11 SOUTH DES PLAINES STREET, CHICAGO 6, ILLINOIS

DESIGNERS AND BUILDERS OF PRECISION CAMERAS AND STANDS FOR CORRECTIVE PHOTOGRAPHY

DEARDORFF HANDI-STAND

CONSTRUCTION

The Base is made of Cast Iron and is supplied with three rubber tired casters which may be individually locked.

1-piece Steel pipe fitted with vibration dampener ring—stops all sway at any elevation.

SPECIFICATIONS

Made in 3 heights.

6 foot—8 foot—10 foot

Weight:

6 foot—8 foot—10 foot
45# 48# 51#

Floor space required:

28" x 28"

FEATURES

Light weight.

Easily moved and quickly locked.

The adjustable Arm is made of aluminum and is fitted with a felt sleeve which permits it to be quickly moved up or down without bind, and rotated completely around the Pipe. The locking pressure is automatically applied once the camera is in proper position and a binding screw assures no further movement. Because of its unique design and construction counterbalance is not required.

The circular table is made of wood fitted with the tripod screw. Its movements allow the camera to look straight down or up — tilt horizontally left or right and to be adjusted from the top of the Pipe to the Base easily and quickly. No additional parts are necessary. The stand is complete in itself.

Subjects may be placed closer to the camera since the stand requires much less floor space; 28" x 28", than conventional three legged center post stands.

A quickly attached work table can be supplied for Macro and Copy photography making this stand a most desirable piece of equipment.

Lighting equipment can easily be attached to the Up-right Pipe permitting proper lighting without trouble.
