# Pictures— full of life & beauty

The wonderful quality of the famous Anti-Screen emulsion gives your camera the power to produce joyous pictures full of life and beauty.

Wellington Anti-Screen Plates, Roll Films and Film Packs possess just the right speed for hand-camera work, they are colour sensitive and give a more faithful reproduction of the beautiful and varied tints of nature than do ordinary plates and films.

## JUNIOR BOX ENSIGN

FOR ROLL-FILMS  $2\frac{1}{4}$ B  $2\frac{1}{4}'' \times 3\frac{1}{4}''$  —  $6 \times 9$  cm.

**A** THOROUGHLY well made, reliable camera of simplest possible design, with which anyone can make first-class pictures. The loading is particularly simple, being direct from spool to spool. It has two view-finders for upright and landscape views, and Time and Instantaneous movement to the shutter. The body is covered in best quality morocco grained leathercloth and fitted with solid leather handle. The lens is a rapid meniscus of good quality, giving excellent definition and covering power.

Tripod attachment .. .. .	1/6

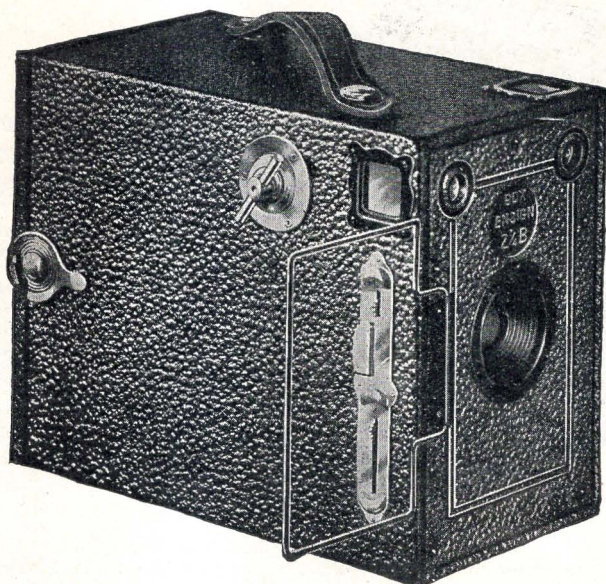

## BOX ENSIGN

FOR ROLL FILMS  $2\frac{1}{4}$ B— $2\frac{1}{4}$ "  $\times$   $3\frac{1}{4}$ " and  $2\frac{1}{2}$ — $2\frac{1}{2}$ "  $\times$   $4\frac{1}{4}$ "

**T**HE finest value in Box-form Roll Film Cameras. Simple in operation and certain in results. Made in two sizes—

Portrait Attachment.

No.  $2\frac{1}{4}$ B giving  $2\frac{1}{4} \times 3\frac{1}{4}$  in. ( $6 \times 9$  cm.) and No.  $2\frac{1}{2}$  giving pictures  $2\frac{1}{2} \times 4\frac{1}{4}$  in. ( $6.5 \times 11$  cm.). Exceptionally well designed and of attractive appearance, these cameras are fitted with the direct-vision wire view-finder which very greatly simplifies accurate picture making. Solidly constructed body covered with black or brown leatherette, first-class special rapid meniscus lens, fixed focus, nickel-plated and black fittings, silent winder, easy loading, reflex and direct view finders, three diaphragm stops. Everset Time and Instantaneous shutter, leather handle. Instruction book.

# DUO-ENSIGN

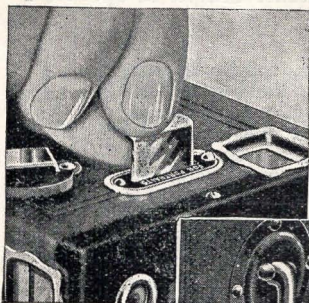

FOR ROLL FILMS  $2\frac{1}{4}$ B— $2\frac{1}{4}$ "  $\times$   $3\frac{1}{4}$ " AND  $2\frac{1}{2}$ — $2\frac{1}{2}$ "  $\times$   $4\frac{1}{4}$ "

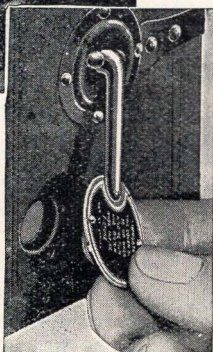

FOR PORTRAITS  
AT 3 FEET AND  
GROUPS, VIEWS,  
ETC., AT ANY  
DISTANCE OVER  
10 FEET FROM  
THE CAMERA

Patent 280352

**T**HE Duo-Ensign takes "close-up" portraits at 3 ft. or groups and ordinary snapshots; it is not an *All-Distance* camera—but wonderful value for the quality of work it can produce.

The portrait attachment

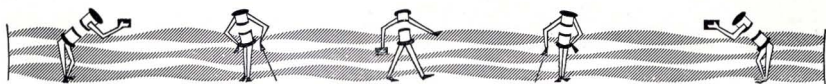

The film registration device

The Duo-Ensign is very strongly made and of delightful appearance, and there is a choice of three colours—black, blue and red. For "close-up" portraits a lever is lifted and the exposure made; press the lever down and it's ready for an ordinary snap, or leave it if another portrait is being taken. The Duo-Ensign is fitted with the Ensign film registering device (Patent 280352), which holds the film absolutely flat during the exposure—no other cameras but "Ensigns" have this feature. The Duo-Ensign is also fitted with the direct-vision view finder, and reflex view finders. The shutter has Time and Instantaneous movements.

 $2\frac{1}{2}-2\frac{1}{2}'' \times 4\frac{1}{4}''-6.5 \times 11$  cm.

## IN COLOURS

**D**UO Ensigns in colours are particularly attractive for those who require something rather distinctive and out of the ordinary. The covering material used is of first-class quality, and will wear indefinitely. The nickel fittings of these cameras provide a pleasing contrast to the coloured covering, making them exceptionally attractive in appearance, and a delight to handle and carry.

280352

**N**O camera in the hands of a beginner produces a higher percentage of absolutely first-class results. Hitherto the greatest difficulty in simple photography has been to obtain sharp images at distances, and it has been impossible with simple apparatus to take pictures less than 9-10 ft. away from the camera without using a special lens called a portrait attachment. The All-Distance Ensign takes pictures at ALL DISTANCES from 3 ft. and over from the camera.

**BODY:** Metal, crystalline enamel finish, fittings nickel-plated. Back section hinged for easy loading. Leather handle. **FILM REGISTERING DEVICE:** A metal pressure plate connected with the sight-hole cover exerts pressure on the film and keeps it absolutely flat during exposure. When the film is wound to the next number the pressure is automatically released and the film winds easily and smoothly. **LENS:** Herein lies the secret of the wonderful range of the All-Distance Ensign. The result of extensive research, it gives crisp definition at all distances. Effectively hooded so that camera may be used for taking pictures against the light. **SHUTTER:** Time and Instantaneous, provided with three stops and contained in dustproof compartment. **VIEW FINDERS:** Direct vision with sighter plate for eye level pictures. Reflex type for waist-line position—upright and horizontal. **SIZE:**  $4\frac{3}{4} \times 3 \times 4\frac{1}{4}$  in. **WEIGHT:** 22 oz.

## ALL-DISTANCE ENSIGN

FOR ROLL FILMS  $2\frac{1}{4}$ B— $2\frac{1}{4}$ " $\times$  $3\frac{1}{4}$ "— $6\times 9$  cm.

IN THREE BEAUTIFUL COLOURS

BLUE—RED—BROWN

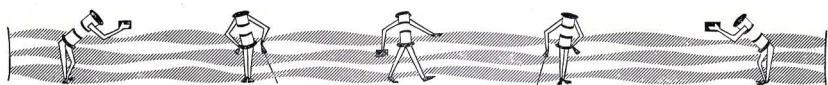

**T**HE All-Distance Ensign cameras finished in various colours are really beautiful productions. The crystalline coloured enamel produces a light and shade effect which is extremely pleasing. The general specification of these cameras is similar to the black model, described on page 6. Each camera is provided with a solid limp leather case, matching admirably the colour of the camera itself.

Price

£1 7 6

Including leather case to match.

# ALL-DISTANCE POCKET ENSIGN

## No. 1

FOR ROLL FILMS  $2\frac{1}{4}$ B  
 $2\frac{1}{4}'' \times 3\frac{1}{4}''$  —  $6 \times 9$  cm.

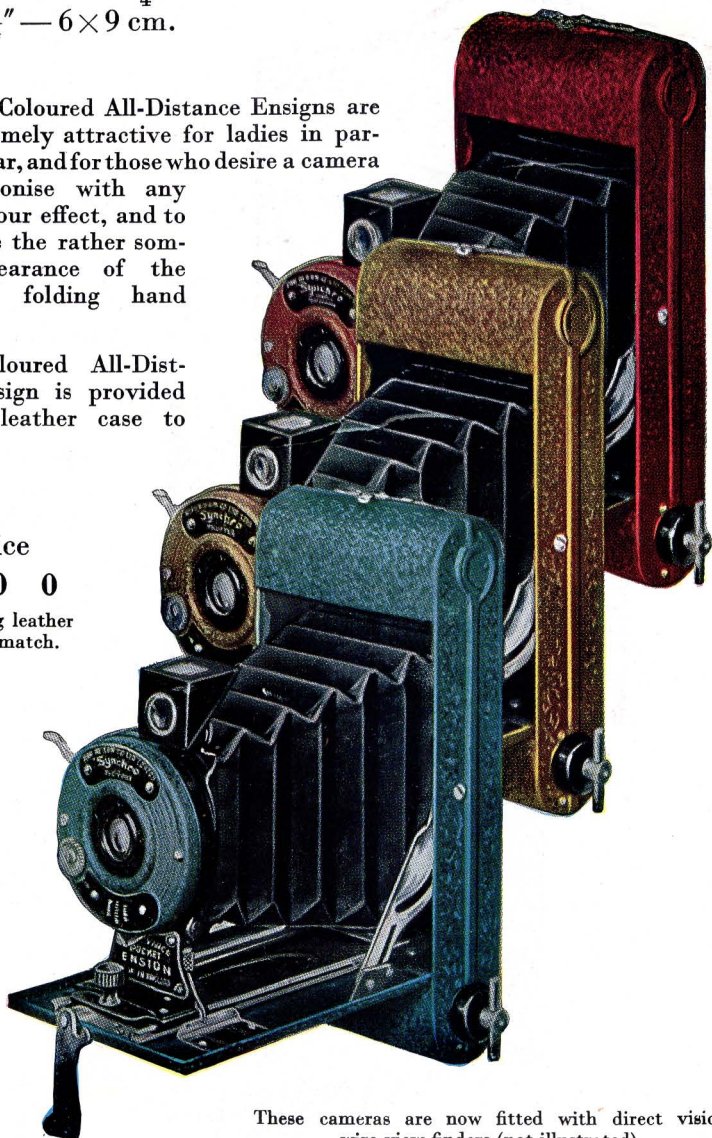

THE Coloured All-Distance Ensigns are extremely attractive for ladies in particular, and for those who desire a camera to harmonise with any other colour effect, and to overcome the rather sombre appearance of the ordinary folding hand camera.

Each coloured All-Distance Ensign is provided with a leather case to match.

Price

£2 0 0

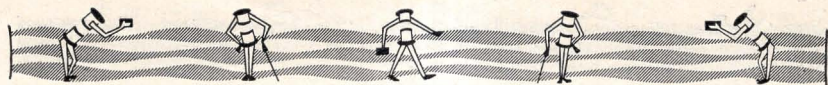

Including leather case to match.

These cameras are now fitted with direct vision wire view finders (not illustrated).

 271186  
 281802  
 280352

**M**EETS the needs of those who prefer a covered camera, and also wish to avail themselves of various shutter speeds.

**BODY:** Metal, handsomely finished and covered with best quality leather cloth. Nickel-plated fittings, feather bellows, leather handle.  
**FILM REGISTERING DEVICE** (Pat. No. 280352): A metal pressure plate is fitted to the back and is connected with the sight hole cover. When an exposure is being made this plate exerts pressure on the film and keeps it absolutely flat. When the film is wound to the next number the pressure is automatically released and the film winds easily and smoothly.  
**LENS** (Patent No. 271186): The specially constructed lens, made on the All-Distance principle, has two positions only. Forward for close-up portraits at 3 ft. to 9 ft., and back for all pictures over 9 ft. away.  
**SHUTTER:** The lens is mounted in a Trichro 3-speed shutter giving  $1/25$ ,  $1/50$ ,  $1/100$  sec., Time and bulb, fitted with Iris diaphragm.  
**LOADING** (Pat. No. 281802): The loading device is remarkably simple—spools being held on two hinged pins. No loose parts.  
**VIEW FINDERS:** Reflex brilliant and direct vision wire type, with sighter plate for eye level pictures.

## ENSIGN CARBINE No. 5

FOR ROLL FILMS  $2\frac{1}{4}$ B  
 $2\frac{1}{4}'' \times 3\frac{1}{4}''$  —  $6 \times 9$  cm.

A NEW  $f/4.5$   
 "SPEED" MODEL  
 AT A POPULAR  
 PRICE

THE possession of a camera having a large aperture  $f/4.5$  lens is a very real advantage. It enables pictures to be made under conditions which would make photography impossible with a less powerful lens. It is worth every penny of its extra cost. Such a lens, however, must be good and supported by a real reputation. The Aldis Uno has an irreproachable name and is backed by the personal guarantee of Mr. H. L. Aldis. Each camera has a lens guarantee and test chart. The Mulchro shutter is the latest production by the most up-to-date shutter designers, provides a range of speeds of  $1, \frac{1}{2}, \frac{1}{5}, 1/10, 1/25, 1/50, 1/100$  sec. Time and Bulb, is made throughout of metal, including diaphragm leaves, and is thoroughly reliable. The general camera specification is as shown on page 12.

## ENSIGN CARBINE No. 7

FOR ROLL FILMS  
 $2\frac{1}{4} \times 3\frac{1}{4}$ — $6 \times 9$ cm.

A NEW  
 MODEL  
 COMPLETE  
 WITH  
 EVERY  
 MODERN  
 REFINEMENT

Film Registering  
 Device,  
 controlled from sight  
 hole cover

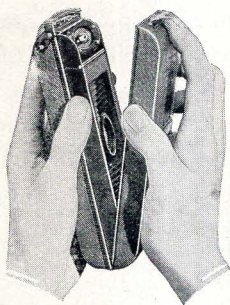

THE Ensign Carbine No. 7 is the very latest development in high-class roll film cameras and embodies in its ingenious and practical design every movement necessary to the amateur who wishes from time to time to produce serious work without having to use complicated, expensive and clumsy apparatus.

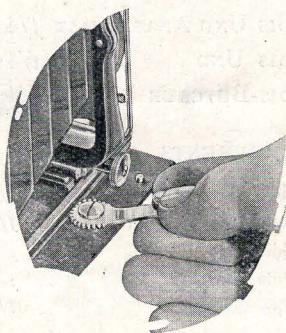

## ENSIGN CARBINE No. 7

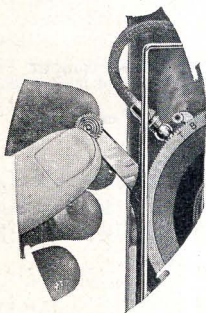

Easy opening  
hinged back

easily operated catch. The back is fitted with the Ensign film registering device, ensuring an absolutely flatness of the film. A strong leather handle is fitted.

