

WISTA45-RF

The Professional Photographer's Advantage

WISTA45-RF

FEATURES:

The Wista 45-Range Finder is the most sophisticated camera in the Wista line. Since it's introduction to the world market it has grown in reputation. This camera's portability, ease of handling and precision movements have convinced many that it is the best available in the world today.

The unique design of the 45-RF allows the precise movement necessary for photography of the highest technical quality and the abundant variable movements required by field work. The 45-RF utilizes a two axis system that will allow the fully revolving back to swing and tilt simultaneously.

This camera features a three extension rail system that when fully extended will accommodate lenses up to 300mm. By interchanging the bellows and adding extension rails, the 45-RF can be modified to accept wide angle lenses and lenses up to 600mm in focal length. The range-finder is cammed to accommodate 135mm, 150mm, and 180mm lenses simply by turning a knob and flipping an infinity stop. Simple adjustments allow the use of lenses larger than 180mm and shorter than 135mm.

The Wista 45-RF is a uniquely designed, expertly crafted professional's tool which will meet the demands of both field and studio work.

SPECIFICATIONS

FORMATS:

- 4x5 in. International Standard
- 6x9 Rollfilm (optional)

BODY:

- Light die-cast alloy

BELLOWS:

- Leather bellows standard
- Leather bag bellows
- Leather extension bellows

IMAGE SIZE:

- 98x120 cm

FILM:

- Sheet film
- Polaroid pack film

LENS MOUNT:

- Linhof-type/accepts WISTA or Linhof boards

BED SECTION:

- When opened the camera bed will automatically lock at 90 degrees
- Triple extension frame; minimum extension 66mm standard maximum extension 300mm, 600mm with extension bed and bellows
