

INDOORS...OUTDOORS...IN THE SKY...ON THE SEA...

GRAFLEX *Super* SPEED GRAPHIC 45

makes tough assignments easier!

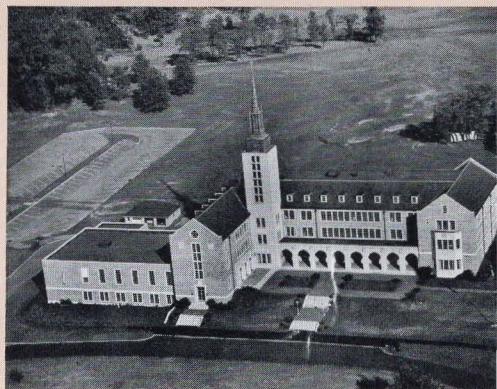

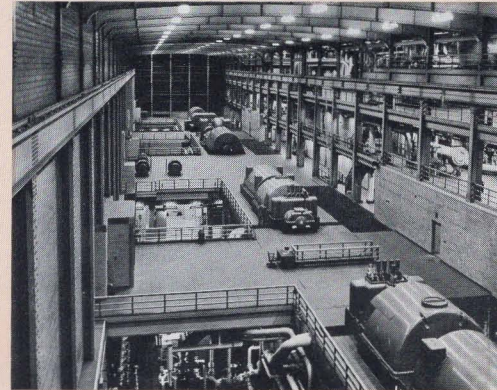

In the studio or on location, the Super Speed Graphic 45 is first choice of professionals whose skill and imagination demand a camera of unlimited versatility. *No other single camera can do so much so well.* No "gadgets" just all the proven, functional features most-wanted by professionals, plus some exclusive Graflex refinements that make the difference between "ordinary" and Prize Winning Pictures! Turn the page for full details

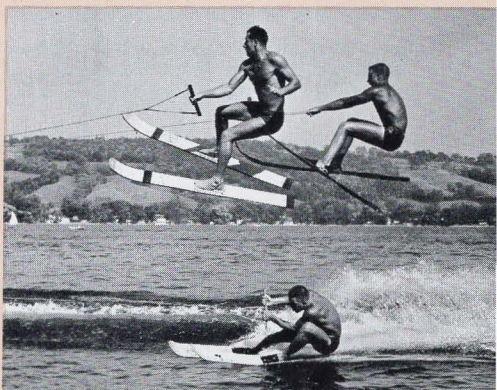

GRAFLEX

Prize-Winning Cameras

IMPROVED FRONT STANDARD
makes maximum use of existing light—achieves extreme depth of field at wide apertures.

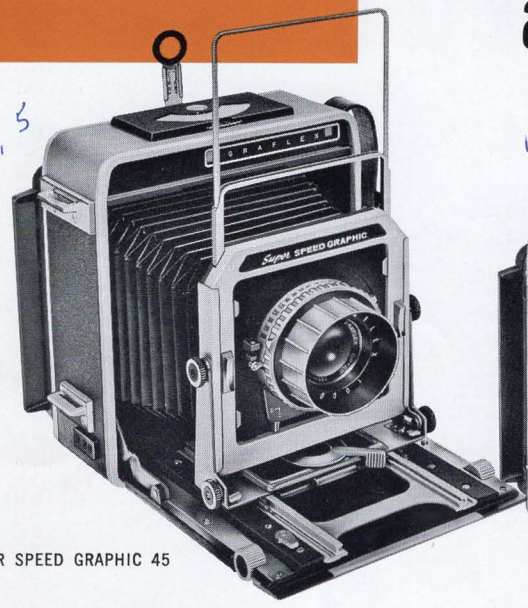

GRAFLEX 1000 SHUTTER
unexcelled for accuracy and efficiency at all speeds through 1/1000 sec. results in exposures of spectacular sharpness of detail.