The spool pins are hinged and loading is exceptionally simple. Bellows are made of specially selected leather faced with linen and lined.

Quick action  
radial focussing

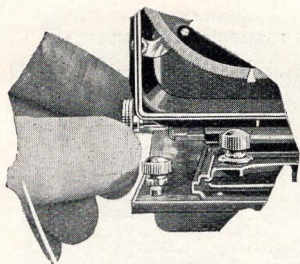

Lever raising front

The elegant cast U-shape front provides absolute rigidity for the lens and shutter, and is fitted with new quick action radial focussing, very easy in operation and allowing the pictures to be made as close as 4 ft. Cross front movement is also provided which operates as rising front for landscape pictures.

## ENSIGN CARBINE No. 7

Screw cross front.

**T**WO view finders are provided, reflex type, and direct vision with sighter plate for use at eye level. A variety of lenses and shutters are available, flexible release is included according to choice. The size overall is  $7 \times 3\frac{1}{2} \times 1\frac{1}{2}$ , and the weight 30 ozs.

The Ensign Mulchro shutter has speeds of 1,  $\frac{1}{2}$ ,  $\frac{1}{5}$ ,  $\frac{1}{10}$ ,  $\frac{1}{25}$ ,  $\frac{1}{50}$ ,  $\frac{1}{100}$  sec. T. & B.

New Compur shutters with delayed action are fitted unless otherwise specified.

FOR ROLL FILMS  $2\frac{1}{2}$   
 $2\frac{1}{2} \times 4\frac{1}{4}$  —  $6.5 \times 11$  cm.

A NEW  
 MODEL  
 FOR  
 ARTISTIC  
 PICTURES

**T**HE Ensign Carbine No. 12 is familiar to all as a simple, thoroughly reliable and well-made camera for  $2\frac{1}{2} \times 4\frac{1}{4}$  panel pictures. The New No. 14 is similar in every respect but has in addition radial focussing and rising front movements. The general construction is carried out in first-class style and workmanship is perfect. Essentially a utility camera it nevertheless is capable of producing the finest work from any type of subject, and the size gives a contact print which is satisfying.

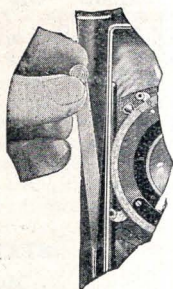

Film Registering Device  
 controlled from sight  
 hole cover.

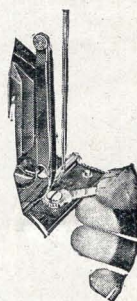

# ENSIGN CARBINE Nos. 12 and 14

Rising Front Lever  
of No. 14.

**BODY:** Solidly constructed of wood reinforced by metal end sections; metal back covered with best quality morocco grain leather. Folding baseboard on exceptionally strong hinge supported in open position by solid struts and when shut affording ample protection to the lens. Fitted with two tripod bushes. The Ensign patent film registering device is fitted. **FRONT:** Stamped U-shaped casting of exceptional rigidity and embossed lens plate amply strong enough to carry large aperture lenses and fast shutters. No. 14 is fitted with rising front and radial focussing movement.

**LOADING:** Hinged spool pins retain the spools, and loading is essentially simple. There are no loose parts. **FOCUSSING:** Draws forward by hand movement into automatic infinity catch. Engraved focussing scale mounted on spring plate with positions down to 5 ft. **WINDER:** Very strong knob pattern, silent working. **VIEW FINDERS:** Reversible brilliant and direct vision wire finder with sighter. **SIZE:**  $7\frac{1}{4} \times 4 \times 1\frac{3}{4}$  in. **WEIGHT:** 32 oz.

No. 14 has radial  
focussing.

Compur shutters have delayed action.

EXTENSION

DE LUXE  
MODEL  
WITH  
DOUBLE  
EXTENSION

THESE Ensigns are made in two sizes,  $\frac{1}{4}$ -plate, giving a picture  $3\frac{1}{4} \times 4\frac{1}{4}$ , and post-card, and they have the distinct advantage of producing pictures, the contact prints of which are wholly satisfying. Particularly is this the case with the post-card size camera.

### STANDARD MODEL

### SINGLE EXTENSION

BODY: Made of well-seasoned wood, with metal ends, covered with first-class morocco leather. Strong extra long aluminium baseboard on substantial hinges, fitted with solid cut runners. Integral spool pins and silent winder. Fitted with bushes for vertical and horizontal positions. First-class leather bellows. Automatic infinity catch and focussing scale. FRONT: Solid aluminium U-shaped casting, fitted to solid carriage working on runners. Rising and cross movement. Brilliant view finder reversible for horizontal position.

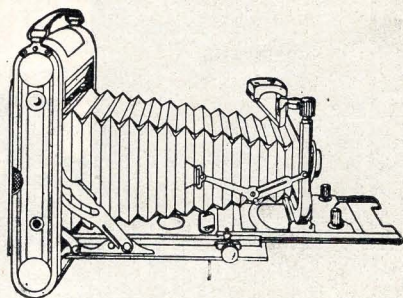

# 

### 

**G**ENERAL construction as standard model. In addition to being the perfect camera for general snapshot and ordinary photograph, the scope is considerably increased by the double extension feature, which makes possible copying, table-top photography flower studies at near distances, and landscapes with increased magnification by the use of a single component of a convertible lens. The de Luxe model is also fitted with back to take single metal plate holders

**COPYING:** Using the camera at its fullest extension and focussing on the ground glass, objects may be copied actual size and actually larger in the case of objects smaller than the actual size of the film or plate. **CONVERTIBLE LENSES:** Lenses such as the Ross Homocentric  $f/6.3$ , can be used in the separate components. Each has a focus of approximately double the complete lens and will give double magnification, and the lens is stopped down to half its normal aperture.

The Double Extension

Including flexible wire release and instruction booklet

THE MOST BEAUTIFUL CAMERAS IN THE WORLD

## THE FLORENTINE BRONZE ENSIGN CARBINES

TO those who appreciate the really beautiful these Ensign Carbines will be a source of sheer delight. They are the exemplification of the perfect craftsmanship for which Britain is so justly famous. The beautiful Florentine Bronze finish makes the camera a pleasure to handle and carry. Particular attention has been given to rendering these cameras insusceptible to atmospheric and climatic variations. They are, therefore, eminently suitable for use in all tropical regions.

### ENSIGN CARBINE FLORENTINE NO. 4

MADE throughout of brass specially treated and oxidised. Partly polished and of extremely handsome appearance. No parts to wear or get shabby. Hinged spool pins making loading a very simple matter. Russia leather bellows triple-proofed and impervious to insects, bolted back and front. Automatic infinity catch and brilliant view finder. Trichro all-metal 3-speed shutter. Each camera is supplied with wire shutter release and instruction book.

Each camera packed in chamois bag.

# ENSIGN TROPICAL FILM REFLEX

WITH FOCAL PLANE SHUTTER

FOR ROLL FILMS

$2\frac{1}{4} \times 3\frac{1}{4}$ "

$6 \times 9$  cm.

AN ABSOLUTELY  
UNIQUE NEW  
CAMERA  
BUILT FOR  
HARD WORK

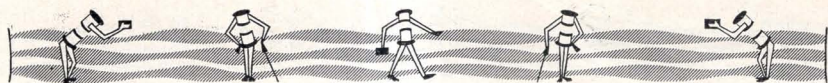

Patents  
207637  
280352

NO LEATHER COVERING—ALL BRASS MECHANISM—RUSSIA  
LEATHER HOOD, TEAK BODY, WAX FINISH, BRASS BOUND.

# ENSIGN TROPICAL FILM REFLEX

A UNIQUE NEW MODEL OF OUTSTANDING MERIT

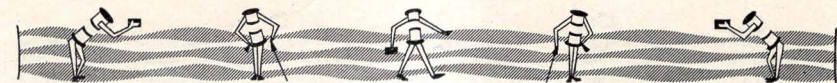

**T**HE Tropical speed film reflex unquestionably reaches the highest point so far attained in camera manufacture. It is the very embodiment of sound design carried to a practical end by absolutely perfect workmen. This camera is for real hard work. There is nothing to go wrong, and every part is made as perfectly as it is possible to make it irrespective of price. The designers have tried to produce a camera usable in any climate under the severest conditions, embodying every essential feature for every class of work. They have brilliantly succeeded, and the Tropical Speed Film Reflex is a worthy exponent of British manufacture at its very best.

**BODY:** Teak, brass bound at all vital points, all external fittings finished Florentine bronze, contrasting beautifully with the thoroughly practical wax finish of the woodwork and incorporating the patent film registering device (Patent 280352), which ensures flatness of the film comparable to that of a glass plate. The large Russia leather hood makes focussing easy in any light. Fitted with spring handle. The mirror is optically worked and surface silvered. Exceptionally simple to load and manipulate. No loose parts. **THE SHUTTER** is constructed on the self-capping variable slit principle and gives a range of speeds of 1/25, 1/40, 1/50, 1/75, 1/125, 1/250, 1/500 sec. and Time. No more movements are required to set the shutter than with an ordinary folding camera—you simply set your speed by a knob, wind up the shutter and make the exposure. **THE LENS EQUIPMENT:** The standard equipments are the Aldis-Butcher  $f/4.5$  and  $f/3.4$  anastigmats. They are personally guaranteed by Mr. H. C. Aldis, and each is accompanied by a photographic test chart showing the absolutely perfect covering power and definition obtained. These lenses, which are made specially for this camera, are a very real optical achievement. **SIZE,**  $6\frac{3}{8} \times 6\frac{1}{8} \times 4\frac{1}{4}$  in. **WEIGHT,** 57 oz.

STANDARD MODEL      LEATHER COVERED

A CAMERA outstanding in design and construction, having all the advantages of the Reflex principle combined with the portability and convenience of roll films.

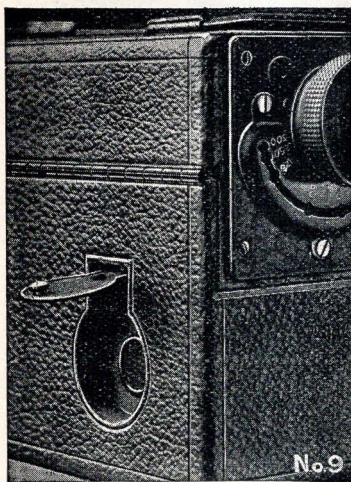

# ENSIGN SPEED FILM REFLEX

A REMARKABLE ACHIEVEMENT

THE reflex camera has hitherto been more or less the exclusive preserve of the plate photographer, and its advantages have been somewhat discounted by the weight and bulk necessitated by its design and construction, and more especially because it requires the use of glass plates.

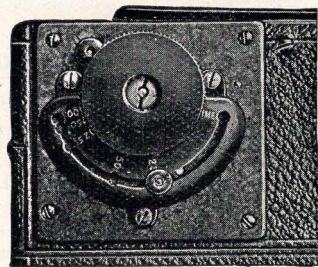

The film registering device  
Patent 280352

The Roll Film Reflex, with fast focal plane shutter, has at last made its appearance in the Ensign Speed Film Reflex, and this remarkable new camera combines all the natural advantages of the reflex camera, with the handiness, portability and lightness of the roll film.

THE CAMERA is made throughout of mahogany, covered with finest quality fine grain morocco leather, reinforced with metal and incorporating the patent film registering device (Patent 280352), which ensures flatness of the film comparable to that of a glass plate. The large top leather hood makes focussing easy in any light. Fitted with leather-covered spring handle. The mirror is optically worked and surface silvered. Exceptionally simple to load and manipulate. No loose parts. THE SHUTTER is constructed on the self-capping variable slit principle, and gives a

range of speeds of 1/25, 1/40, 1/50, 1/75, 1/125, 1/250, 1/500 sec. and Time. No more movements are required to set the shutter than with an ordinary folding camera—you simply set your speed by a knob, wind up the shutter and make the exposure. THE LENS EQUIPMENT: The standard equipments are the Aldis-Butcher  $f/4.5$  and  $f/3.4$  anastigmats. They are personally guaranteed by Mr. H. C. Aldis, and each is accompanied by a photographic test chart showing the absolutely perfect covering power and definition obtained. These lenses, which are made specially for this camera, are a very real optical achievement.

TELEPHOTO  
 OUTFIT  
 WITH  
 DALLON  
 $f/6.5$   
 TELEPHOTO  
 ANASTIGMAT

A CAMERA THAT OFFERS MANY ADVANTAGES

ONE of the ambitions of every keen photographer is to possess a telephoto outfit. Naturally. Think what a telephoto outfit makes possible. Here is an outfit that will gladden the heart of the keenest picture-maker.

The benefits to be gained from the use of a telephoto outfit are many. At cricket matches, for instance, when one cannot get near the principal players—those at the wicket. Or on the occasion of a big procession, when one cannot get close to the route. Or for a difficult architectural feature. These are some of its thousand and one applications. Combined with the two features already mentioned they make the Ensign Speed Reflex Telephoto Outfit one of the very finest ever offered—one which no keen photographer who has the means can resist. The Outfit includes Standard Ensign Speed Film Reflex Camera with Aldis-Butcher  $f/4.5$  Anastigmat, Dallon  $f/6.5$  9 in. Telephoto Anastigmat fitted interchangeably, best quality hand-sewn velvet-lined English hide leather case.

# ENSIGN ROLL FILM REFLEX

Patent  
210531

MOST SIMPLE OF ALL  
CAMERAS TO OPERATE  
IDEAL FOR BEGINNERS  
100% SHARP RESULTS

FOR ROLL FILMS  $2\frac{1}{4}B$   
 $2\frac{1}{4}'' \times 3\frac{1}{4}'' - 6 \times 9$  cm.

Overcomes the difficulties of judging distance correctly. The operator can view his picture at full size and the right way up, and the subject can be focussed right up to the instant of the exposure. The shoulder strap leaves both hands free for focussing.

## STANDARD MODEL

Substantially made of wood covered with first quality morocco leather and provided with leather handle. Hood folds up into the top of the camera when not in use. Focussing is carried out by means of a knob in front of the hood. Shutter gives Time and Instantaneous exposures. Loading—the camera is loaded by removing the inside body—extremely simple.

## DETAILS

Size closed,  $4 \times 5 \times 5\frac{1}{4}$  in. Weight 30 oz. Complete with sling shoulder strap and 24-page instruction book.

## TROPICAL MODEL

Designed especially for the roughest work. The teak body is as strongly made as is possible. The special wax finish retains its appearance after the most prolonged neglect. In fact it is a camera *par excellence* for those whose activities are in rough places. Teak body, wax finish and brass bound at all joints, Russia leather hood, all brass mechanism. Specification generally as above.

## ENSIGN CADET

FOR ROLL FILMS 1J— $1\frac{5}{8}'' \times 2\frac{1}{2}''$ — $4 \times 6.5$  cm.

A STURDILY built little camera, eminently suitable for children and "grown-up" beginners. Takes the popular Vest Pocket size film which enlarges in exact proportions to postcard. A feature is its method of loading, which is "direct," not by means of an internal cone.

