FOR ALL GRAPHIC & GRAFLEX CAMERAS

and for 3¼ x 4¼, 4 x 5 CAMERAS

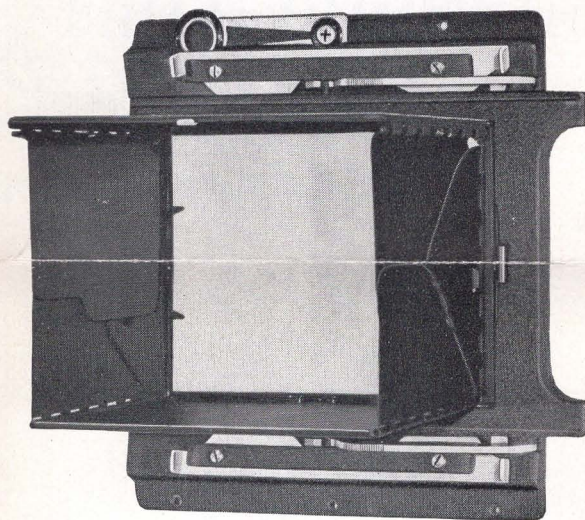

120 Roll Film Holders in two models, Graphic and Graflex and two film sizes for 8—2¼ x 3¼ ("23") or 12—2¼ x 2¼ ("22") square pictures per roll. Use the economical 120 color or black and white roll film in your present Graphic or Graflex camera. Interchangeable with other film attachments. Cameras with Graflex and Graflok back accept roll holders without modification. For cameras fitted with Graphic backs read the following about Graflok backs and Spring Kits.

Catalog numbers for Roll Holders on back of folder.

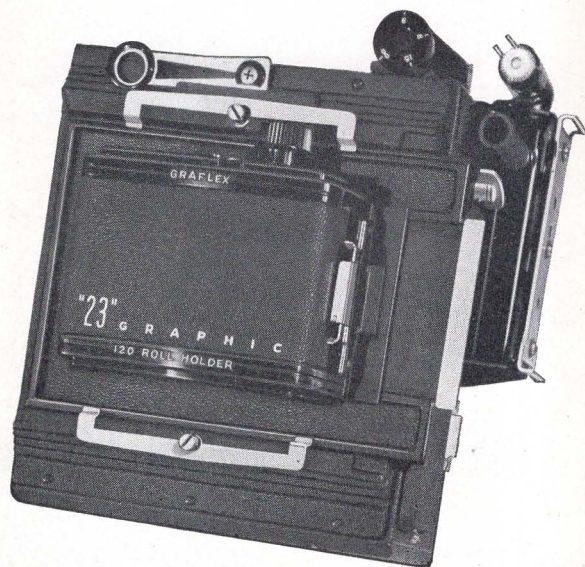

A GRAFLOK BACK FOR YOUR *present* CAMERA

Graflok backs are now standard equipment on all Graphic cameras and can be fitted to many earlier model Graphic cameras not so equipped. The features of the Graphic and Graflex backs have been combined to make Graflok the most versatile camera back. The spring loaded focusing panel frame which accepts all Graphic sheet film holders and film pack adapters is instantly removeable to permit the attachment of the roll film holder using the Graflok slide locks. The Graflok back is obtainable with four sided all-metal folding, removeable, focusing hood.

See back page for catalog number of Graflok back for your camera.

New Speed! Greater film economy! The right film for every job! A precision made Graflex product!

ECONOMICAL SPRING KIT

Cameras with Graphic backs can be modified to accept Roll Film Holder by means of a Spring Kit which replaces the focusing panel and holds the roll film holder firmly in place.

See catalog numbers on back page for correct Spring Kit to fit your camera.

Spring Kits are available in two models—one to fit the 2¼x3¼ cameras and the other to fit the larger 3¼x4¼ and 4x5 cameras.

FOR ALL GRAPHIC & GRAFLEX CAMERAS