Super SPEED GRAPHIC 45 and Super GRAPHIC 45

497.5

SUPER SPEED GRAPHIC 45

482.35

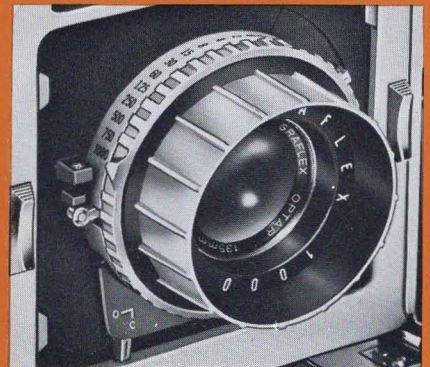

SUPER GRAPHIC 45

THESE ARE THE FEATURES...

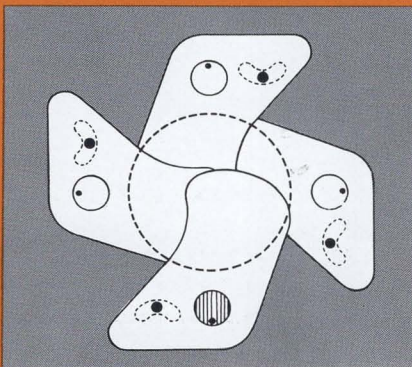

that make the Super Speed Graphic 45 and the Super Graphic 45 the greatest Graflex cameras ever built—designed by men who *know photography*, and carefully constructed by craftsmen who are proud of the products they make. *Both cameras are identical except for the shutter* The Super Graphic comes equipped with your choice of shutter-lens combination listed in the specifications on the last page; the Super Speed Graphic has the revolutionary new Graflex 1000 Shutter as standard equipment.

THE REVOLUTIONARY NEW GRAFLEX 1000 SHUTTER

ACCURATE!

Completely new concept and design assures absolute accuracy at every speed through 1/1000 second, plus perfect synchronization when using flash—electronic or flashbulbs.

EFFICIENT!

Superior orbital "Rapid-Fire" shutter action eliminates conventional lag and drag. Opens and closes three times faster than any other between-the-lens shutter—freezes each detail of action shots with spectacular sharpness of detail.

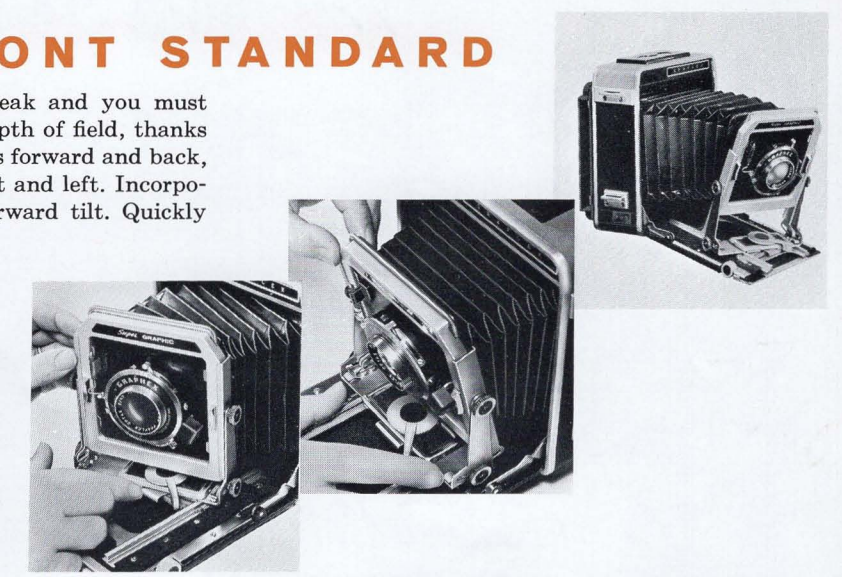

CONVENIENT!