Solid body covered first quality black leatherette, direct-vision wire view finder, Everset shutter, giving time and instantaneous exposures; first quality long-focus single achromatic lens, giving beautifully defined pictures, pull-out winder. Black and nickel fittings, solid leather handle. Reversible Reflex finder (extra). Instruction book.

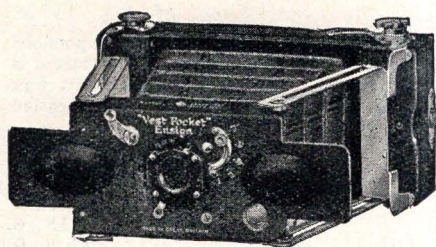

Price 6/6

Complete with reversible reflex view finder . . . 7 6

Canvas case with shoulder strap . . . . . 2/6  
Portrait attachment for pictures at 3 ft. . . . . 2/6

## VEST POCKET ENSIGN

FOR ROLL FILMS 1J— $1\frac{5}{8}'' \times 2\frac{1}{2}''$ — $4 \times 6.5$  cm.

LIGHT and compact, the Vest Pocket Ensign is nevertheless capable of making pictures which can be enlarged to any size, and particularly to postcard, the size being in exact proportion. Aluminium body, crystalline enamel, nickel fittings, leather bellows, silent film winder, integral spool holders, reversible brilliant finder, Iris diaphragm,

shutter (T.B. 1/20, 1/40, 1/60 sec.), limp leather case, instruction book. Size  $5\frac{1}{4} \times 3 \times 1\frac{1}{4}$  in. Weight, 8 oz.

## STANDARD OUTFITS

FOR FILM-PACKS OR PLATES

$3\frac{1}{2}'' \times 2\frac{1}{2}''$  —  $6\frac{1}{2} \times 9$  cm.

$\frac{1}{4}$ -PLATE —  $8.3 \times 10.8$  cm.

POST-CARD —  $8 \times 14$  cm.

A Plate and Film-pack Camera of distinction, provided with all the necessary refinements for serious work.

**BODY:** Well-seasoned wood, tongued corners, covered with solid leather. Substantial baseboard, fitted with runners, automatic infinity catch and focussing scale for near distances. Solid leather bellows, linen faced. **FRONT:** Solid aluminium casting with rising and falling front, also cross movement, fitted with automatically locking finger grip, solid travelling carriage. The method of operating the rising and falling front varies slightly with the different models. Reflex and direct-vision view finders are fitted (except post-card model). **EXTENSION:** Double, operated by rack and pinion, full extension, 2A,  $8\frac{1}{2}$  in.; 2B,  $9\frac{1}{2}$  in.; 2C,  $11\frac{3}{4}$  in. Can therefore be used with the separate components of convertible anastigmats such as the Ross Homocentric, Ross Combinable or Zeiss Protar, also for copying purposes and reproduction work. **EQUIPMENT:** A large selection of lenses and shutters is available, and one will be found for every kind of photographic need. The Aldis Uno and Aldis-Butcher  $f/7.7$  and  $f/6.3$  carry the personal guarantee of Mr. H. L. Aldis, and a test chart accompanies each lens.

# ENSIGN CAMEO

**COPYING:** Using the whole lens and fullest extension, objects can be copied same size and in the case of objects smaller than the size of the plate they can actually be photographed larger than the original. **CONVERTIBLE LENSES:** The single components of certain lenses can be used separately, stopped down to about half the aperture of the complete lens. A good image considerably enlarged is obtained.

Outfits include two single metal plate holders, film-pack adapter, flexible release, hooded focussing screen and 24-page instruction book contained in handsome leather case.

# SANDERSON HAND CAMERAS

FOR PLATES, FILM-PACKS AND CUT FILM  $\frac{1}{4}$ -PLATE

$4\frac{1}{4}'' \times 3\frac{1}{4}''$ — $10.8 \times 8.3$  cm.

EBONY INTERNAL FINISH WITH NICKEL FITTINGS—SILVER  
OXIDISED EXTERNAL FITTINGS AND REVOLVING BACK

**A** UNIVERSAL CAMERA of the highest standard of workmanship and efficiency. The Sanderson is, above everything, absolutely simple and rises to every occasion, however exacting. None of the movements in reserve will complicate the action of the camera for snapshot use, nor are they likely to confuse the beginner. Every possible movement required in a camera is embodied in the Sanderson but none of them interferes with its simplicity and straightforward use. The Sanderson booklet contains a description of all its movements, including the universal swing front, its extra long extension, rising and falling lens front and arrangement for using wide angle lenses. An outstanding advantage of the Sanderson is that there is no necessity for a swing back, because the ingenious movements of the front enables the lens to be raised, even to the level of the upper edge of the plate.

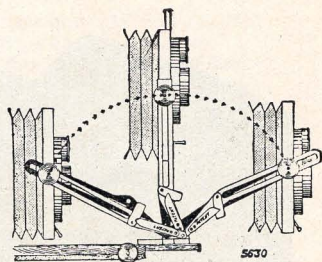

# SANDERSON HAND CAMERAS

**BODY:** Seasoned mahogany, covered in morocco leather. Nickel-plated fittings and best quality leather bellows. **EXTENSION:** By rack and pinion cut diagonally. Extra long extension for focussing near objects and for copying. Rack rising front, falling and axial swing movements. **WIDE ANGLE:** Rack and pinion adjustment with additional travelling baseboard. **REVOLVING BACK:** Leather covered with improved collapsible hood. **VIEW FINDER:** Brilliant pattern with revolving mask for upright or oblong pictures. Circular brass level attached to baseboard. **BUSHES:** Three, for using camera at normal, long extension and wide angle positions. **SLIDES:** Three double plate holders, black polished.

# ENSIGN PRESSMAN REFLEX

FOR PLATES,  
FILM-PACKS  
AND  
CUT FILMS

FITTED WITH  
ALDIS-BUTCHER  
LENSES  
*f/4.5 and f/3.4*

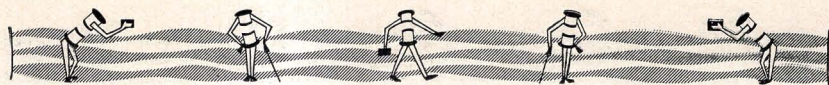

**T**HE Ensign Pressman Reflex Camera is built on solid lines and fitted with fixed slit focal plane shutter.

**BODY:** Mahogany, covered with morocco grained leather. All the fittings, except the focussing pinion, placed on the right-hand side in the most convenient positions for rapid manipulation. **FOCUSsing HOOD:** Leather of ample size to protect the focussing screen from stray light, self-erecting, covered by a metal cap. The whole hood of  $\frac{1}{4}$ -plate model is hinged and can be lifted up for cleaning purposes.

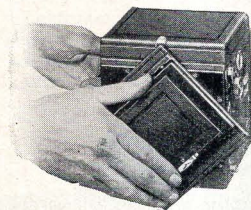

# ENSIGN PRESSMAN REFLEX

**SHUTTER:** Constructed on the permanent slit principle; very reliable and most simple to manipulate. No adjustable bands to wear out. It consists of a single band with three slits, 3 mm., 25 mm. and 100 mm., each of which can be brought into position as required. These, in conjunction with a tension spring, give a variety of exposures from 1/15 to 1/1000 sec. and Time. One turn of the winding key only sets the shutter and speed. A great advantage of this shutter is that it can be set and the speed altered, even with the plate in position ready for exposure. This feature is unique to the Ensign Pressman. **FRONT:** Absolutely rigid, extending on steel girders engaging with a pinion for focussing. Rising and falling movement. Sky shade protecting lens when closed (Not fitted with  $f/2.9$ ,  $f/2.7$  and  $f/2.5$  lenses). **MIRROR:** Optically worked and surface silvered. Everset, it operates without vibration even at the slowest speeds. **PLATE HOLDERS:** The camera is supplied for single metal or double plate holders. The former are compact and light, first-class finish with title plate. The latter are first-class mahogany book-form type with hinged draw-outs and are very suitable for colour photography. Both types are supplied with cut film sheaths for single flat films. **THE REVOLVING BACK:** A great improvement whereby the plate can be changed from upright to horizontal or *vice versa* at a moment's notice, with one hand. (The postcard model is not fitted with this feature as it would greatly increase the bulk and weight.)

**Equipment A:** Includes three single metal plate holders with name-plate fitted with detachable cut-film sheaths, back focussing screen with deep leather-covered hood, neck strap, and 16-page booklet. **Equipment C:**  $\frac{1}{4}$ -plate model only. Without slides, adapted for Graflex accessories, prices as Equipment A. (No accessories.)

ONE CONTROL ONLY SETS SHUTTER AND SPEED

A PERFECT Reflex camera, well designed, strongly made of best materials, easy to manipulate and certain in action. Light in weight and small in size. The camera is exceptionally well finished in all its parts both inside and out, and is unquestionably the finest value in reflex cameras available to-day. Shutter speeds up to  $1/1000$  sec. and fitted with a selection of high-speed lenses.

# ENSIGN SPECIAL REFLEX

**BODY:** Constructed of well-seasoned wood, specially selected and efficiently clamped, with tongued and grooved corners screwed together. Covered in fine seal grain leather. Black enamelled and nickel-plated fittings. Black leather bellows with ample extension. **FOCUSING:** Controlled by rack and pinion adjustment. **HOOD:** Self-erecting and extra deep, with narrow mouth that excludes all light. Protects the glass screen when folded. Hood can be half reversed, permitting pictures to be taken at right angles. **MIRROR:** Optically worked glass, surface silvered and highly polished. Falls automatically in position after shutter has been released. **REVOLVING BACK:** Horizontal or vertical, can be operated in either direction after sheath of plate holder has been withdrawn. A hooded glass focussing screen is provided for direct focussing. **LENS FRONT:** Rising and falling movements, with locking clamp screw. Fitted with sky shade to protect the lens. (Not with largest aperture lenses.) **SHUTTER:** Focal plane with self-capping light-proof blind. No calculation or reference to a speed table is necessary, and no variable tension spring adjustment is required. Speed variations obtained by revolving the outer ring on the keywind until the indicator mark is opposite the figure denoting the required exposure. Time or Instantaneous exposures controlled by one release and confusion is impossible. Speeds as follows:—1/15, 1/20, 1/30, 1/50, 1/75, 1/100, 1/200, 1/350, 1/500 and 1/1000 sec.

FILM-PACKS  
AND  
CUT FILMS

Quarter-plate  
Ensign de Luxe Reflex

**T**HE Ensign de Luxe Reflex is an exceedingly light and compact camera, sturdily built for hard work, exceptionally simple in operation and embodying all the essential details of the most advanced type.

# ENSIGN DE LUXE REFLEX

## QUARTER-PLATE AND HALF-PLATE

**BODY:** Constructed of well-seasoned wood, specially selected and efficiently clamped, with tongued and grooved corners screwed together. Covered in fine seal grain leather. Black enamelled and nickel-plated fittings. Black leather bellows with sufficient extension for use with Telephoto lenses. **FOCUSSING:** Controlled by rack and large pinion head. **HOOD:** Self-erecting and extra deep, with narrow mouth that excludes all light. Protects the glass screen when folded. **MIRROR:** Optically worked glass, surface silvered. Falls automatically in position after shutter has been released. **REVOLVING BACK:** Horizontal or vertical, can be used without replacing the sheath of the plate holder. A hoded glass focussing screen is provided for direct focussing. **LENS FRONT:** Rack rising and falling movements actuated by lever. Fitted with sky shade that also protects the lens. **SHUTTER:** Self-capping light-proof blind. Film-packs can be used without replacing adapter slide between exposures. Speeds are obtained by revolving the engraved collar on the key-wind, through a portion only of a circle. No calculation or reference to a speed table is necessary, and no available tension spring is required. Only one release for Time or Instantaneous exposures, and it is impossible for a Time or Bulb exposure to be given when Instantaneous is intended. There is a full range of approximate speeds:—Bulb, Time;  $\frac{1}{4}$ -plate—1/15, 1/20, 1/25, 1/50, 1/75, 1/100, 1/150, 1/250, 1/500, 1/1000 sec.  $\frac{1}{2}$ -plate—1/10, 1/20, 1/40, 1/60, 1/100, 1/150, 1/200, 1/400, 1/1000 sec.

An attachment for using an Antinuous release is provided.

**EQUIPMENT.**—Includes three double plate holders with detachable cut-film sheaths, back focussing screen with deep leather-covered hood and neck strap.

# ENSIGN FIELD CAMERAS

Ensign Empire

**E**NSIGN Field Camera outfits are complete in every detail and eminently suitable for the serious worker and commercial photographer. Made throughout in first-class style of selected materials, and beautifully finished. Every movement and feature essential to the production of first-class work is provided. The Ensign King Outfit is provided with double extension front, and is available in  $\frac{1}{4}$ -plate and  $\frac{1}{2}$ -plate sizes. The Ensign Empire Outfit has triple extension movement, and is supplied in  $\frac{1}{2}$ -plate and 1/1-plate sizes.

## ENSIGN KING, Double Extension

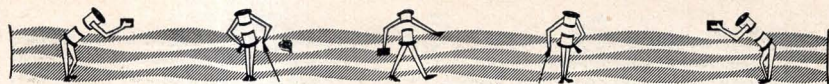

**CAMERA:** Polished mahogany, lacquered brasswork; rack and pinion focussing, rising front, also wide-angle and swing back movements. Brass turntable. **DARK SLIDE:** Mahogany book-form. **SHUTTER:** Roller blind, Time and Instantaneous speed indicator and pneumatic release. **TRIPOD:** Selected ash, rule joint, three-fold, with sliding legs.

## EMPIRE ENSIGN, Triple Extension (as illustrated)

**CAMERA:** Polished mahogany, polished brasswork, wide leather bellows. Triple extension rack and pinion, controlled by separate pinions. Automatic self-erecting swing fronts and back with rising, falling, and cross front movements with independent rise and fall to lens front. Wide-angle rackwork movement, double swing back, reversing back and side swing. Cast brass turntable fitted flush with base-board. **BELLOWS:** Real leather, truncated corners. **TURNTABLE:** Revolving, brass, polished, with very strong lugs. **DARK SLIDE:** Polished mahogany, book-form with double hinged shutters, hinged division, and safety catches. **SHUTTER:** Roller blind, Time and Instantaneous speed indicator and pneumatic release. **TRIPOD:** Selected ash, rule joint, three-fold, with sliding legs.

# ENSIGN FIELD CAMERAS

Outfits include Camera with lens as selected, roller blind shutter, one double book-form slide and tripod.

# ENSIGN SHUTTERS

MADE BY THE HOUGHTON-BUTCHER MANUFACTURING CO. LTD.

**T**RICHRO and Mulchro Shutters are the result of absolute determination backed by years of research and experience to produce an article absolutely reliable in operation, accurate in action and substantial in workmanship. Both are made throughout of metal, including shutter and diaphragm leaves, and both are superbly finished. The Trichro provides 3 speeds,  $\frac{1}{25}$ ,  $\frac{1}{50}$  and  $\frac{1}{100}$  sec., also Time and Bulb. The Mulchro has 7 speeds, 1 sec.,  $\frac{1}{2}$ ,  $\frac{1}{5}$ ,  $\frac{1}{10}$ ,  $\frac{1}{25}$ ,  $\frac{1}{50}$ ,  $\frac{1}{100}$ , also Time and Bulb. The release lever is conveniently placed and in the Mulchro both diaphragm and shutter speeds are at the top. In the Trichro the diaphragm apertures are at the front.

