	.50
Eastman No. 1 Flash Cartridges, per package of 1/2 dozen . . . . .	.60
Ditto, No. 2 . . . . .	.40
Ditto, No. 3 . . . . .	.25

## Dark Room Lamps

The Kodak Candle Lamp. This lamp is well made, collapsible, of special tested ruby fabric, bound in metal frames.

No. 2 Kodak Dark Room Lamp. Oil burning, fitted with both orange and ruby glass.

Kodak Candle Lamp . . . . .	\$0.25
Extra Candles for same, per dozen . . . . .	.30
No. 2 Kodak Dark Room Lamp . . . . .	1.00

## Glass Dry Plates

Size	Seed	Per Doz.	Size	Seed Non-Halation Ortho	Per Doz.
3 1/2 x 3 1/2 . . . . .		\$0.40	3 1/4 x 4 1/4 . . . . .		\$0.55

5 x 7 . . . . .		1.10	Cover Glass for Lantern Slides . . . . .		.25
Lantern Slide Plates . . . . .		.45			

Lantern Slide Binders, per package, 50 strips . . . . . \$0.10

## Folding Pocket Kodak Tripod Adapter No. 1

A simple and effective device for holding either the No. 1 or No. 1A Folding Pocket Kodak on a tripod in either horizontal or vertical position. Kodak may be reversed without removing from the adapter.

F. P. K. Tripod Adapter No. 1 . . . . . \$0.75

## Eastman Tripod Brace

Out of doors, or indoors when the R. O. C. Tripod Truck is not used, this is an excellent attachment for holding tripod legs in position. Made entirely of metal, it can be instantly attached, and even when tripod is lifted the legs cannot collapse or change their position.

Eastman Tripod Brace . . . . . \$1.00

## R. O. C. Tripod Truck

For flash-light work, home portraiture, in fact, any branch of indoor photography, this truck is a very great convenience. It holds the tripod legs firmly in place and there is no danger of slipping nor of tripod spikes marring floors or rugs. Can be easily moved on its castors to any part of room, and folds up compactly when not in use.

R. O. C. Tripod Truck No. 1 . . . . . \$1.00

## Velox Transparent Water Color Stamps

These colors are the simplest of all to use, working especially well with Velox. Prepared in twelve shades, in the form of paper leaves, divided by perforations into small sections of proper size for use and the leaves bound into neat booklets, each color being preceded by a descriptive page.

Velox Transparent Water Color Stamps, complete booklet, 12 colors . . .	\$0.25
Separate color leaves, two sheets . . . . .	.05
Set of 3 special brushes, per set . . . . .	.50

## Kodak Chemicals

Perfect results cannot be uniformly obtained without the use of pure chemicals. Our chemicals are all carefully tested. We cannot afford to sell impure chemicals; you can afford to buy only the purest chemicals.
