CORONET

Midget

THE TOM THUMB OF CAMERAS

● The Coronet Midget is a very real photographic instrument, which uniquely combines the most extreme compactness with a truly astonishing precision. It may be carried in the vest pocket or the smallest purse and as it weighs only 1¾ oz., it is a constant and unobtrusive companion, always ready to capture the unexpected scene or subject that suddenly confronts you. Whether in town or country, on business or pleasure bent, you are always prepared to snap anything that interests you—amusing incidents, pets or informal photographs of friends.

● The Coronet Midget may be compared to one of those minute precision watches wherein every essential part is reproduced in miniature and which,

to the constant wonder of its possessor, keeps time consistently. Truly a triumph of the camera maker's art, the Coronet Midget is equipped with every refinement necessary to the making of good pictures, including a clear, luminous optical viewfinder which sights the object immediately, a lens with an f/10 aperture, a shutter speed of 1/30 second, a Coronet one-way shutter and a safety catch which prevents double exposure. Loading and unloading are accomplished in full daylight.

● With the Coronet Midget, Candid Photography assumes a larger reality. It enables you to make pictures unobtrusively and unobserved and as you snap this celebrity or that personage, you do so without creating the slightest inkling of your purpose.

MAKES PERFECT ENLARGEMENTS
IN ANY SIZE UP TO
5 X 7 INCHES

Sharp DEFINITION!

● The sharp definition and fine optical corrections of its Taylor Hobson lens afford negatives which may be enlarged to at least 5x7" without loss of detail or tone and with all the clarity and finish of a contact print. The lens is automatically set so that it will provide correct focus for any distance from 5 ft. to infinity. There is no distance scale to manipulate—there are no unnecessary and complicating gadgets to interfere with the quick and precise action of this truly marvelous and ingenious little camera.

● The Coronet Midget is of staunch and handsome bakelite construction and can be furnished in Rose, Green, Walnut and Black. Moderately priced at \$2.50

\$ 2.50