.. De Luxe	1/4-plate	.. 56	40/-	1/2-plate	.. 58	70/-

## ENSIGN SLING CARRIER

A very neat holder retaining the camera safely and securely whilst carrying, and enabling the user to take pictures without removing.

No. 1 for 2 1/4 B Box and Duo Ensign .. 1/6

No. 2 for All-Distance Box Ensign .. 1/6

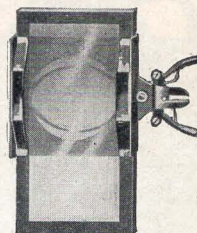

# PRIMUS COLOUR FILTERS

(O\*)

For correcting the rendering of the colour values of various objects in the subject. Essential for landscape and pictorial work where the differences in tones of green, yellow, orange and brown have to be accurately reproduced. Made in three densities increasing exposure by 2, 4 and 6 times.

Graduated Sky Filter

## SINGLE FILTERS

		Complete with holder.	Filter only
A.	To fit lenses up to $1\frac{1}{4}$ in. (outside mount diameter) ..	4/-	1/6
B.	" " " $1\frac{1}{2}$ " " " " " " ..	5/6	2/6
C.	" " " 2 " " " " " " ..	8/-	3/6

## COMPLETE SETS OF THREE FILTERS, WITH MOUNT

No. 10.	To fit lenses up to $1\frac{1}{4}$ in. (outside mount diameter) ..	7/-
" 11	" " " $1\frac{1}{2}$ " " " " " " ..	10/6
" 12	" " " 2 " " " " " " ..	15/-

## GRADUATED SKY FILTERS

Graduated to equalise the difference between sky and subject. The exposure on the sky portion is restrained to enable ground detail to receive ample exposure and at same time secures cloud effects.

No. 20.	To fit lenses up to $1\frac{1}{4}$ in. (outside mount diameter) ..	4/-
" 21.	" " " $1\frac{1}{2}$ " " " " " " ..	5/-
" 22.	" " " 2 " " " " " " ..	8/6

## ENSIGN SUPPLEMENTARY LENSES

Considerably increase the scope of work possible with the ordinary hand camera.

### PORTRAIT

Set the camera at infinity, fix the Supplementary Lens over the front of the lens, place your subject 2 ft. from the camera (distance measured from the nose of the sitter to the actual film), give ample exposure.

### WIDE ANGLE

Must be always used in conjunction with the focussing screen.

### COPYING

This lens will copy same size without the use of a double extension camera.

### TELEPHOTO

Can only be used on a double extension camera.

To fit lenses up to $1\frac{1}{4}$ in. (outside mount diameter)	each
Complete with holder ..	6/-
Complete set of four lenses with holder ..	15/-
Single lenses without holder ..	3/6

## SPECIAL PORTRAIT ATTACHMENTS

For taking portraits close up to the camera. Increases the size of the image and improves the appearance of small objects.

## TRIPOD BRACING ATTACHMENT

An extremely handy accessory. It clips on to the legs of ANY tripod, is controlled by centre flynut, and when fixed it makes tripods perfectly rigid without fear of feet creeping .. 3/-

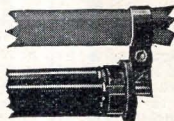

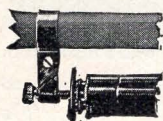

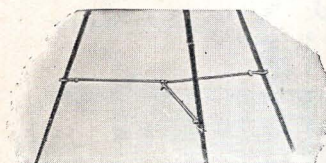

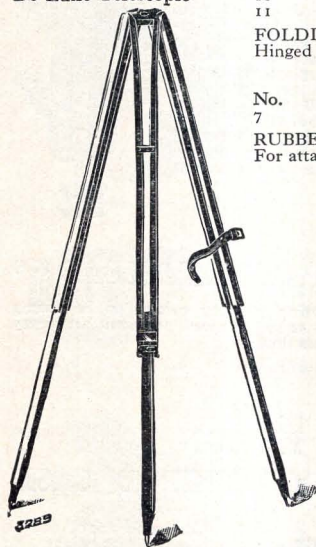

## ENSIGN CYCLIST TRIPOD CLIPS

Enable tripod to be carried on a bicycle as unobtrusively as an ordinary pump.

Price .. 2/6 per set

De Luxe Telescopic

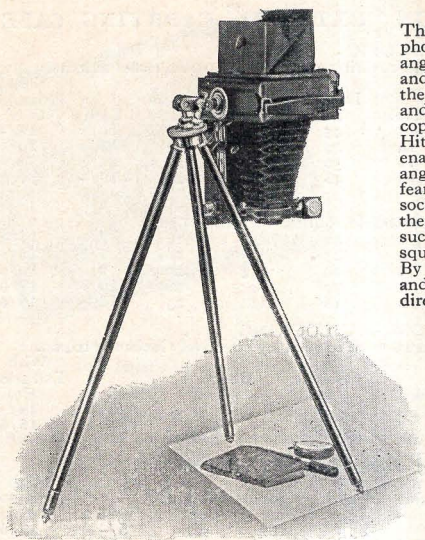

## UNIVERSAL BALL AND SOCKET HEAD (O\*)

ENTIRELY NEW DESIGN

This new ball and socket head, besides enabling the photographer to shift his camera to any desired angle on the tripod for straightforward photographic and panoramic work, also makes possible the use of the tripod for supporting the camera in a steady and accurate vertical position, for reproduction and copying work.

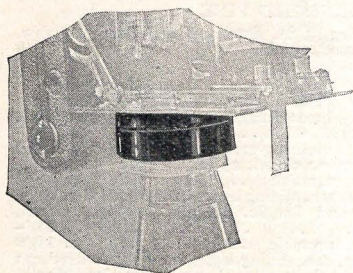

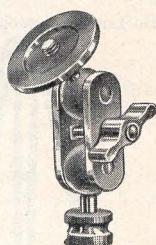

Hitherto ordinary ball and socket heads have not enabled the user to poise his camera at exact right angles over the object to be photographed without fear of over-balancing. The new Universal ball and socket head goes beyond the actual right angle, and therefore enables the user to poise his camera at such an angle as to obtain, not only the exact square with the object, but also complete steadiness. By this means any camera can be used for copying and reproduction work, such as photographing pages direct from books, collections of small objects, coins,

maps, plans, and in fact any object which comes within its range. A double extension camera is not necessary, most single extension cameras having a sufficient draw-out to be able to photograph an object up to two-thirds of its size. With a double extension camera an object can be photographed as large as the size of the plate will allow.

Thus a very interesting new sphere of activity is opened

up which may be practised at all times, and particularly during the winter evenings, when otherwise the camera would be laid aside.

Price complete in box for use with any camera . . . . . 4/6

## ENSIGN PANORAM HEAD (O\*)

A ball-bearing fitting enabling camera to be swung round on Tripod to any desired position. Very easy working. First-class finish.

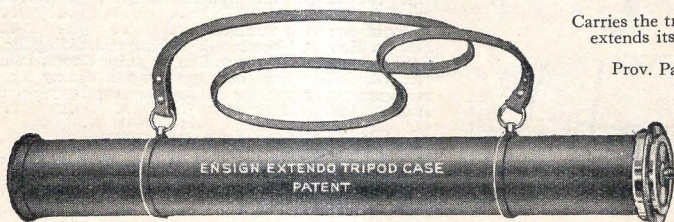

Price . . . . . 6/6

## ENSIGN (O\*)

### "EXTENDO" TRIPOD CASE

Carries the tripod and extends its height

Prov. Patent

The height of the average metal tripod is seldom sufficient to prevent bending to view the focussing screen or view finder, and in fact tripods of such a height would be far too heavy. The Ensign "Extendo" case screws on to the tip of the tripod and is itself provided with a tripod screw to which the camera is attached. Thus the camera is raised to eye level.

When not in use it becomes a carrying case for the tripod. Made of light metal, nickel-plated top and swivel sling strap. Will always be supplied with English thread unless Continental specified.

Four lengths:—11½, 14½, 16, 17 in. Complete with shoulder strap . . . . . 7/6

Price each .. 9d.

### ENSIGN LENS CLEANING TISSUE

Books of specially prepared tissue containing 10 sheets 2d.

## AMATEUR "MOVIES"

**H**AVE you ever seen a still "Movie"? You know—when the film is stopped in the projector and the figures stay fixed in all sorts of grotesque positions. How they all jump into life when the machine starts again—it's the nearest approach to really bringing things to life you could possibly have, isn't it? Well, imagine being able to make the people in your snapshots move about—just naturally—as they are used to doing—wouldn't that thrill you—wouldn't that just make all the difference to your picture making?

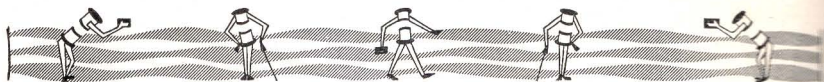

That's just what the "Autokinecam" does for you; it takes moving pictures as easily as a snapshot box camera—easier, in fact, because you never have to tell your subject to "sit like this," or "stand like that," or "keep still a moment please"—you just press the button and get all the natural positions without any fuss or self-consciousness, and when you project the picture with the "Silent Sixteen" you get it all nearly life size.

The best of it is—you can use it all the year round—indoors and out! and if you use Ensign safety film you can send copies to your friends abroad.

It's thrilling and so simple!

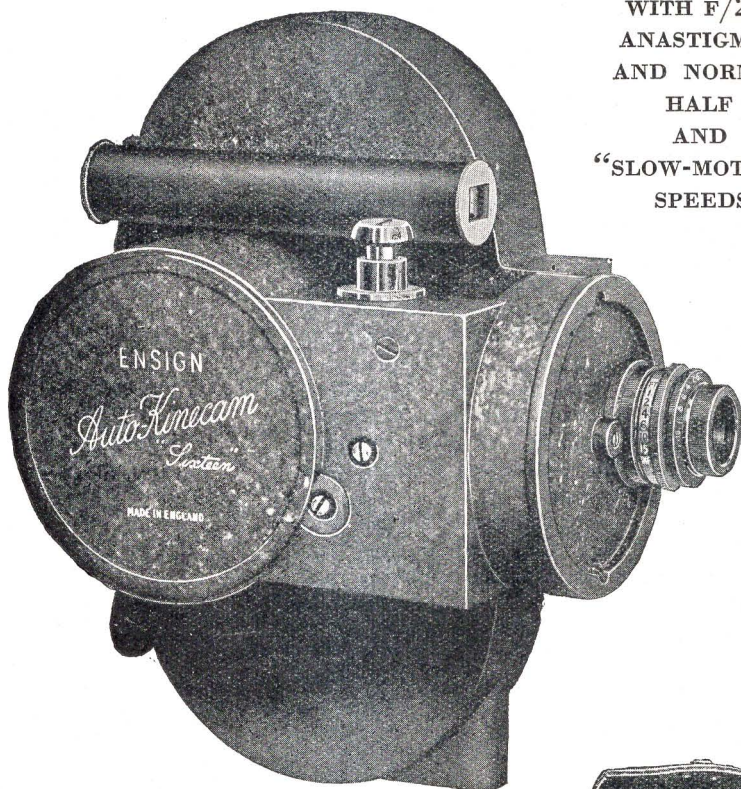

# ENSIGN AUTOKINECAM

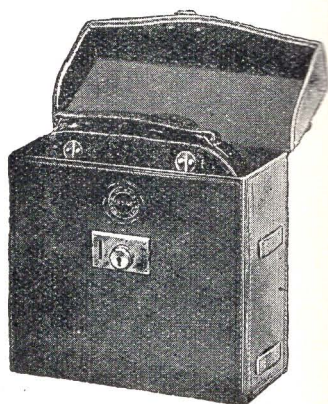

16 mm. AMATEUR CINE CAMERA

WITH F/2.6  
ANASTIGMAT  
AND NORMAL  
HALF  
AND  
"SLOW-MOTION"  
SPEEDS

**T**HE Ensign Autokinecam uses 16 mm. safety film, and its introduction marks a definite step forward in the design, construction and value of amateur cinematographic cameras.

It has all the essential features of cameras selling at a far higher price, and many characteristics of its own, making it unquestionably the finest value in amateur cine cameras in the world to-day, and a tribute to British craftsmanship.

# ENSIGN AUTOKINECAM

(L\*)

## 16 mm. AMATEUR CINE CAMERA

**GENERAL CONSTRUCTION:** The Autokinecam is constructed throughout of die castings, and all bearings and moving parts are accurately machined. The popular shape fits snugly to the face, making for steadiness when operating. **SPEEDS:** The camera is provided with "normal" speed for ordinary use; "fast" speed for the production of what are popularly known as "slow-motion" pictures—whereby any individual movement is slowed down to such an extent as to be capable of easy analysis; and "slow" speed for trick work, comic scenes, and to enable the operator to make use of his camera when the light is not too good. There is also a hand turn movement. The exposure knob can be depressed and locked in that position, so that the operator himself can enter the picture should he desire to do so. **LENSES:** The Autokinecam is fitted with the Cinar  $f/2.6$  anastigmat, giving exceptional definition, and the quality of this lens is easily discernible when the projected picture is seen on the screen. The "Cinar"  $f/2.6$  is mounted in a focussing mount so that the camera can be used at distances varying FROM 1 FT. UPWARDS, without the use of any additional attachment, and is, therefore, exceptionally suitable for real "close-up" work. Other lenses of different foci can be fitted interchangeably. **THE MOTOR:** The Autokinecam is fitted with a particularly strong, double spring graphite packed clockwork motor, giving ample reserve power for continuous running, one wind taking 35-40 ft. Leading positive footage indicator, particularly ingenious and conveniently placed, indicating the exact amount of film used at any time. **VIEW FINDER:** Of greatest importance in a camera of this description is the instrument provided for registering the subject whilst the camera is in motion, and great attention has been paid to providing a view finder giving an exceptionally brilliant image. **LOADING:** The loading of the camera may be carried out in full daylight, and is exceptionally simple; the spools are placed one above the other, giving a direct run through the camera without twisting. You can learn how to do it in five minutes. **EXPOSURE TABLE:** A simple exposure table is fitted to the side, which ensures correct exposures for all subjects. **PORTABILITY:** The "Auto-kinecam" is provided with a strong carrying strap, and having two flat sides can be put down anywhere. **CARRYING CASE:** Very handsome brown leather (best English hide), velvet-lined, lock and key and holding two 50-ft. spools of film.

ENSIGN AUTOKINECAM CAMERA, with one 100-ft. empty spool, and one 50-ft. empty spool, fitted with "Cinar"  $f/2.6$  anastigmat, complete in best English hide, brown leather velvet-lined carrying case.

