DIGI MASTER model L-718

SEKONIC DIGI MASTER model L-718

intelligent measuring tool for smart pros

DIGI MASTER incorporates

- seven different functional modes; wired and wireless measurements for flash light, wired and wireless cumulative flash measurements, T-priority, F-priority and EV measurements for ambient light
- memory display function for measured 2 f-stop values
- running-lock function for continuous reading (ambient light)
- display illumination by electro luminescence
- rubber-covered body for preventing the meter from slipping out of your fingers

Specifications

Measuring system:

Incident and reflected light type for both flash and ambient light

Measuring range:

f/1.4~f/90+0.9AV / ISO 100 (for flash light)
EV (-) 1~EV19.9 / ISO 100 (for ambient light measurement)

Repeat metering accuracy:

±0.1EV

Calibration constants:

C=340 K=12.5 (for Lumidisc: C=250)

Light receiving part

Sensor: Silicon Photodiode

Swivel head: 270° horizontally and 90° upward rotatable

Attachments: Lumisphere and Lumidisc for incident light, Reflected light filter (acceptance angle 54°) and Viewfinder 5° (sold separately)

Display

Measuring mode: Wired and wireless measurements for flash light, wired and wireless cumulative flash measurements, ambient light measurement, cine scale and EV measurement

Film speed: ISO 3~8000 at 1/3 SV unit

Shutter speed:

1 sec. ~ 1/500 sec. for flash light
30 min. ~ 1/8000 sec. for ambient light
cine scale: 8, 16, 18, 24, 32, 64 and 128 fps.

f/stop: 1.4~90+0.9AV for flash light
1.0~90+0.9AV for ambient light

EV scale: (-)6~25.9

Other display: E.u. (under-exposure), E.o. (over-exposure) and battery check

Display illumination: Electro Luminescence "ECLAT" manufactured by Elix Co., Ltd., subsidiary of Sekonic

Power source:

2 x AA pen light battery (1.5V x 2)

Standard accessories:

Lumisphere, Lumidisc, Reflected light filter, neck strap, 2 batteries and case

Dimensions and weight:

157 x 68 x 28mm
about 190 grams (excl. batteries)
