

SEKONIC

ALL WEATHER METER model L-158WH

Now you can make your exposure meter water-proof
in our new water-tight capsule!

SEKONIC ALL WEATHER METER

model L-158WH

Now you can have complete confidence during underwater photography or shooting in poor weather conditions.

Contained in the water-tight capsule is a reflected light exposure meter which can be kept inside or taken out, just as you require.

All you have to do to take out the built-in exposure meter is to remove the screw-in capsule cap. You can then use the exposure meter on land as you would ordinarily.

The water-proof design of the capsule makes it usable at depths of up to 60 meters.

Besides underwater photography, the all-weather design of this unit allows use in the rain or snow.

Easy readout under water with easy operation.

Operation is a matter only of pointing the light sensor at the subject, rotating the knob and aligning the guide mark with the pointer. The single-range measurement obviates the need for high/low switching.

This underwater housing can also be used with the L-188 Sekonic Auto Reader with additional attachment.

TECHNICAL DATA

Measuring system:	Reflected light system
Measuring range:	EV7 to EV17 at ASA100
Operating temperature:	0°C to +40°
Max. measuring depth:	60 meters (200 feet)
Acceptance angle:	65°
Film speeds:	ASA 6 to 12,000, 9 to 42 DIN
Apertures:	f/1 to f/64
Shutter speeds:	1/2,000 sec. to 8 sec.
Size:	87 mm dia. x 100 mm (3-3/8" dia. x 4")
Weight:	204 g (7 ozs.)

Complete with a grease tube, spare O-ring and strap.