Price £26 5 0

Hire purchase terms £5 down, balance 11 monthly instalments of £2 1 0

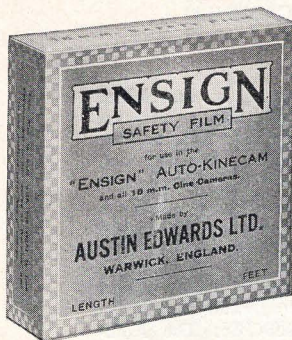

De Luxe Case to carry camera, four 100-ft. spools, spare lenses, filters, etc. . .	£4 10 0
Combined sky and colour filter, set of 3 densities . . . . .	2 5 0

## ENSIGN 16 mm. SAFETY FILM (L\*)

ENSIGN 16 mm. Safety Film is made on the separate negative and positive principle. It has great orthochromatic properties and as much latitude in exposure as ordinary roll film. The speed is considerable, and the tone value leaves nothing to be desired—a beautiful gradation from black to white being obtainable.

It is perfectly safe and will not burn.

When a film has been exposed it is sent to Messrs. Austin Edwards, Warwick, who develop the film and send you the negative together with a positive print free of charge. The negative can then be stored and a reprint as good as the original made from it at any time for a comparatively small sum.

## ENSIGN 16 mm. TRIPODS (O)

A tripod is essential for some subjects, and should be provided with panoram movement. A tripod should be used wherever possible, and is particularly useful for home productions. Brass telescope legs, revolving ball-bearing head.

Price .. .. £1 5 0

## THALHAMMER TRIPOD (L)

The Thalhammer Kino-Pano-Tilt and Tripod is suitable for use with all makes of 16 mm. sub-standard cinematograph cameras.

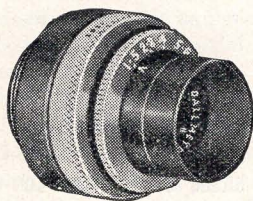

The extending legs are reversible with rubber tops and steel points to ensure a secure footing on any surfaces.

The Kino-Pano-Tilt allows a vertical tilting angle of about 130° and a complete turn of the panoram. The two locking devices are simple, and quick in action. The tripod and head will raise the camera to nearly 6 ft., remaining absolutely rigid. When closed for carrying it measures 33 in.

Kino-Pano-Tilt and Tripod .. .. £8 0 0  
Canvas Case, leather bound .. .. 1 15 0

# ENSIGN TITLE MAKER

(L\*)

AND MINIATURE PORTABLE  
STUDIO FOR USE WITH ALL  
16 mm. CINE CAMERAS

*There is no limit to the variety of titles which can be made; the operator has unbounded scope*

**G**OOD titles and sub-titles make all the difference and add much to your reputation as a successful amateur cinematographer. The Ensign Title Maker makes title making a pleasure, and allows the operator to concentrate his full energies on the composition and arrangement of the titles themselves. You only have to fit the camera to the top of the machine as shown in the illustration, and connect up to the nearest electric supply for your illumination. Exposure is made for as long as may be necessary by simply pressing the exposure knob in the usual way. The title is fully illuminated by lamps operated by one switch. Exposure and focus are fixed, there is no question of wrong exposure or bad focus—these are all fixed factors.

## OTHER USES

**CARTOONS:** The Ensign Title Maker forms a most convenient apparatus for the working out of cartoons.

**EDUCATIONAL:** Moving plans, within the limits of the scope of the base, can be photographed with great facility; also designs, small mechanisms in operation, insects in movement, etc., can be faithfully reproduced from a unique angle without difficulty. Small animals can be photographed under glass in flat boxes.

**INDUSTRIAL:** Pictures may be made of successive operations actually being carried out with the hands—the sequence of operations in assembling small parts and sub-assemblies being fitted to a main mechanism can be shown.

**CARICATURES:** It is quite easy to make moving caricatures. The apparatus can be so arranged that a model can lie with his or her head actually on the baseboard and the various movements of the face faithfully photographed in movement.

Thus it will be seen that the Title Maker is the winter evening entertainer *par excellence* for the amateur cinematographer. The outfit includes a complete set of letters in white relief. Arrangement is made, by means of interchangeable panels, for all makes of 16 mm. cameras to be used.

For use with the Ensign Autokinecam camera, including complete set of letters, two alternative backgrounds, all electric fittings, 6 ft. of flex with adapter and switch (no lamps) . . . . .

£5 5 0

Interchangeable Panels for other cameras, including fitting, extra . . . . . 5/-

No. 1 for Cine Kodak Model B; No. 2 for Cine Kodak Model BB; No. 3 for Bell Howell No. 70; No. 4 for Bell Howell No. 75; No. 5 for Victor camera. Send camera for accurate fitting if possible.

Box of Letters separately, 17/6. Extra letters, numerals, stops, etc., per doz., assorted, 9d.

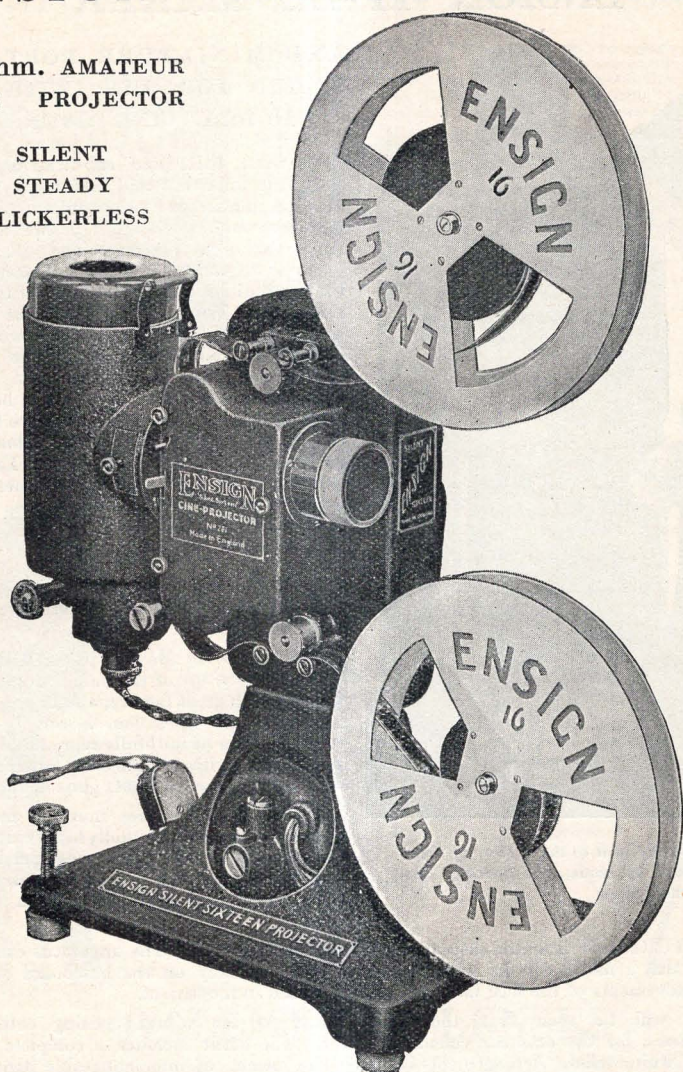

# ENSIGN "SILENT SIXTEEN"

16 mm. AMATEUR  
CINE PROJECTOR

SILENT  
STEADY  
FLICKERLESS

IT will be generally agreed that the quality of a projector for cinematograph films can be judged largely by two main points; firstly, the steadiness with which the picture is thrown on to the screen—in other words, the absence or presence of “flicker”—and, secondly, the absence of “fussiness” in working. The main object of the designers of the Ensign “Silent Sixteen” Projector, therefore, has been to produce a “rock steady,” brilliantly illuminated picture on the screen, and to make it do its work with a minimum of noise and supervision.

# ENSIGN "SILENT SIXTEEN"

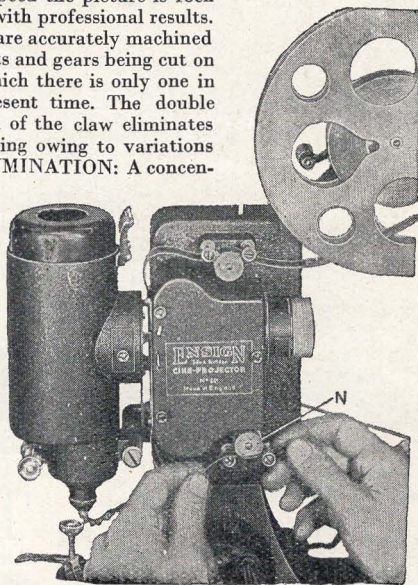

## 16 mm. AMATEUR CINE PROJECTOR

**STEADINESS:** A patented barrel type of new and novel design is the reason for the remarkable steadiness and the absence of "flicker."

Running at its proper speed the picture is rock steady and comparable with professional results.

**SILENCE:** All bearings are accurately machined and bushed, the sprockets and gears being cut on a special machine, of which there is only one in this country at the present time. The double eccentric positive action of the claw eliminates any possibility of knocking owing to variations of spring tensions.

**ILLUMINATION:** A concentrated filament lamp working in conjunction with a specially designed condenser and  $f/1.8$  projection lens, provides a brilliantly illuminated picture, easily comparable with any obtained with more expensive apparatus and powerful enough to penetrate the densest of films with ease. Although for ordinary home use a 3-4 ft. wide picture with the machine 15-20 ft. from the screen is usual, yet such is the power of the illuminant in the "Silent

Very Easy to Thread

**Sixteen"** that a beautifully illuminated picture is obtained at 40 ft. with a corresponding increase in the size of the picture. **MOTOR:** The motor is of first-class design, of ample power, and is similar to that used in projectors selling at twice the price. **MANIPULATION:** The Ensign "Silent Sixteen" is exceptionally simple to load and manipulate under normal running conditions, in a darkened room. The film can be run backwards and rewinding can be carried out by motor or hand as desired. If required the machine may be stopped and a still picture shown. **GENERAL CONSTRUCTION:** In general construction and design the projector has a very solid and handsome appearance due to the fact that it is made throughout from die castings, finished in crystalline black enamel. The workmanship throughout is of the highest order and constitutes a veritable triumph for British craftsmanship.

Complete with 400 ft. spool, lamp, resistance for use on any voltage from 100 to 250 volts, fitted with all leads, adapters and plugs, drip feed oil bottle and spare driving belt—contained in a strong well-made white wood transport box with separate partitions for resistance, spares and additional spools,

Price £26 5 0

Hire Purchase Terms (only in Great Britain)  
£5 down, balance 11 monthly instalments of £2 1 0.

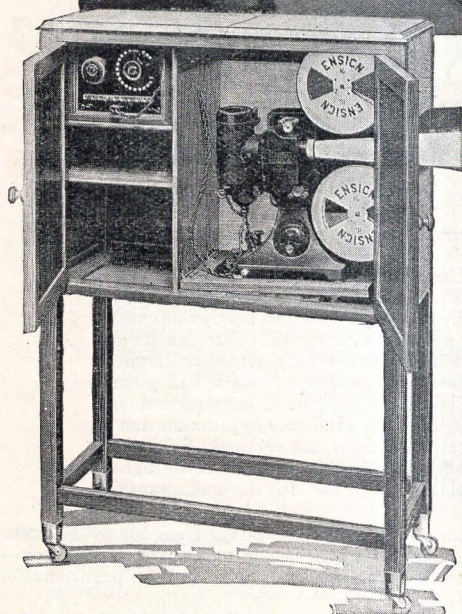

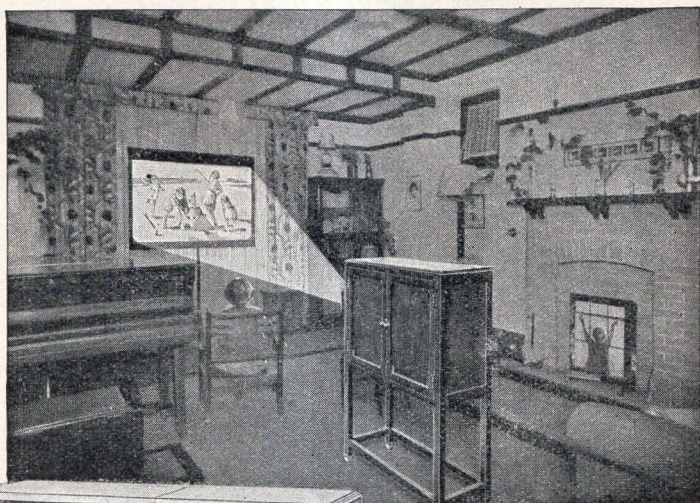

# ENSIGN "SILENT SIXTEEN" (L\*)

16 mm. AMATEUR CINE PROJECTOR

CABINET MODEL

Reg. Design No. 745657 & 746299.

**T**HE cabinet is arranged to enable the operator to sit beside it. When started the cabinet can be entirely closed (except for ventilating lid). The illustration shows the position of the projector mounted on elevating and revolving turntable.

Made throughout on absolutely first-class cabinet-making principles, the workmanship is of the best. It is fitted with handsome castors and moves smoothly and evenly in any direction. Space is provided for the storage of films and accessories. The projector stands on a hinged frame which can be elevated by a lever.

The standard model is made of oak finished dark Jacobean style. Cabinets in other styles and finishes can be supplied to special designs to match existing furniture at special prices.

**Price £37 10 0**

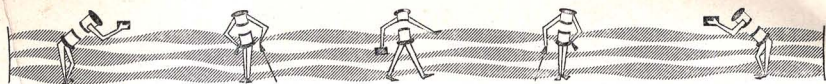

Cabinet only . . . . £12 12 0

Hire Purchase Terms (Great Britain only): £8 down and 11 monthly instalments of £2 17 0.

N.B.—The projector can be removed easily from the cabinet if desired, and the transport box as supplied with the ordinary Silent Sixteen Projector is included in the outfit.

# ENSIGN "SILENT SIXTEEN" (L\*)

AMATEUR CINE PROJECTOR

TABLE MODEL

**T**HOUGH not quite so complete and self-contained as the cabinet, the table model enables you to

have everything in readiness for a show at any time. It means that you will use your projector much more often than if you always have to get it out and fix it up.

The table model is simply the standard Silent Sixteen provided with a suitable base and elegant cover which can stand anywhere, handy when wanted and an attractive addition to the furniture of a room when not in use.

The standard model is made of oak, finished dark Jacobean style. Cabinets in other styles and finishes can be supplied to special designs to match existing furniture at special prices.

