

Kilfitt

KILFITT lenses and optical products are distinguished by their custom quality and have, therefore, found ready acceptance by well-known professional photographers, picture magazines, and motion picture studios.

Kilfitt lenses can be readily adapted to practically all miniature cameras or 16 and 35mm motion picture cameras with interchangeable lenses.

**KLING
PHOTO**

KILFITT and KILAR are Trade Marks registered with the U.S. Patent Office, and with U.S. Customs at all ports of entry to prevent un-authorized importation.

KILFITT LENS AND ADAPTER GUIDE

Kilfitt lenses can be used with all the cameras listed below, or with cameras having similar lens mounts. To find correct adapter for any camera-and-lens combination, locate camera in left vertical column; locate Kilfitt lens in top horizontal lines. The Catalog Number and Code Word of the correct adapter will be found at the intersection of the two columns. Write to us for adaptations to cameras not listed here.

* Sold only by Arriflex Corporation

Note 1: 40mm Makro-Kilar lenses are supplied only complete with mounts for cameras listed. Specify camera and code word when ordering.

Note 2: 'tum-' adapters have Variable Extension with an auxiliary helical mount for focusing from **infinity to 1:1 ratio**; built-in tripod socket; click stops for turning camera horizontal or vertical while on tripod. 're-' adapters do not have variable extension, nor tripod socket.

Note 3: DeLuxe Adapters for general photography; lens can be focused from infinity to its nearest engraved distance. **Special Features:** 'kil-' adapters (and kitin) have slot with holder for 2x2" gelatine filters; built-in tripod socket; click stops for turning camera horizontal or vertical while on tripod.

Note 4: Variable Extension 'Macro' adapters with an auxiliary helical focusing mount for all around photography. Lenses can be focused from **infinity to closer distances than engraved** on lens distance scales, extending the near focusing range of the 135mm f/3.8 Kilar to 24½" (Reproduction Ratio 1:2.6) 150mm f/3.5 Kilar to 27½" (Reproduction Ratio 1:2.7) 300mm f/5.6 Tele-Kilar to 72" (Reproduction Ratio 1:4) 'tul-' adapters have the same **Special Features** as listed under Note 3.

Note 5: Flange Adapters, locked to the lens with overlapping locking ring; lens can be focused from infinity to nearest engraved distance. Except for Hasselblad 1000F (anhas), and Visoflex I (anso), all Flange Adapters have slot with holder for 2x2" gelatine filters and click stops for turning camera vertical or horizontal while the lens is mounted on tripod.

Kilar lenses are distinguished not only by their fine optical performance, but also by their light weight and superb mechanical quality and finish. F-stop pre-selectors facilitate convenient focusing and fast shooting; focusing and aperture controls with large rings assure positive operation even with gloved hands. All Kilars have 'short barrels,' thus permit adapters, variable extension mounts, or reflex hous-

ings to be inserted between lens and camera without affecting the full focusing range from infinity to near distance. Any one Kilar may be used with many different cameras by simply using proper adapter—therefore, owners of several still and/or motion picture cameras enjoy the economy of using just one lens for all cameras! See the complete camera and adapter guide on the opposite page.

135mm (5 1/4") f/3.8 KILAR.

Fine quality long focus lens for portraits and medium distance shots, at a moderate price. Helical focusing mount. Threaded for use with 'kil' or 'tul' adapters, or reflex housings. Sup-

plied complete with deep, screw-in lens shade, front and rear lens caps.

Cat. No. 12101 [1786-33]
[3M2777-70] (without adapter) **129.50**

150mm (6") f/3.5 KILAR.

The large aperture of this popular long focus lens provides ample speed for color photography under all conditions in sports, press, and feature photography. Helical focusing mount. Threaded for use with 'kil' or 'tul' adapters, or reflex housings. Supplied complete with deep, screw-in lens shade, front and rear lens caps.

Cat. No. 12102 [21109-67]
[3M6998-70] (without adapter) **164.50**

Cat. No. 12583 Series 7 filter adapter
for 150mm Kilar [763-17] **4.75**

Cat. No. 12402 Leather Case for
150mm Kilar [178-00] **12.00**

300mm (12") f/5.6 TELE-KILAR.

