

Linhof color

Now in $2\frac{1}{4} \times 3\frac{1}{4}$ in. (6,5x9 cm)

The Linhof Color 4x5 in. (9x12 cm.) has made many friends and is now also available in the $2\frac{1}{4} \times 3\frac{1}{4}$ in. (6,5x9 cm.) format. The Linhof Color $2\frac{1}{4} \times 3\frac{1}{4}$ in. is constructionally very similar to the Linhof Color 4x5 in. and offers the same advantages:

- Full exploitation of the economical 'medium format' by the extensive adjustments of a camera constructed on the optical bench principle.
- Use of already available darkroom equipment.
- Adaptability of lenses of the Super Technika $2\frac{1}{4} \times 3\frac{1}{4}$ in. (6,5x9 cm.) and 4x5 in. (9x12 cm.) and all accessories of the Super Technika $2\frac{1}{4} \times 3\frac{1}{4}$ in. The Linhof Color $2\frac{1}{4} \times 3\frac{1}{4}$ in. (6,5x9 cm.) is therefore the ideal second camera.
- Lenses of focal lengths ranging from 47 mm. (1 $\frac{7}{8}$ in.) to 300 mm. (14 in.) can be employed; no wide angle focusing device is necessary.
- Quick change camera back provides for speedy interchange of sensitive material, from single exposure to roll film and from black and white to colour and vice versa.
- Frame finder and focusing hood are available as special accessories.

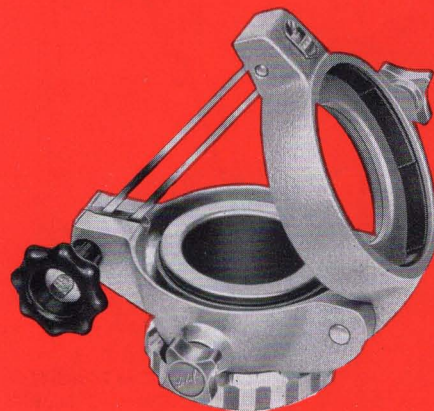

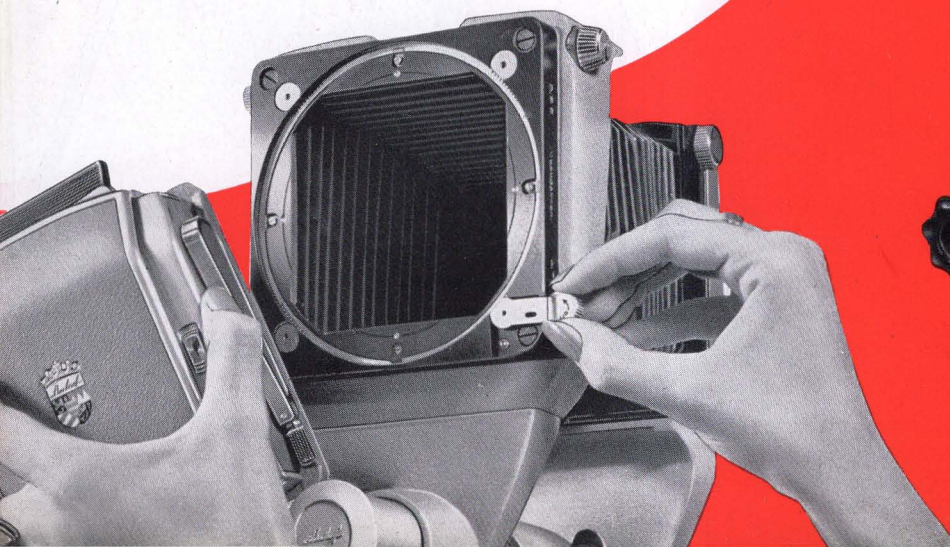

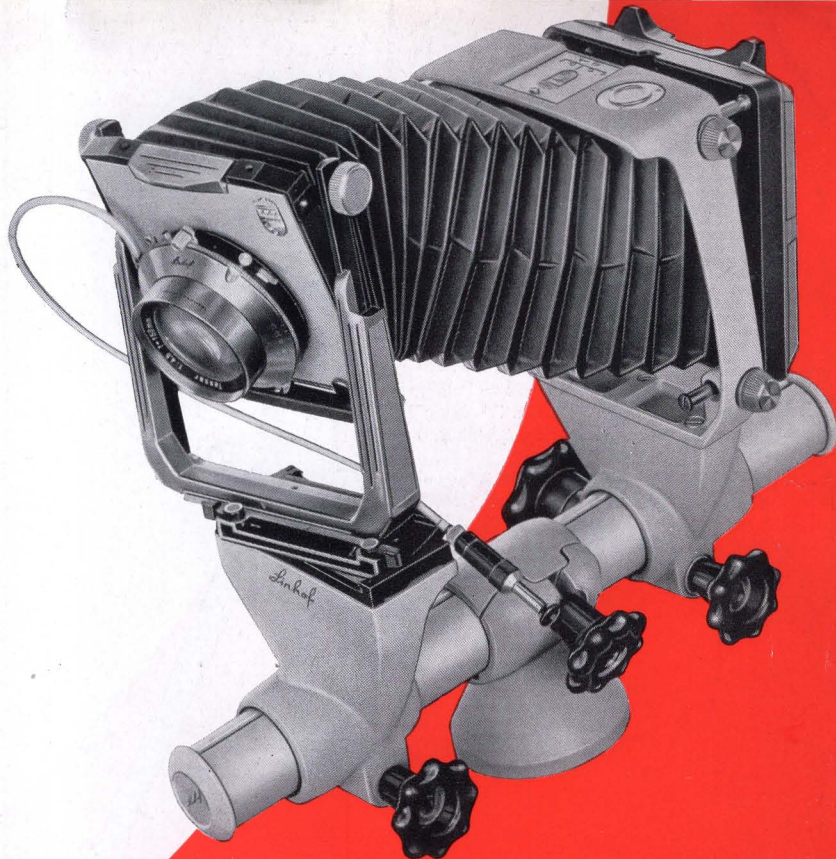

Technical Data:

Length: 13 $\frac{3}{4}$ in. ; Height: 10 $\frac{1}{4}$ in. ; Width: 10 in.

Weight: 5 lbs. 9 ozs.

Back tilt: 10°; Lens standard swing 15°

Rise of lens standard : 2 $\frac{1}{8}$ in.; Lateral shift : 1 in.

The Panorama-Tilt Mount

is specially well suited as a tripod head in combination with the Linhof Color. Maximum angle of tilt : 90°, swing 360°. The smooth movements of the mount can be controlled separately.

Linhof