**Price £30**

Cabinet only .. .. £5 5 0

Hire Purchase Terms (Great Britain only) £6 down and 11 monthly instalments of £2 6 5

# ENSIGN "SILENT SIXTEEN"

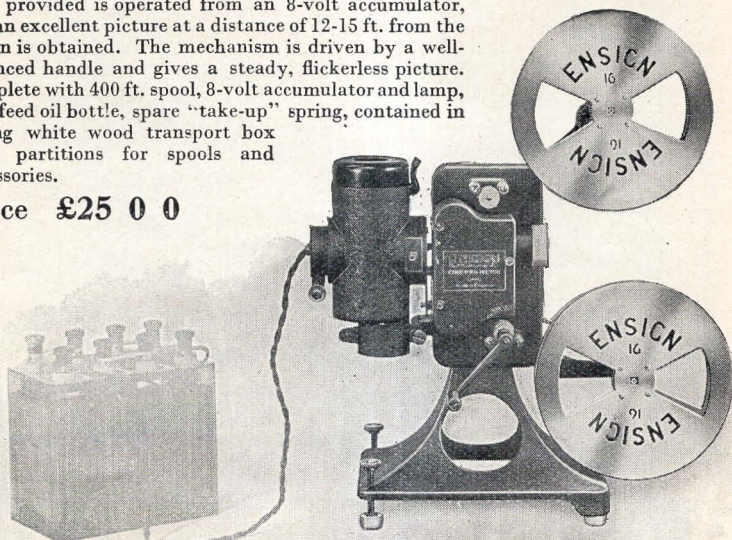

16 mm. AMATEUR CINE PROJECTOR

(L\*)

## HAND DRIVE, ACCUMULATOR LIGHTING

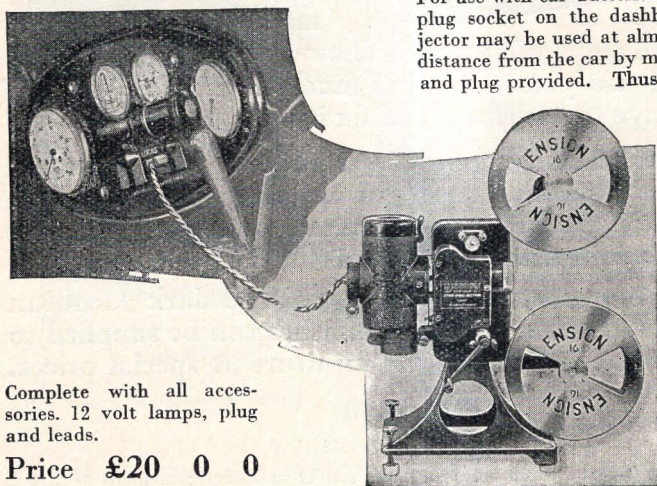

This model has been produced specially for those who have no electric current. It is particularly suitable for country and colonial use where current is unobtainable. The illuminant provided is operated from an 8-volt accumulator, and an excellent picture at a distance of 12-15 ft. from the screen is obtained. The mechanism is driven by a well-balanced handle and gives a steady, flickerless picture. Complete with 400 ft. spool, 8-volt accumulator and lamp, drip feed oil bottle, spare "take-up" spring, contained in strong white wood transport box with partitions for spools and accessories.

Price £25 0 0

## MOTOR CAR MODEL (HAND DRIVE)

For use with car batteries by connecting to plug socket on the dashboard. The projector may be used at almost any reasonable distance from the car by means of a 50 ft. lead and plug provided. Thus a good show may be given anywhere, quite independently of accumulators or electric supply.

Complete with all accessories. 12 volt lamps, plug and leads.

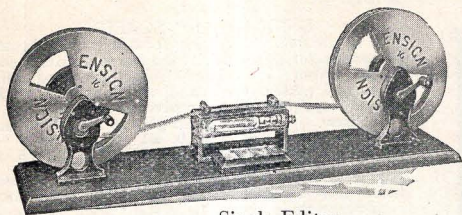

Price £20 0 0

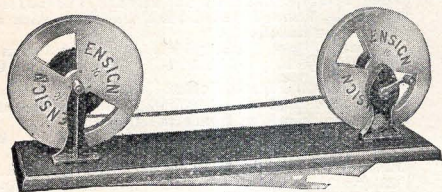

# ENSIGN "S.S." 16 mm. FILM EDITOR (L\*)

Single Editor

Rewinder

A beautifully made and extremely practical machine for editing, cutting and rewinding films. Makes a laborious job a real pleasure and enables films to be quickly, accurately and cleanly edited and spliced.

The twin model is particularly useful for Ensign film users as it enables both negative and positive films to be edited and cut at the same time.

Made throughout of metal, cast re-winder arms, geared each end and fitted with handles, film splicer, illuminated inspection box with guide rollers, and solution bottles. The whole mounted on handsome aluminium cast base, crystalline enamelled in centre, edges polished.

## PRICES (without Spools)

No. 1. Single ..	£3 17 6
No. 2. Twin Films ..	4 10 0

REWINDER ONLY—wood base, one geared end complete with splicer, white inspection panel and cement bottle. .. .. £1 10 0

## ENSIGN HUMICASES

Films should be stored properly; and to keep them in a proper condition of suppleness a moist atmosphere is essential. Ensign Humicases are well made, and have separate and removable inside frames, sand blast finish. They are provided with dampening pad and lock and key. Made in two sizes.

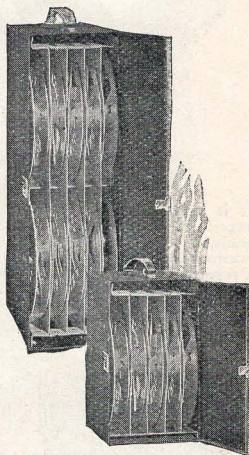

No. 1. For five 400 ft. Spools.  
Crystalline enamel  
£1 7 6

Leather covered,  
£2 10 0

No. 2. For ten 400 ft. Spools.  
Crystalline enamel  
£1 17 6

Leather covered,  
£3 10 0

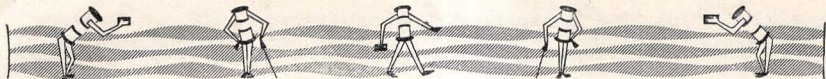

## COMBINED PROJECTOR AND CAMERA STAND

A really handsome stand which can be used either for projector or camera. The elevating and panoraming devices are unique, and control excellent. The picture is instantaneously centred on the screen, and the machine securely fixed. A stand that really adds much comfort to projecting. A convenient bracket is supplied to bring the control regulator to a convenient height to allow operator to sit.

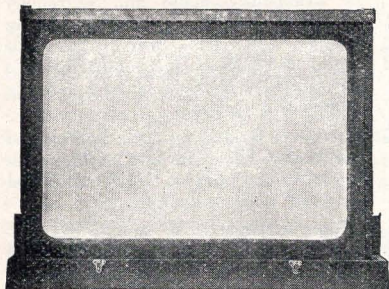

Price .. £5 15 0

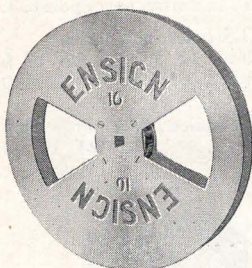

# ENSIGN "S.S." Screens Accessories (L\*)

No. 2 "S.S." Screen

400 ft. Spool.

Ensign "S.S." Lamp

## ENSIGN SPLICING OUTFIT

It is very important to be able to mend films cleanly and expeditiously when they become broken. Nothing is more annoying to an audience than to be kept waiting at the most exciting point in a film whilst the operator bunglingly carries out a repair. Guard against this contingency by providing yourself with a reliable mending and splicing outfit.

Outfit complete as shown .. .. .	15/-
Splicer only .. .. .	10/6
Film Cement, per bottle .. .. .	1/6

## ENSIGN "SILENT SIXTEEN" CARRYING CASES

These case sets are made of fibre and are extremely strong, light and easy to carry. Separate cases are provided for projector and resistance so that the load in carrying is well distributed. Two strong fasteners are provided for each projector case and a strong handle strap supporting the whole outfit from underneath ensures absolute safety.

Set of two .. .. .	£2 5 0
--------------------	--------

## ENSIGN "S.S." LUBRICATING OIL

Proper care of the projector is essential to good, steady and silent projection. This oil is specially prepared for the purpose and is provided with bottle with dripper and wood case. 1/3

No. 2, ENSIGN PORTABLE. An ingenious screen, fitted with a spring roller and folding up conveniently into a box. The screen when in use is supported by side struts, and is stretched out giving a very satisfactory flat surface. The box is well made, finished waxed black and fitted with a solid leather handle.

Sizes	24×36 in.	36×48 in.
Silvered only ..	£2 12 6	£5 7 6

No. 3, ENSIGN FRAMED SCREEN. Made up in picture frame moulding. Very suitable for permanent installation. Hangs or stands as required.

Silvered only ..	Size 24×36 in. £2 2 0
------------------	-----------------------

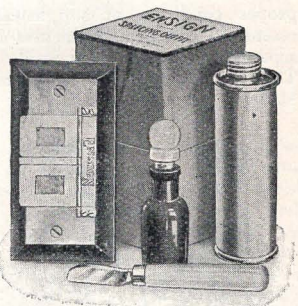

## ENSIGN SPOOLS FOR "S.S." PROJECTOR

FOR 400 FT. FILM. Very substantially made of aluminium and accurately finished. Fitted with clip for easy attachment of film 4/6

FOR 100 FT. FILM. Stamped metal, very well made, black finish .. .. . 2/6

## LAMPS FOR "SILENT SIXTEEN" (G)

The lamp used in the "Silent Sixteen" is extremely robust and should stand many hours of constant burning .. .. . 15/-

# ENSIGN MAGNAPRINT

SUPER SPEED ENLARGER

For negatives up to  $\frac{1}{4}$ -plate  $9 \times 12$  cm. and all smaller sizes. Also large portion of postcard size. Maximum size of enlargement,  $20 \times 16$  in.

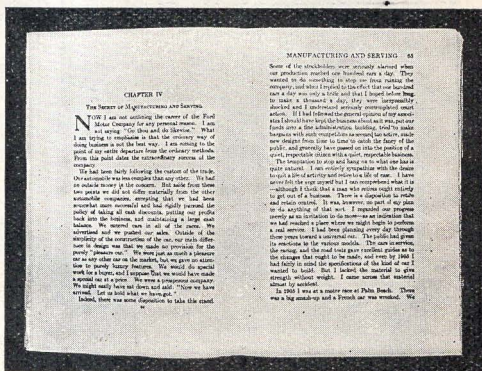

# ENSIGN MAGNAPRINT

## SUPER SPEED ENLARGER

**T**HE Ensign Magnaprint Enlarger is fitted with a condenser and optical system scientifically designed and accurately carried out. Using a 150-watt opal lamp in conjunction with this optical system, a most effective and intense diffused illumination is secured, making possible really short exposures for even the largest sizes without any loss of quality. It is, therefore, the perfect enlarger for rapid work combined with quality, a result unattainable with other enlargers without resort to retouching or large accumulations of electric lamps generating great heat.

A most useful accessory is the reproduction plate holder (extra), which enables the enlarger to be used as a camera for copying, or for photographing small objects. This feature is extremely useful for commercial work.

Courtesy of Messrs. W. Heinemann.

Reproduced from a direct photograph of Mr. Henry Ford's book, "My Life and Work," by means of the reproduction plate holder.

# ENSIGN DARK-ROOM SUNDRIES

ENSIGN COMBINATION ELECTRIC (O\*)  
DARK-ROOM LAMP AND PRINTER

For negatives up to postcard size. The opening and closing of the door in the base (provided for a printing frame), switches the light off and on.

Wooden base and collapsible metal body with double thickness of ruby and yellow fabric, flex, adapter and lamp-holder 1 1/6

## ELECTRIC LIGHT COVERS (O\*)

In nickelled screw fitting for converting ordinary filament lamps into dark room lamps.

RUBY—No. 24, small .. ..	4/6
No. 24a, large .. ..	4/6
ORANGE—No. 25, small .. ..	4/6
No. 25a, large .. ..	4/6

NON-ACTINIC GLASS .. .. Ruby, sq. ft., 2/-; Orange, sq. ft. 2/6 (O)

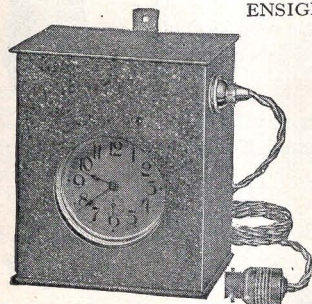

NON-ACTINIC FABRIC, Ruby, Orange or Yellow .. .. per yd. 2/6 (O)

NIGHT LIGHTS with metal cover, No. 1, 2d.; No. 2, extra large .. 3d. (O)

ENSIGN BURNING OIL, does not smoke, nor smell, nor char the wick, 6 oz. tins 9d. (O\*)

ELECTRIC LIGHT EXTENSION. Lampholder, adapter and 12 ft. flex .. .. 3/6 (O)

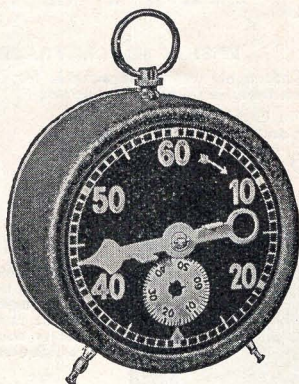

## ENSIGN DARK-ROOM LAMP-CLOCK (O\*)

A combination electric dark-room lamp and clock for timing purposes. Metal body with crystalline finish, and a wall hanger

A 4 in. opening allows the clock to be seen through the ruby glass—this is facilitated by the reflected light given by the lamp (not supplied). The clock has a 4-in. dial and a superior movement.

Complete with clock, lampholder, plug adapter and 6 ft. flex, 21/-

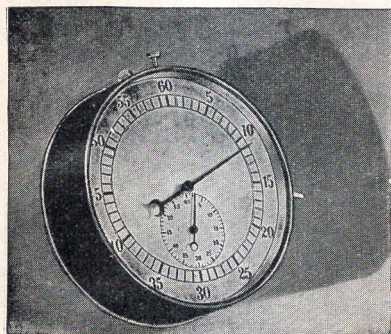

## NUBIAN DARK-ROOM CLOCK (O\*)

Indicates seconds and minutes on separate dials. Clearly defined hands and figures, easily readable in red light.

Very useful for gaslight paper exposures, enlarging and tank development. Rings alarm at hour .. .. 12/6

## LANDELL DARK-ROOM CLOCK

Grey enamelled case .. .. 25/-

## "HOLBORN" TIMER (O)

The "Holborn Timer" is something new in Dark Room clocks—a Timer on the stop watch plan. It is of a good size (8 1/2 in. diameter) and the markings are bold and easily read.

The face is marked seconds 60 of which are recorded by the main hand. A smaller hand and dial records 60 minutes.

The Time is started by raising a lever at the side and stopped by depressing it. The hands are returned to zero by depressing the control on the top of the Timer. This obviates any mental calculations and avoids confusion.

There is a single winding key at the back and one winding lasts 36 hours.

Without Luminous dial .. ..	32/6
With Luminous dial .. ..	47/6

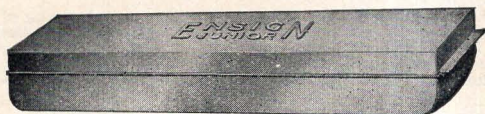

# ENSIGN DEVELOPING TANKS

O\*

## ENSIGN JUNIOR DISH FOR DEVELOPING ROLL FILMS IN DAYLIGHT

There is no drudgery in operating this dish as it does not take the backing paper of the film into the solution.  
Made of strong metal with aluminium finish outside and an anti-sulphuric coating inside, which renders the dish impervious to chemical action.

All fittings are substantially made and the daylight loading of films is only a matter of seconds .. 4/9  
Developing powders .. per packet of six 1/-  
Acid-hypo for fixing .. per 4 oz. tin 7d. Celluloid tumbler measure, 2 oz. size .. 1/2  
Film clips for drying .. .. 2d.

