

Nikon **COMPARTMENT CASES**

NIPPON KOGAKU K.K.

COMPARTMENT CASES

High quality products require high quality accommodating cases for protecting them against hard knocks of travelling. This is why Nikon compartment cases have been specially designed for holding Nikon camera (s), Nikkor lenses and a selective range of their accessories.

Six models of Nikon compartment cases; FB5, FB6, FB7, FB8, FB9 and a Foam-Rubber type, are available. This wide variety to choose from gives the photographer the freedom of selecting a proper one for his need. At the same time, each model sufficiently allows making most of the Nikon system versatility and facilitates progressive photographing activities. The accommodation list shown in the back part of this brochure acts as a guide in making your selection.

Compartment Case Model FB5

Bayonet lens mounts, one camera and four lenses up to 300 mm

Made of brown cowhide this case holds one camera and four lenses with focal lengths of 300mm or less (except 50-300 mm Zoom, 85-250 mm Zoom and Fisheyes), plus accessories.

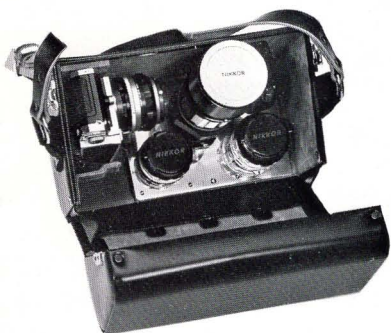

Three lenses are securely bayonetted to the lens mounts on the baseplate, and can be easily and quickly removed with one hand, while the fourth is attached to the camera which is fitted to the holder recess on the inner side of the case. The pocket inside the case lid holds four filters, and two outside pockets provide additional space for sundries. The tilt-away front cover allows easy access to the contents. This is the case for those who require quick lens changes.

Compartment Case Model FB7

For two motorized cameras and three lenses up to 200 mm

This brown cowhide case holds two cameras with F36 Motor Drive Backs—one with the Cordless Battery Power Pack and a lens with focal length of 135 mm or less. An additional two lenses with focal lengths of 200 mm or less (except 20/3.5 and Fisheyes) and eight spare batteries can be stored in other compartments. A roomy outside pocket is provided for sundries, and an accessory pouch stores six filters. Designed exclusively for Motor Drive users.

Compartment Case Model FB6

Space for two cameras and four lenses up to 200 mm

Two cameras with normal or wideangle lenses (except 35/2.8PC) can be fitted to the holders on the inner sides of this brown cowhide case, and two additional lenses with focal lengths of 200 mm or less (except 20/3.5) can be stored in compartments. The roomy outside pocket can hold various sundries. An accessory pouch safely accommodates six filters. The space below the cameras may be used to contain the filter pouch and small accessories. This case is ideal in situations requiring quick camera changes.

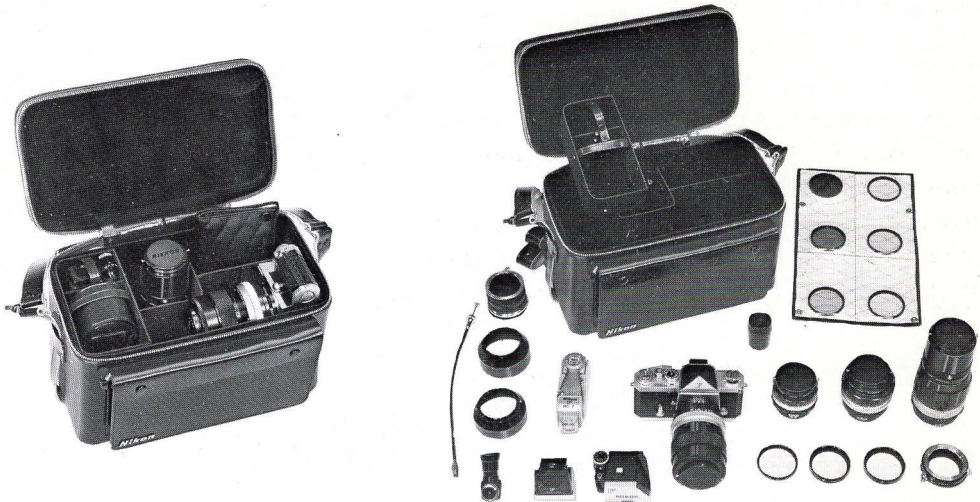

Compartment Case Model FB8

Bayonet lens mounts, two cameras and four (or five) lenses up to 300 mm

Made of fine black leatherette (Clarino), this case holds two cameras and four or five lenses with focal lengths of 300mm or less (except 85-200mm Zoom and 50-300mm Zoom), depending on the combination of lenses stored.

Three lenses can be bayonetted to the lens mounts on the baseplate and quickly removed with one hand, while the others remain attached to the cameras which are fitted to holders on the inner sides of the case.

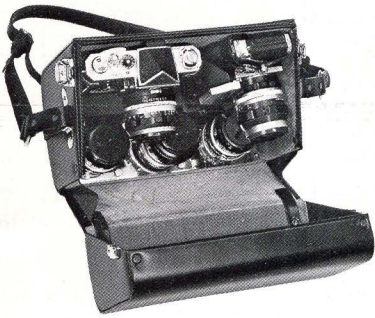

Four filters can be carried in an inside pocket, and there is a roomy outside pocket for sundries. The tilt-away front cover allows easy access to the contents. The leatherette surface is easily cleaned with a soft cloth. Suited for situations requiring quick lens or camera changes.

Foam-Rubber Compartment Case Model 2

Slim type, foam rubber pockets for secure storage, one camera and four lenses up to 200 mm

This case, made of black, scuff-resisting leatherette (Texon), holds one camera with a lens of focal length 55mm or less, while three other lenses of 200mm or less, Flash Unit BC-7, six filters, Extension Ring E2, a hood for wideangle lens and a roll of film properly fit in their own foam rubber pockets. The foam rubber provides superior protection for the contents.

Compartment Case Model FB9

Standard multi-partitioned case, one camera and four lenses up to 200 mm

One camera with a lens of focal length 200 mm or less and three other lenses of 200 mm or less can be stored in this compartment case.

The intermediate lid provides additional space for sundries, and an accessory pouch will hold six filters. Contents can be safely stored in individual compartments which permit easy access.

COMPARTMENT CASES

Designation	Dimensions (longxwide x high) Weight	For
