the only movie-8 with built-in Nikkor zoom optics*

NIKKOREX 8 ZOOM

It is amazing how many features and conveniences have been designed into so slim, compact and lightweight a camera. The Nikkorex 8 Zoom combines automatic, pushbutton simplicity with performance that bears the unmistakable mark of Nikon quality.

In equipping the Nikkorex 8 Zoom with Nikkor-Zoom lens, Nikon has set a new standard for home movie picture quality. You get 8mm color movies so sharp you'd think they were taken with 16mm. Furthermore, this lens operates internally—gives you 4-time zoom from 8mm wide angle to 32mm telephoto without projecting from the camera.

You see the effect in the reflex finder exactly as the lens 'sees' it. And there's a split-image rangefinder to help you get critically sharp focus which stays sharp over the entire zoom range.

The automatic electric eye assures you of perfect exposure, indoors and out. Finder indicator warns you when not to shoot. And there's no spring to wind. Camera runs on 4 penlite batteries.

In addition, there are accessories for special filming: an attachment for shooting close-ups to 19 inches, a remote control for operating the camera from a distance, pistol grip, filters, others.

NIKKOREX 8 ZOOM