Compact telephoto construction and light weight make this lens ideal for hand-held "long shots" in every field of tele-photography. Helical focusing mount. Threaded for use with 'kil' or 'tul' adapters, or reflex housings. Supplied complete with deep, screw-in lens shade, front and rear lens caps.

Cat. No. 12103 [31131-67]
[3M71118-50] without adapter **197.50**

Cat. No. 12581 Series 8 filter adapter
for 300mm Tele-Kilar [863-17] **4.75**

Cat. No. 12403 Leather Case for
300mm Tele-Kilar [2710-00] **15.00**

300mm (12") f/4 PAN-TELE-KILAR.

Duo-Range, high speed telephoto lens of unique design with an extreme focusing range from infinity to 5 1/2 feet, giving full coverage even to 2 1/4 x 2 1/4" format. Parallel focus with left and right focusing knobs and detachable fast-focus lever. Helical extension sets close-up focusing range (10 to 5 1/2 ft.) of lens. Built-in tripod socket in rotatable mount with set screw. Overlapping locking ring for use with 'an' flange adapters and reflex housings.

Supplied with deep, screw-in lens shade and front lens cover.

Cat. No. 12107 Complete with DeLuxe
Carrying Case [21296-33]
[3M82266-70] (without adapter) **444.50**

Cat. No. 12240 Lens Cradle for using
300mm Pan-Tele-Kilar with Bolex H16
RX camera. Available on special order
[8331-65] **47.50**

400mm (16") f/5.6 FERN-KILAR.

Popular medium speed long focus lens at a moderate price, for nature and expedition photography and for special press and feature assignments. Helical focusing mount. Built-in tripod socket, and slot with holder for 2x2" gelatine filters. Overlapping locking ring for use with 'an' flange adapters and reflex housings. Supplied complete with deep, screw-in lens shade and front lens cover.

Cat. No. 12106 [82169-67]
[3M72152-70] (without adapter) **254.50**

Cat. No. 12410 Travel Case with
hinged cover and carrying handle,
for 400mm Fern-Kilar [0713-33] **20.00**

Cat. No. 12241 Lens Cradle for using
400mm Fern-Kilar with Bolex H16 RX
camera. Available on special order
[9331-65] **47.50**

Cat. No. 12404 Leather Case for
400mm Fern-Kilar [6925-33] **38.00**

400mm (16") f/4 SPORT-FERN-KILAR.

Large lens elements incorporating rare earth glass give this outstanding long focus lens extra 'speed' and superior correction over the entire film area to make it especially useful for color photography under difficult light conditions. Parallel focus with left and right focusing knobs and detachable fast-focus lever. Built-in tripod socket. Slot with holder for 2x2" gelatine filters. Overlapping locking ring for use with 'an' flange adapters and

reflex housings. Supplied with deep, screw-in lens shade and front lens cover.

Cat. No. 12108 Complete with DeLuxe Carrying Case [74323-00] [3M73290-70] without adapter) **484.50**

Cat. No. 12242 Lens Cradle for using Sport-Fern-Kilar with Bolex H16 RX camera. Available on special order [7331-33] **47.00**

600mm (24") f.5.6 SPORT-FERN-KILAR

Despite its extremely long focal length, this lens boasts a relatively large aperture making it the perfect choice for wildlife and other long-distance photography. Parallel focus with left and right focusing knobs and detachable fast-focus lever. Two built-in tripod sockets for perfect balance of lens and camera even for longer exposure times. Slot with holder for 2x2" gelatine filters. Overlapping locking ring for use with 'an' flange adapters and reflex housings. Supplied with deep, screw-in lens shade and front lens cover.

Cat. No. 12105 Without carrying case [82399-67] (without adapter) **599.50**

Cat. No. 12411 DeLuxe Travel Case with hinged cover and carrying handle. This case is urgently suggested for convenient carrying and protection of this valuable lens. It is always shipped with the lens, unless order states: DO NOT SUPPLY CASE. [5116-67] **25.00**

Cat. No. 12242 Lens Cradle for using Sport-Fern-Kilar with Bolex H16 RX camera. Available on special order. [7331-33] **47.00**

MAKRO-KILAR LENSES.