## CARBINE TANK FOR DEVELOPING ROLL FILMS IN DAYLIGHT

Overcomes difficulties, eliminates mess, and adds an additional pleasure to photography. From start to finish the process is practically automatic, carried out entirely in daylight and is very economical. The Ensign Carbine Tank has no changing box or apron. It requires no particular care, and will invariably produce the best negative obtainable from any particular film.  
Solid brass, black enamelled and plated.

Model A for 1 1/2 x 2 1/2 spools	(1J)	..	..	..	..	..	..	15/-
" B " 2 1/4 x 3 1/4 "	(24B)	..	..	..	..	..	..	15/-
" C " 2 1/4 x 4 1/4 "	(24)	..	..	..	..	..	..	21/-

" E " 4 1/4 x 3 1/4 "	(34)	..	..	..	..	..	..	30/-

## ENSIGN CONCENTRATED TANK DEVELOPING POWDERS

Thoroughly tested and suitable for all films. Develop perfect unstained negatives in ten minutes (temperature 65 deg.)

For Carbine Tanks—

	Packet	Box of 6
A and B, to make 27 ounces ..	4d.	1/6
C, requires two packets ..	5d.	2/-
D and E require two packets ..	6d.	2/6

## KLIMAX TANKS FOR DEVELOPING PLATES IN DAYLIGHT

The whole process of development, fixing and washing is easily carried out without the aid or inconvenience of a dark room (except for loading). Clean crisp negatives of good printing density and free from light fog, are obtained. Made in brass, heavily nickel-plated, and develops six plates at a time. It offers many advantages, the most important being "solution room" by which even development is always assured.

Size	Fluid capacity	To hold 6 plates
3 1/2 x 2 1/2 ..	15 OZS.	.. .. 18/6
4 1/2 x 3 1/2 ..	17 OZS.	.. .. 20/-
5 1/2 x 3 1/2 ..	21 OZS.	.. .. 22/6

Developing Powders for any size tank, per box of 6 packets, .. 1/6

## FILM-PACK TANK

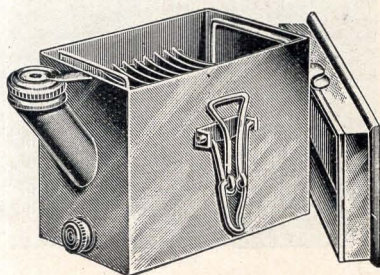

For the daylight development of film packs and plates. Loading only takes a few minutes in the dark-room. Other operations can be done in daylight. Fitted with water-tight lid for reversing tank. The films are inserted in carriers and left there until dry. Constructed of strong copper and brass, heavily nickel-plated with loose rack.

For film packs or twelve plates.

No. 1 ..	3 1/2 x 2 1/2 in.	.. .. 24/-
No. 2 ..	4 1/2 x 3 1/2 in.	.. .. 25/-
No. 3 ..	5 1/2 x 3 1/2 in.	.. .. 27/-

Film-pack and print dryer for this tank, 5/-.

Developing Powders, box of 6 packets.  
No. 1, 1/6; No. 2, 2/3; No. 3, 3/-.

## TRIDENT DEVELOPING WEIGHT

Facilitates the development of roll films in lengths. Made in porcelain and shaped in the form of a trident, under the central bar of which the film is drawn through the developer.

No. 1.  
Takes films up to 3 1/2 in. 2/6

No. 2.  
Takes films up to 5 in. 3/-

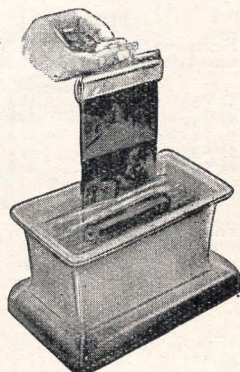

This price does not include dish.

## 'EASY' DEVELOPING DISH

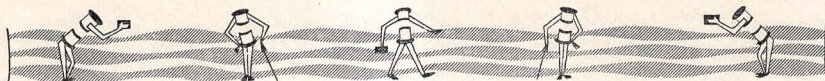

(L)

An improved dish by which roll films can be developed easily, using one hand only.  
Needs only 1 1/2 oz. developer for small spools and 3 oz. for 1/2-plate or postcard sizes.  
Can also be used for fixing and washing.

For all sizes of spools up to postcard .. 3/6

# ENSIGN NEGATIVE FILES

(O\*)

## "FULL VIEW" NEGATIVE ALBUM

The safe storage of film negatives is always a minor problem. Here is a new way of overcoming it. One that makes it simpler, and safer, since the negative cannot slip out and yet it is always instantly accessible.

It is a real utility article by which the finding of negatives is a matter of seconds. The grey leaves have cut-out centres with three slots to retain the negative in position; the main portion of the negative is immediately at view and can be quickly identified. Bound strongly in imitation lizard, stitched and guarded to open perfectly flat. The leaves numbered 1 to 50, with Index, and elastic band to cover.

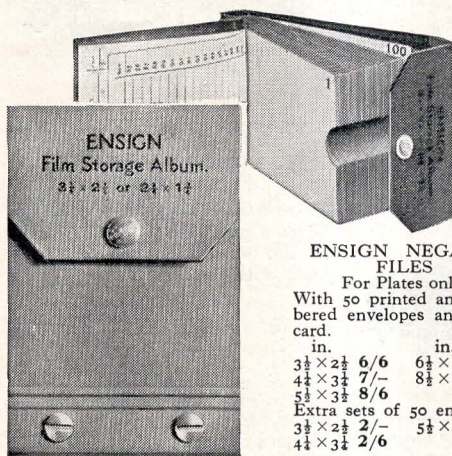

FOR  
50  $3\frac{1}{2} \times 2\frac{1}{4}$  NEGATIVES,  
2/-

## ENSIGN FILM STORER

For protecting the delicate surfaces of film negatives. The transparent paper is folded in such a manner as to form a separate division for each negative. The 100 divisions are strongly bound into grained card covers with snap fastener and index.

No. 215. For  $3\frac{1}{2} \times 2\frac{1}{4}$  negatives .. .. 1/6  
No. 216. For  $4\frac{1}{2} \times 2\frac{1}{4}$  negatives .. .. 2/-

## ENSIGN FILM STORAGE ALBUMS

Contains 100 numbered transparent envelopes and index, bound by loose-leaf binder into stout art linen covers. Each envelope is interchangeable and removable. Negatives can be found instantly and moved without interference to others.

No. 15. For negatives  $3\frac{1}{2} \times 2\frac{1}{4}$  or V.P. 2/6

Ebonite .. .. 7d.

Glass, 6 in. 2d. 8 in. 3d. 12 in. 4d.

Tablet Crusher

# ENSIGN MARSHALL TRANSPARENT PERMANENT OIL

## PHOTO COLOURS (O)

A medium for tinting photographs, prints, photo canvas (Art Canvas), opal miniatures, magazine pictures, etc.

The colours are so transparent that it is only necessary to apply an even wash of the colour. The lights and shades of the print will shine through the colour and give the appearance of actual shading in applying the colours.

The tubes are so marked and the directions so complete that users will have no difficulty in doing work entirely to their satisfaction.

No brushes are required. Simply apply the colour to the print with a tuft of cotton and allow the colour to run past the outlines.

Any part not coloured satisfactorily may be cleaned off.

Mixing is unnecessary with any set except the No. O. Full directions with each set.

The permanence of the colours is assured by the fact that tinted pictures have been exposed to the direct action of the sun for months without the slightest change having occurred.

### LIST OF COLOURS

Check. \*Flesh. Lip. Cobalt Violet. \*Verona Brown. \*Chinese Blue. \*Cadmium Yellow  
\*Raw Sienna. Cadmium Orange. \*Carmine. Sepia. Tree Green. \*Viridian. \*Oxide Green.  
Neutral Tint. Flake White. Ivory Black. Ultra Blue. Payne's Gray. Burnt Sienna.

### PRICES

STUDENT'S COMPLETE SET.—8 colours as marked (*) in $\frac{1}{2} \times 2$ tubes. Prepared Medium Solution (P.M.S.), Cotton and Skewers	12/6

## ENSIGN "OZAPHANE" FLEXIBLE SLIDES (O)

Ensign Ozaphane slides are as easy to make as a print from a photographic negative; they require no highly skilled knowledge to produce them; they can be made in a few minutes.

Just think for one moment of the advantages of "Ozaphane" slides! A drawing, graph, chart, or some complicated diagram can be drawn on to unsensitised "Ozaphane" with Indian ink; this diagram can be reproduced in any quantity by contact with the sensitised "Ozaphane." If you have lantern slides in existence and require further copies, it is unnecessary to have negatives, simply expose positive lantern slide to "Ozaphane" and result is a positive ready to show on screen; this can be done in half-an-hour. If individual diagrams are required, unsensitised "Ozaphane" can be used in lantern, and can be coloured for greater effect.

### PRICES

COMPLETE OUTFIT for printing OZAPHANE slides, including sensitised and unsensitised material, printing frame, fumidor box, Indian ink, mapping pen, and glass frame carrier	12/6
OZAPHANE MATERIAL—	
Sensitised, per packet of one dozen, size $3\frac{1}{2} \times 3\frac{1}{2}$ in., for lantern slides	1/9
Unsensitised, per packet of fifty, size $3\frac{1}{2} \times 3\frac{1}{2}$ in., for lantern slides	9d.
Sensitised in sheets 1 yard square	£1 0 0
Unsensitised in sheets, size $31\frac{1}{2}$ in. by $35\frac{1}{2}$ in.	1/-

EASI-FLASH PHOTO KIT. Contains metal flashlamp, measure, tapers and powder . . . . . 2/6

ENSIGN-AMATEUR. Flashpowder is fired by a percussion cap. Made of metal . . . . . 3/6

SPREDLITE. Gives a powerful flash. Complete with percussion caps . . . . . 8/6

FLEET. A collapsible lamp that has not failed yet. The cap cannot become displaced for it is held against a metal bridge by well-sprung metal rod. The handle and tray are detachable. Substantially made of nickel-plated brass. In neat leather sling case with box of caps, 18/9

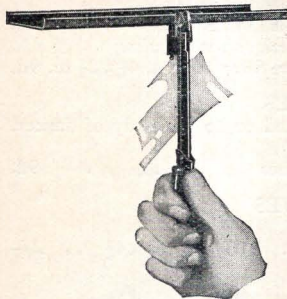

FLASH CAPS. For igniting flash-powder. . . . . Box of 50 1/-

MAGNESIUM RIBBON, in 1/4 and 1 oz. coils. . . . . per oz. 2/-

FLASHMETERS (Magnesium Ribbon), PISTOL, 9d.; ROUND, 7d.

## JOHNSON'S FLASH POWDER

Small, 1/-; Large, 1/9; 1 oz. tins, 2/6; Flashbox, 6d.

## GEKA "FUMOSIN" FLASH POWDER

A new flash-powder of high actinic value, and absolutely smokeless. This is explained by the oxidated materials of Fumosin being so heavy as to obviate mixing with the air.

It is indispensable for halls, hospitals, museums and such places, where smoke must be avoided.

(O)

## ENSIGN COMPOSING RULE

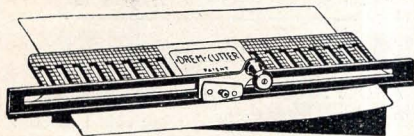

A transparent celluloid rule graduated in inches and centimetres, reading both right and left from zero in the centre of the rule. Enables a print to be centred on to a mount with accurate uniform margins. Large, easily read markings with hole for hanging.

7/6

## DREM CUTTING MACHINE

Hitherto it has been almost impossible to secure precise and absolute clean cuts by the usual cutting machines. The Drem cutting machine permits, due to its peculiar construction, the easiest cutting of paper, cloth, leather, etc., with greatest exactitude and smoothness. The Drem cutting machine permits exactness of the cutting line to one 4/1000 of an inch and is applied like a ruler. The cut-outs and squares of the flat supporting base allow the judging of parallel or right-angle cuts. The flat section of the ruler is held down by one hand. The other hand grips the handle and makes the cut with moderate pressure. After completing the cut, pressure is relaxed and the knife raises automatically from the paper. In this raised position it is returned to the starting point.

relaxed and the knife raises automatically from the paper. In this raised position it is returned to the starting point.

Cutting length, 9 in. . . . . 12/6

Cutting length 16½ in. . . . . 16/6

## TRIMMERS

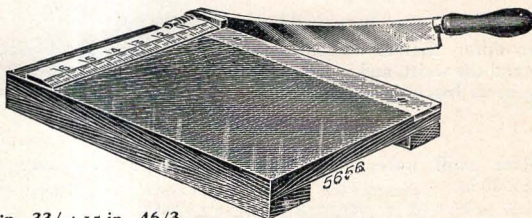

ENSIGN. Strong, serviceable, polished hardwood table on solid wood supports with graduated rule. The Sheffield steel cutting blade gives a clean cut edge. 5 in., 6/6; 7 in., 8/6; 9 in., 12/-

JAYNAY No. 1. Polished wood baseboard, guide rule and tempered steel cutting blade. 5 in., 7/-; 7 in., 10/6; 9 in., 15/-

# PASSE-PARTOUT SUNDRIES

(O\*)

Actual size.

## NUACE MOUNTING CORNERS

There are no slots or slits. A NuAce corner is secured to each corner of the print by turning the corners and damping them. You then moisten the four corners of print and gently press into album.

Style—I Brown, II Grey, III White, IV Black, V Gilt.

Per packet of 100 Corners (Gilt 50 only) .. .. . 6d.

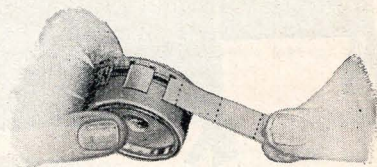

## ENSIGN MOUNTING STAMPS

A clean and quick method of print mounting. A stamp damped on one side is placed in each corner of back of print, then the other side of stamp is damped and pressed into contact of album or mount.

The adhesive used will secure thin or thick paper or card perfectly flat.

REELS. 480 perforated stamps on metal-ended spools .. .. . 6d.

PADS. 495 perforated stamps in sheets of 45 4½d.

## ENSIGN PASSE-PARTOUT BINDING

A British Passe-Partout Binding in a wide range of selected colourings, grains and shades. In 12-yard reels  $\frac{3}{8}$  in. wide; heavily coated with permanently adhesive binder cement.

Style I

## THE SAFETY (Unbreakable)

Patent 242,845

A passe-partout that can be sent through the post without special packing.

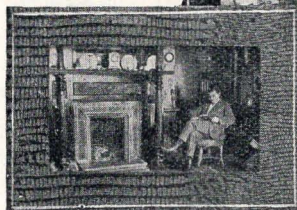

The unique method of binding the black-diced material without a join does away with any cockling of the clear celluloid front.

The white matt opening has a neat plate mark surround.

Photographs are quickly inserted by means of the self-sealing back—simply moisten and stick down.

The patent self-locking strut is convertible for oblong or upright pictures. Black only.

No.	For prints.	Outside size.

\*Sample Sets on application

# 72 negatives in every bottle—

One bottle of "Azol" will develop at least seventy-two quarter-plates and get the best out of every one. "Azol" gives a new meaning to amateur photography—it is so easy to use and so satisfactory that work with it is a real pleasure. "Azol" is economical, highly concentrated and highly efficient.

