

New...compact movie-8 from Nikon

NIKKOREX-8 ZOOM

*Nikkor-Zoom
from 8 to 32mm
battery-driven motor
through-the-lens
viewing and focusing
fully automatic
electric eye*

Small enough to fit pocket or purse, the new Nikkorex-8 Zoom is the perfect family camera. Has no spring to wind—no exposure to set. Takes perfect movies by simply pressing the button. f1.8 Nikkor-Zoom lens works internally—never projects beyond front of camera. Zoom range is from 8mm wide angle to 32mm 4X telephoto.

Nikkor-Zoom lens focuses from infinity to as close as 36" without special attachments. Reflex finder with split-prism rangefinder permits precise through-the-lens focusing and viewing while filming. Finder eyepiece is adjustable.

Camera motor operates on 4 penlite batteries—runs for as long as finger is on the button. Button may be locked for continuous run or set for single-frame shots. Cadmium-sulphide electric eye automatically sets lens for correct exposure with films ASA 5 to 400. Light monitor needle visible in finder, warns if light is insufficient. Built-in tester shows condition of motor and electric eye batteries.

Other features include drop-in roll loading, auto reset footage counter. Accessories include remote control, filters, batteries and case.