This exclusive Kilfitt design permits continuous focusing, with perfect lens-to-film plane parallel, from infinity to extreme close-ups down to as close as 2 inches, thus eliminating the need for bellows focusing attachments or other close-up focusing devices.

In addition to f-stop and distance scales, Makro-Kilar lens mounts have separate scales indicating the reproduction ratio and, for

extreme close-ups, the exposure correction factors. F-stop pre-selectors facilitate convenient focusing and fast shooting. Deep lens shades incorporate holders for regular Series 5 (40mm Makro-Kilar) or Series 6 (90mm Makro-Kilar) filters. To order Makro-Kilar lens for specific camera, see complete camera and adapter guide.

40mm f/2.8 MAKRO-KILAR

Besides offering an extreme focusing range, this critically corrected lens also provides the advantages of a medium wide angle for photography at normal distances, yielding "wide view" negatives and color transparencies. Lenses are supplied only complete with attached adapter for specific cameras. **Please specify camera and Code Word listed in the adapter guide when ordering lens.**

Cat. No. 12123 40mm f/2.8 Makro-Kilar, Model E. Infinity to 4 inches (1:2). Complete with attached camera adapter. [9779-67] [3M8771-70] **119.50**

Cat. No. 12124 40mm f/2.8 Makro-Kilar, Model D. Infinity to 2 inches (1:1). Complete with attached camera adapter. [9993-00] [3M8883-70] **139.50**

Cat. No. 12407 Leather Case for 40mm Makro-Kilar [124-00] **6.00**

90mm(3 1/2") f/2.8 MAKRO-KILAR

Superb optical design including one bi-spherical element gives this remarkable lens outstanding correction up to the full 2 1/4 x 2 1/4" format. Its 90mm focal length makes it useful as a medium "telephoto" lens, while its unique double helix in combination with the 'tum' Variable Extension Adapters extend its focusing range from infinity to 5-1/8 inches for a reproduction ratio of 1:1 with 35mm cameras. (The 90mm Makro Kilar for Hasselblad 1000F focuses from infinity to 8 inches; reproduction ratio 1:1.7)

- Cat. No. 12122 90mm f/2.8 Makro-Kilar with threaded mount for use with 'tum' variable extension adapters and reflex housings. [07133-00] [3M37119-70] (without adapter) 199.50
- Cat. No. 12125 90mm f/2.8 Makro-Kilar for Hasselblad 1000F; complete with attached mount [29153-00] [3M67137-70] 229.50
- Cat. No. 12408 Leather Case for 90mm Makro-Kilar [116-00] 9.00
- Cat. No. 12540 Hasselblad 1000F mount to convert 90mm Makro Kilar (12122) for use with Hasselblad 1000F camera [4320-00] 30.00
- Cat. No. 12541 Threaded mount to convert Hasselblad 90mm Makro-Kilar for use with 'tum' adapters and reflex housings [5320-00] 30.00

KILFITT LENS ADAPTERS (In numerical sequence).

To find adapter required for a specific camera-and-lens combination, refer to the complete Lens Adapter Guide shown elsewhere in this Section.

12638	tumci	3823-33 35.00
12639	tumal	3923-33 35.00

Note: While 'an' flange adapters, with their extra large "throats" are especially designed for the larger lenses, owners of Kilar lenses with threaded mounts may use their 'kil' adapters also for the larger lenses by adding the flange adapter 'ansic' (12512).

SEPARATE, INTERCHANGEABLE. ADAPTER PARTS.

Kilfitt adapters, except the '2500' series, consist of two parts locked together by three screws which wedge into a v-shaped circular groove for accurate fitting:

1. The rigid or variable **extension unit** which holds the Kilfitt lens;
2. The threaded or bayonet **connecting ring** which fits on the camera.

Both are easily interchangeable (requiring only a small screwdriver) so that the owner of several different cameras usually needs to buy only one complete adapter for any Kilfitt lens, adding merely the inexpensive **connecting rings** to use the same lens with other cameras!