"Azol" Time and Temperature Development Tables enclosed with each bottle ensure accuracy in development.

## AZOL

THE ACTIVE DEVELOPER

*A powerful liquid developer for all makes of*  
**PLATES, FILMS, BROMIDE  
AND GASLIGHT PAPERS**

3-oz. bottle makes 75 ounces developer.

**Price 2/- each**

*Manufactured by*

# JOHNSON & SONS

MANUFACTURING CHEMISTS LTD  
HENDON, LONDON, N.W.4

# JOHNSON'S CHEMICALS

## AZOL—THE CORRECT DEVELOPER (o)

A highly concentrated liquid of great power, suitable for all purposes. The developer that has simple and accurate time and temperature tables. Requires the addition of water only.

3 oz. bottle, to make 75 ozs. .. 2/- .. 8 oz. .. 4/- .. 16 oz. .. 7/-

## AMIDOL-JOHNSON'S\* (N)

Of exceptionally high quality and possesses distinctive properties that make it the developer for Bromide paper.

10 gramme, 1/-; 1 oz., 2/-; 4 oz., 5/-; 8 oz., 9/-; 1 lb., 16/8

## METOL-JOHNSON'S\* (N)

Can be used in any published Metol formulæ. either as a single developer or combined with Hydroquinone or Pyro.

10 gramme, 1/3; 1 oz., 2/6; 4 oz., 5/6; 8 oz., 10/6; 1 lb. 20/-

## HYDROQUINONE-JOHNSON'S\* (N)

Gives a clean, powerful solution, splendid for lantern plates. Hydroquinone when combined with Metol-Johnson's gives the most efficient developer for plates and papers.

1 oz., 1/3 .. .. . 1 lb., 8/6

## ACID PYROGALLIC JOHNSON'S\* (N)

(Pure Crystals) .. .. . 1 oz., 1/8; 1 lb., 14/6

## JOHNSON'S PACKETS (O\*)

Developers, etc.

Amidol, each packet makes 4 to 10 oz. .. Box of 6 packets, 2/-  
Metol-Quinol (10 oz.), Hydroquinone (8 oz.), Gaslight (6 oz.), Pyro-Metol (4 oz.), Pyro-Soda (8 oz.), or Gold Toning and Fixing (4 oz.)

Box of 6 packets, 1/6

## TONING PACTUMS

(5 oz. packets).

Blue, Green, Red or Sepia .. .. . 3/- each

## JOHNSON'S SCALOIDS (o)

Compressed Tablets in air-tight glass tubes, accurate and easily dissolved. Vedol,

Amidol, Gaslight, Hydroquinone, Metol-Quinol, Metol, Pyro-Metol or Pyro-Soda per box 1/6

Gold Toning and Fixing or Intensifier (redevelop.) .. .. . 2/-

Reducers, Hypo Fixing or Acid Fixing .. .. . 1/-

## JOHNSON'S DEVELOPERS (o)

ONE SOLUTION, for Plates, Films and Papers.

4 oz bottle to make 28 oz., 1/- 8 oz. bottle to make 56 oz. .. .. 1/9

TWO SOLUTION. In bottles. Pyro-Soda. Metol-Quinol, Pyro-Metol Hydroquinone.

In 2-oz. pairs making 1 pint, 1/6. In 4-oz. pairs making 2 pints .. 2/6

## JOHNSON'S GASLIGHT DEVELOPER (o)

A concentrated solution for Gaslight Papers.

4-oz. bottle to make 10 to 20 oz., 10 1/2 d. 8-oz. bottle to make 20 to 40 oz., 1/3

## ENSIGN CONCENTRATED TANK DEVELOPING POWDERS

Thoroughly tested and suitable for all films. Develop perfect unstained negatives in ten minutes (temperature 65°).

	Packet.	Box of 6.
For Carbide A and B Tanks .. .. .	4d.	1/6
" " C .. .. .	5d.	2/-
" " D and E .. .. .	6d.	2/6

# ENSIGN FILM-SLIDES

(SAFETY FILM)

A NEW IDEA  
WHICH PUTS  
SUMMER  
SUNSHINE  
INTO YOUR  
SNAPSHOTS  
IN WINTER

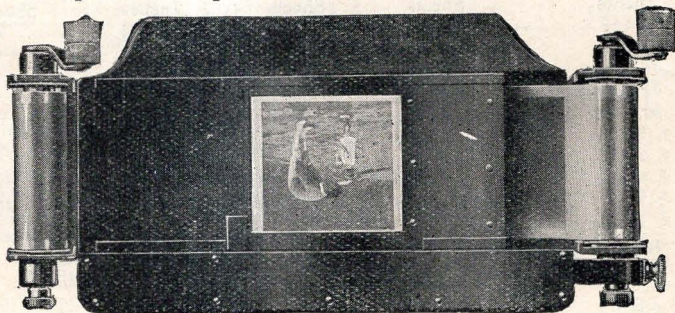

**E**NSIGN Film-Slides are your snapshots printed in positive on a strip of film for showing in any projection lantern. It hardly costs you any more to have your snapshots printed as Ensign Film-Slides than as ordinary prints, and nothing like as much as an enlargement. But see how different they look when screened a hundred times as large, infinitely brighter, and with all the contrasts of the summer sunshine! Every detail is faithfully enlarged to a size all can see and enjoy at the same-time.

Have your snapshots printed as Film-Slides and really enjoy them all the year round. The size of the picture on the film is  $2\frac{1}{8}$  in.  $\times$   $2\frac{1}{8}$  in., and Film-Slides can be made direct from the popular  $3\frac{1}{4}$  in.  $\times$   $2\frac{1}{4}$  in. film, by contact.

## HOW TO SHOW FILM-SLIDES

To show Ensign Film-Slides all you need is an ordinary lantern, the Ensign Film-Slide Carrier, and a screen (a light wall will serve this purpose if no screen is available). Manipulation is extraordinarily simple; you just load the lantern in rather the same way as you load a roll-film camera, and then wind each successive picture into position.

THE  
ENSIGN  
FILM-  
SLIDE  
CARRIER

## ENSIGN FILM-SLIDES

### ENSIGN FILM-SLIDES FOR EDUCATIONAL PURPOSES

**E**NSIGN Film-Slides are ideal for teaching. At a minimum cost, sets of pictures, diagrams, drawings, plans, etc., can be produced, and shown with an ease and simplicity which hitherto has been unobtainable. Not only are Ensign Film-Slides extremely cheap to produce, but they are extremely portable. A roll of 24 pictures only weighs 1 ounce, and can be sent through the post for 1½d. with absolute safety.

### HOW TO GET FILM SLIDES PRINTED

Select the negatives and put them in the order in which you wish the pictures to appear on the roll. A series of snapshots of the same subject in different positions should be arranged to give correct continuity. When you have arranged these to your satisfaction, number each negative, pass them to your photographic dealer, who will send them to The Ensign Snapshot Service to be printed.

### Prices (O)

Six Ensign Film-Slides, printed on one roll, complete with winding bobbin, ready for use in the lantern .. .. . 3/6  
Extra pictures (on same roll) .. each 6d.

Note.—The maximum number of Film-Slides which can be accommodated on one spool is 24.

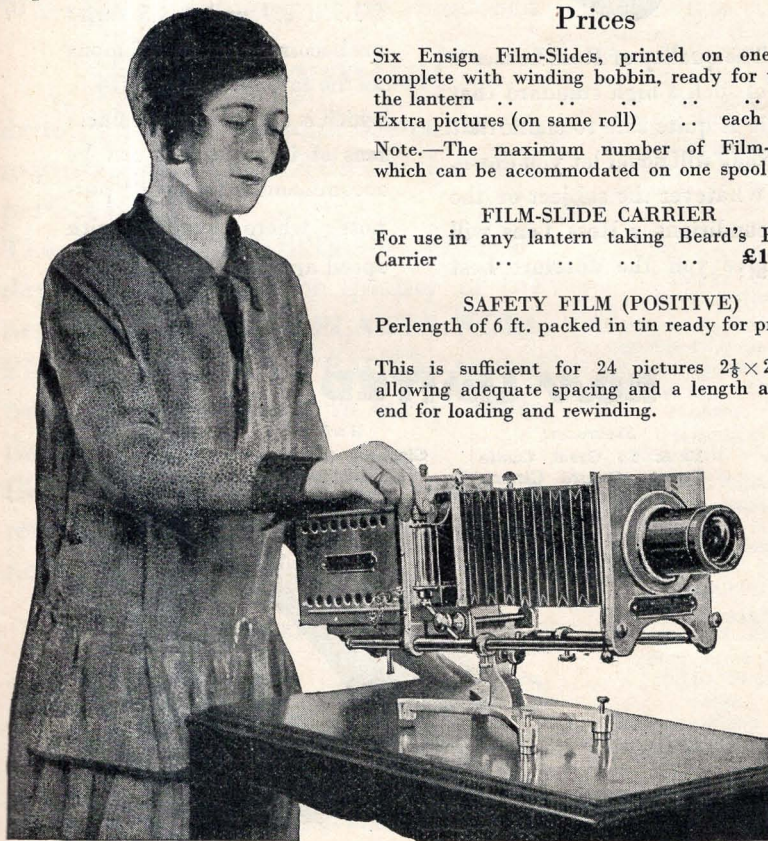

### FILM-SLIDE CARRIER

For use in any lantern taking Beard's Eclipse Carrier .. .. . £1 5 0

### SAFETY FILM (POSITIVE)

Perlength of 6 ft. packed in tin ready for printing 3/6

This is sufficient for 24 pictures  $2\frac{1}{8} \times 2\frac{1}{8}$  in., allowing adequate spacing and a length at each end for loading and rewinding.

The Ensign film-slide carrier in use

# ROSS

**THE LENS THAT NEVER  
" LETS YOU DOWN "**

The quality of Ross Lenses is of such a high standard that it is quite safe to claim that they will never let you down. Whatever the subject or the conditions, a Ross Lens will give you the absolute best

that can be obtained. With a Ross there will be no wasted opportunities, no wasted materials, but invariably a much better result than you thought possible. The Xpres f/1.9, f/2.9 and f/3.5 series are becoming as world famous as the favourite Xpres f/4.5, which is admittedly the finest lens of its type, and can be recommended for every purpose where quality with speed are essential.

Elliott & Sons, Ltd., Barnet, Herts.

# THE DALLMEYER "SNAPSHOT" CAMERA

*Nothing to Learn  
Nothing to Forget*

Results of professional standard can be obtained by users without any knowledge of photography.

Photographs can be taken under practically any conditions with but the simplest adjustment which occupies but two or three seconds.

The Camera is fitted with the famous Dallmeyer  $f/6$  Anastigmat Lens, neat, compact, weighs but 11 oz., and can be carried in the coat pocket. Takes standard  $3\frac{1}{4} \times 2\frac{1}{4}$  Film Packs, 6 or 12 exposure.

Price £5 . 5 . 0

Complete in Morocco leather carrying case.

## The DELUXE MODEL

incorporates all the excellent features of the standard model, but is provided with many refinements, and a finish that gives it the appearance of a camera costing twice the price, being leather-covered, fitted with carrying handle and auto-catch for releasing back for inserting film pack. Fitted with brilliant finder, and when closed a special lip joint renders it dust-proof.

Price £8 . 8 . 0

Complete in Velvet-lined Pig-skin Case.

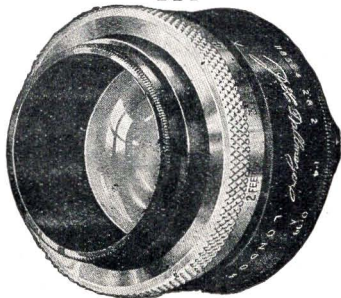

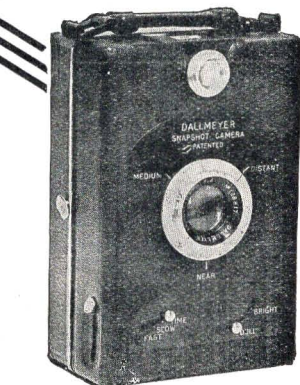

## The NEW DALLMEYER $f/0.99$ LENS

represents one of the greatest inventions in the history of cinematography and is designed for use on Amateur Cine Cameras employing 16 mm. sub-standard film. Cinematography is possible all the year round as the enormous aperture of  $f/0.99$  is 1,200 per cent faster than an  $f/3.5$ .

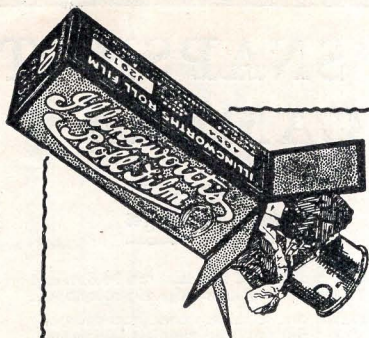

Supplied in Micrometer Focusing Mount with Iris Diaphragm ready to screw into the ordinary Lens socket of the Ensign "Autokinecam."

Also supplied for use on "Filmo" "Victor," and other Amateur Cine Cameras.

J. H. DALLMEYER LTD., 31 MORTIMER STREET, W.1  
WORKS:—HIGH ROAD, WILLESDEN. N.W.10

## For Clear Sparkling Snaps

insist on

# Illingworth's

## ROLL FILMS

Clear pictures. Pictures that ask to be enlarged. Pictures that bring back the scene to you vividly because of the wonderful detail.

Have such pictures—merely by saying “Illingworth’s” when you buy a film. Illingworth’s are specially made to help you when the conditions and lighting are against you.

# ILFORD

## MANUFACTURES

have an unrivalled reputation of over fifty years and constant attention is given to maintaining their high standard of excellence.

### **ILFORD PANCHROMATIC PLATES and FILMS**

are sensitive to ALL colours and their panchromatic qualities are superior to all others. Their high speed and general excellence are unrivalled. H. and D. 400.

### **ALSO ILFORD SOFT GRADATION PANCHROMATIC PLATES**, H. and D. 700 to Daylight; 2000 H. and D. to Half-Watt Light.

*"PANCHROMATISM."* The wonderful Ilford Booklet explains their use, as also that of the Ilford Colour Filters. Price 6d.; post-free in the United Kingdom, 8d.

### **ILFORD GOLDEN ISO-ZENITH PLATES, H. & D. 1400**

The fastest in the world. Colour-sensitive. Fine gradation.

### **ILFORD AUTO-FILTER PLATES, H. & D. 400**

are the best for all-round general work. They are colour-sensitive but do not require a colour filter. Of easy manipulation.

**INTONA**, the Ilford Self-Toning Paper, gives the most perfect prints, ranging from brown to purple with hypo only. The easiest and best of all self-toning papers.

**ILFORD ROLL FILMS**, for all subjects, all weathers, and all climates, the film of British manufacture in the cheerful red carton, of very high speed and great latitude, made in sizes to fit all roll-film cameras. Popular sizes also supplied in Panchromatic Roll Film.

**FILM PACKS** supplied with ordinary and Panchromatic Film.

*The Ilford Roll-film booklet is called "The Lure of the Camera, or Timely Tips for Snapshots." Get a free copy, also one of the complete Ilford Price List.*