All controls visible from top, and all with click stops for perfect "touch control." Easiest shutter in the world to cock—just turn the man-size combination cocking ring—lensshade. Exclusive "Quick-Check Lever" opens shutter and diaphragm fully while you check focus and composition without disturbing original settings!

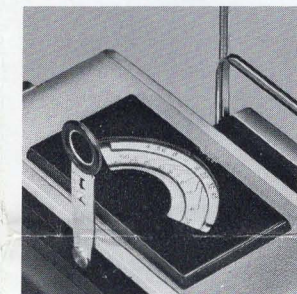

BOTH CAMERAS HAVE ALL THESE OUTSTANDING FEATURES...

IMPROVED FRONT STANDARD

Even when existing light is relatively weak and you must shoot "wide open," you'll get amazing depth of field, thanks to the improved front standard, which tilts forward and back, swings right and left, rises and shifts right and left. Incorporates drop bed, too, for a total of 30° forward tilt. Quickly and easily corrects image distortion and parallelism; permits better composition.

EXCLUSIVE! BUILT-IN AUTOMATIC FLASH EXPOSURE CALCULATOR

Big, easy-to-read dial on top of camera—always visible from taking position. Just dial the "Flash Guide Number" and focus on the subject. Automatically shows camera-to-subject distance and correct aperture setting for perfect exposure!

era-to-subject distance and correct aperture setting for perfect exposure!

NO OTHER CAMERA SO VERSATILE!

Use any type of film you want—black-and-white or color—and switch instantly from one to another Super Graphic accessories accept single sheets, film packs, 120 rolls and Polaroid (10-second) films. You can even use coated glass plates for scientific research requiring superfine grain or unusual light sensitivity

LITE-TITE REVOLVING GRAFLOK BACK

Back revolves continuous 360° in either direction *without fogging film!* Permits instant switching from horizontal to vertical format *without moving camera*. Lets you insert and remove film holders from any direction—a real boon when working in cramped quarters, and especially for left-handed photographers (hand strap and flash attach to either side of camera).

SWITCH LENSES, TOO!

Built-in Graphic Rangefinder instantly cam-coupled with full range of interchangeable accessory lenses from 90mm to 380mm. 65mm supplied with own focusing mount.

THE CAMERA PROFESSIONAL SKILL DESERVES

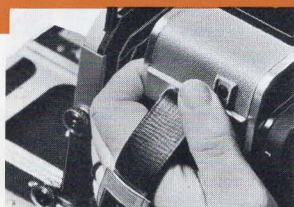

GRAFLEX

Super SPEED GRAPHIC 45 and *Super* GRAPHIC 45

EXCLUSIVE! COMPLETELY CONCEALED COMPLETELY SELF-CONTAINED ELECTRICAL SYSTEM

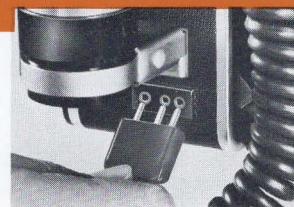

Where did the dangling wires go? Answer: They're all *inside the camera*—wires, batteries, capacitors and solenoid—all out of the way and completely protected against damage and corrosion.

Smooth!
PUSH-BUTTON

ELECTRICALLY OPERATED SHUTTER

No more blurred pictures from pulling triggers or pushing levers—just touch the conveniently located shutter release button, and a built-in solenoid trips the shutter with instant, feather-smooth action. Permits hand-held exposures even at $\frac{1}{8}$ second!

**PLUG-IN
CONVENIENCE!**

Three-prong, polarized flash connector cord plugs into side of camera body—no dangling wires to get in the way of lens or rangefinder. Camera can be opened and closed without disconnecting flash attachment.

COMPLETE ACCESSORIES

Full line of useful Graflex accessories—custom matched for use with the Super Speed Graphic 45 and the Super Graphic 45—available at all Graflex Dealers. Ask for descriptive brochure.