CAMERA CONNECTING RINGS FOR KILFITT ADAPTERS

12641	Connecting Ring "-ca" for Canonflex	412-40	3.60
12642	Connecting Ring "-co" for Contarex	422-40	3.60
12643	Connecting Ring "-ex" for Exa, Exakta, Topcon	432-40	3.60
12644	Connecting Ring "-ol" for Minolta	442-40	3.60
12645	Connecting Ring "-mi" for Miranda	452-40	3.60
12646	Connecting Ring "-ni" for Nikon Reflex	462-40	3.60
12647	Connecting Ring "-pa" for Contax D, S, Edixa Reflex, Hexacon, Pentacon, Pentax, Praktica, Praktiflex	472-40	3.60
12648	Connecting Ring "-ci" for C mount motion picture cameras	482-40	3.60
12649	Connecting Ring "-al" for Alpa	492-40	3.60

EXTENSION UNITS FOR KILFITT ADAPTERS, without camera connecting rings

12600	DeLuxe Extension "kil-" for 135 and 150mm Kilar, 300mm Tele-Kilar	6014-26	21.40
12610	Flange Extension "an-" for 300mm Pan-Tele-Kilar, 400 and 600mm Fern and Sport-Fern Kilars	6114-26	21.40
12620	Variable Extension "tul-" for 135 and 150mm Kilar, 300mm Tele-Kilar	6227-60	41.40

KILARSCOPE PRISM REFLEX HOUSING AND ACCESSORIES

For use with Leicas I-IIIg, M2-M3, or similar cameras.
 Complete with 5x adjustable magnifying eyepiece and release cable.

12213	rexop	Kilarscope I-IIIg for 90mm Makro-Kilar	1262-33	3M1956-10	93.50
12220	rezwi	Spacer to use Kilarscope 12212 or 12213 with 135-150mm Kilar or 300mm Tele-Kilar	693-17	—	4.75
12210	repor	Kilarscope I-IIIg complete with 'rezwi'	1665-50	3M1559-27	98.25
12212	repm	Kilarscope M2/3 for 90mm Makro-Kilar	2666-53	3M2660-30	99.80
12214	repmo	Kilarscope M2/3 complete with 'rezwi'	3669-70	3M3663-47	104.55
12509	anspi	Flange Adapter to use Kilarscopes 12212 or 12213 with 300-600mm Pan-Tele, Fern- and Sport-Fern-Kilar lenses	2111-67	—	17.50
12508	zidem	Bayonet Adapter to use Kilarscopes 12210 or 12213 with Leica M2-M3	974-20	—	6.30
12503	eisre	Helical mount adapter to use front assembly of 90mm f/4 Elmar with Kilarscopes 12212 or 12213 (focus infinity to 6 ft.)	738-40	—	12.60
12504	rezle	Adapter to use short mount Leica lenses: 135mm f/4 Elmar or f/4.5 Hektor, 200mm and 400mm Telyt, with Kilarscope 12212 or 12213 (focus up to infinity)	123-67	—	5.50
12221	remus	Soft rubber eye cup for Kilarscope	112-10	—	3.15
12223	kulei	Housing-and-shutter release for Leica I-IIIg (replacement)	804-20	—	6.30
12225	kulem	Housing-and-shutter release for Leica M-2-M3 (replacement)	714-20	—	6.30
12224	kucon	Housing-and-shutter release for Contax (replacement)	664-20	—	6.30

EXTENSION TUBES (threaded with standard Leica thread)

12571	sagro	Set of 3 long extension tubes (45-60-90mm)	489-67	14.50
-------	-------	--	--------	-------

FILTER HOLDERS AND ADAPTERS

12583	kifis	Series 7 filter adapter for 150mm Kilar	673-17	4.75
12581	kifip	Series 8 filter adapter for 300mm Tele-Kilar	923-17	4.75
12582	kifix	Small Metal Frame holder for 2x2" gelatine filters; fits slot of adapters	235-30	7.95
12585	spofi	Large Metal Frame holder for 2x2" gelatine filters; fits slot of lenses	335-97	8.95

NOTE: No filter adapters are needed for Makro-Kilars: 40mm Makro-Kilars accept Series 5; 90mm Makro-Kilar accepts Series 6 filters at base of lens shade.

LENS CASES

12407	lekma	Leather Case for 40mm Makro-Kilar	324-00	6.00
