mm PHOTOGRAPHY

YEARS OF
LEADERSHIP

Exakta... The World's Most Versatile System of Photography

The Exakta VX 1000 and the Exakta 500, incorporating the latest features in 35mm SLR design, offer the world's most versatile camera system. The Exakta I, introduced in 1933, was the first 35mm single lens reflex camera. So sound was the basic design of the first Exakta, that even the new XV 1000, with its instant return mirror 26 linear shutter speeds, and full flash synchronization, can use virtually all of the accessories developed during the 35 years of Exakta's phenomenal growth. Today, more than a million Exakta users are insured against created obsolescence.

During the last decade, practically all major manufacturers of 35mm photographic equipment have entered the SLR field, making Exakta the most copied camera in existence.

Exakta's reputation in general photography is rivaled only by its own unique position in many fields of science and medicine. The extremely wide range of Exakta accessories far exceeds that of any competitor, and Exakta cameras can be found in leading hospitals and laboratories throughout the world. In all fields of research and investigation, from astronomy to zoology; in industry, government and the arts; wherever photographic information is needed, Exakta is there. Giant telescopes, microscopes, and numerous other scientific instruments, all become Exakta accessories through the use of the many adapters and couplings in the Exakta System of Photography.

Exakta VX 1000 with Instant Return Mirror

Instant Return Mirror

Knife for cutting film in camera

Rapid rewind

Slow shutter speed dial with variable delay self timer

Specifications

Lens

50mm f2.0 Automatic Zeiss Pancolar; 6 elements in 4 groups, 47° angle of view; minimum focusing distance 1.7 feet.

50mm f1.9 Automatic Schneider Xenon, 6 elements in 4 groups, 47° angle of view; minimum focusing distance 1.5 feet.

Lens Mount Exakta Bayonet.

Lens Accessory Size 49mm screw in.

Shutter Focal Plane, 12 seconds to 1/1000 sec., with T, and B.

Flash Synchronization FP, F and X (1/50 sec.)

Film Advance Single stroke, rapid wind.

Accidental double exposure prevention, with provision for intentional double exposure if photographer wishes.

Dimensions 6 in. wide x 3 3/4 in. high x 2 in. thick.

Weight Body only 24 1/2 ounces.

Exakta Accessories

The accessories in the Exakta System of Photography reflect the same soundness of design and development as that which characterizes Exakta cameras. Mechanical reliability, an Exakta hallmark, is evident in each component.

Two-in-one Double Bayonet Ring

Small Bellows Attachment

Reversal Ring

Extension Tube Set

Extension Release (Cobra)

Microscope Adapter Deluxe Model II

Stock No.

Two-in-One Double Bayonet Ring

Short Extension Tube. Provides minimum of 5mm lens extension. Used for close-up photography. (Used to decrease minimum focusing distance of lens.)

14-7763

7.95

Reversal Ring Used with rear part of extension tube set. Lens is used in reverse position for close-ups.

14-7660

4.95

Extension Release (Cobra) Used to operate automatic feature of camera lens when employing extension tubes or bellows attachment. Separate couplings for long and short lens barrels.

14-7729

2.95

Small Bellows Attachment Variably adjustable unit used as a lens extension for close-up photography. Dual track and calibrated in centimeters.

14-7693

25.95

Stock No.

Extension Tube Set Consists of 1 pair of bayonet adapter rings, 10mm long, and three extension tubes of 5mm, 15mm, and 30mm. Usable in various combinations for close-up photography.

14-7682

14.95

14-7671

24.95

Microscope Adapter Deluxe Model II Lens Magnifier (Magnear) with Ground Glass Screen Fits in place of finder hood, and acts as focusing magnifier for close-up photography and photo-micrography. Uses special Top Lens or any standard Exakta lens as eyepiece.

14-7659

16.95

Lens Magnifier (Magnear) without focusing screen

14-7637

13.95

Top Lens for Magnear Specially designed for use with Magnear. 5X image magnification.

14-7648

16.00

Closal Attachment Double cable release. Used with bellows attachment or extension tubes. Coordinates the automatic diaphragm mechanism of the camera lens with shutter release button.

14-7626

Exakta Versal Reproduction Assembly

The Exakta System of Photography owes much of its popularity and success to the versatility of its accessories. The Versal Reproduction Assembly has been extremely instrumental in extending Exakta's capabilities into many areas of science, medicine and industry. A multi-purpose system of close-up and reproduction equipment, the Versal Assembly is useful in copying from both opaque and transparent subjects; in macro-

photography; in photomicrography, and in all other applications requiring precise close-up adjustments.

The entire Versal Assembly may be purchased as a unit, providing the ultimate in reproduction equipment when used with an Exakta camera or as separate components, allowing you to build your system as dictated by your requirements.

Versal Reproduction Assembly Complete (items 1 through 6 below)

Versal Reproduction Assembly Components. (May be purchased separately)

(1) Copy Stand with baseboard, post and adjustable track.

Stock No.
14-7877 **179.50**

(2) Focusing sliding arm with calibrated scale. Used with bellows and other components of the Versal Assembly to permit precise movements of camera without moving stand or subject material.

14-7800 **93.00**

(3) Bellows top attachment. Attaches to sliding arm (2) to form a complete bellows assembly.

14-7811 **25.00**

14-7822 **35.00**

(4) Swing angle bracket.

Attaches to sliding arm, allowing both precise camera movements and camera rotation from vertical to horizontal or vice versa.

Stock No.

14-7844 **20.00**

(5) Transparency copy attachment.

Attaches to sliding arm. May be used with bellows attachment or with extension tubes. Used for copying from color or black and white transparency or negative.

14-7833 **25.00**

(6) Tripod plate. Attaches to swing angle bracket. Allows use of camera and swing angle bracket on regular tripod.

14-7855 **9.00**
