

Vivitar®

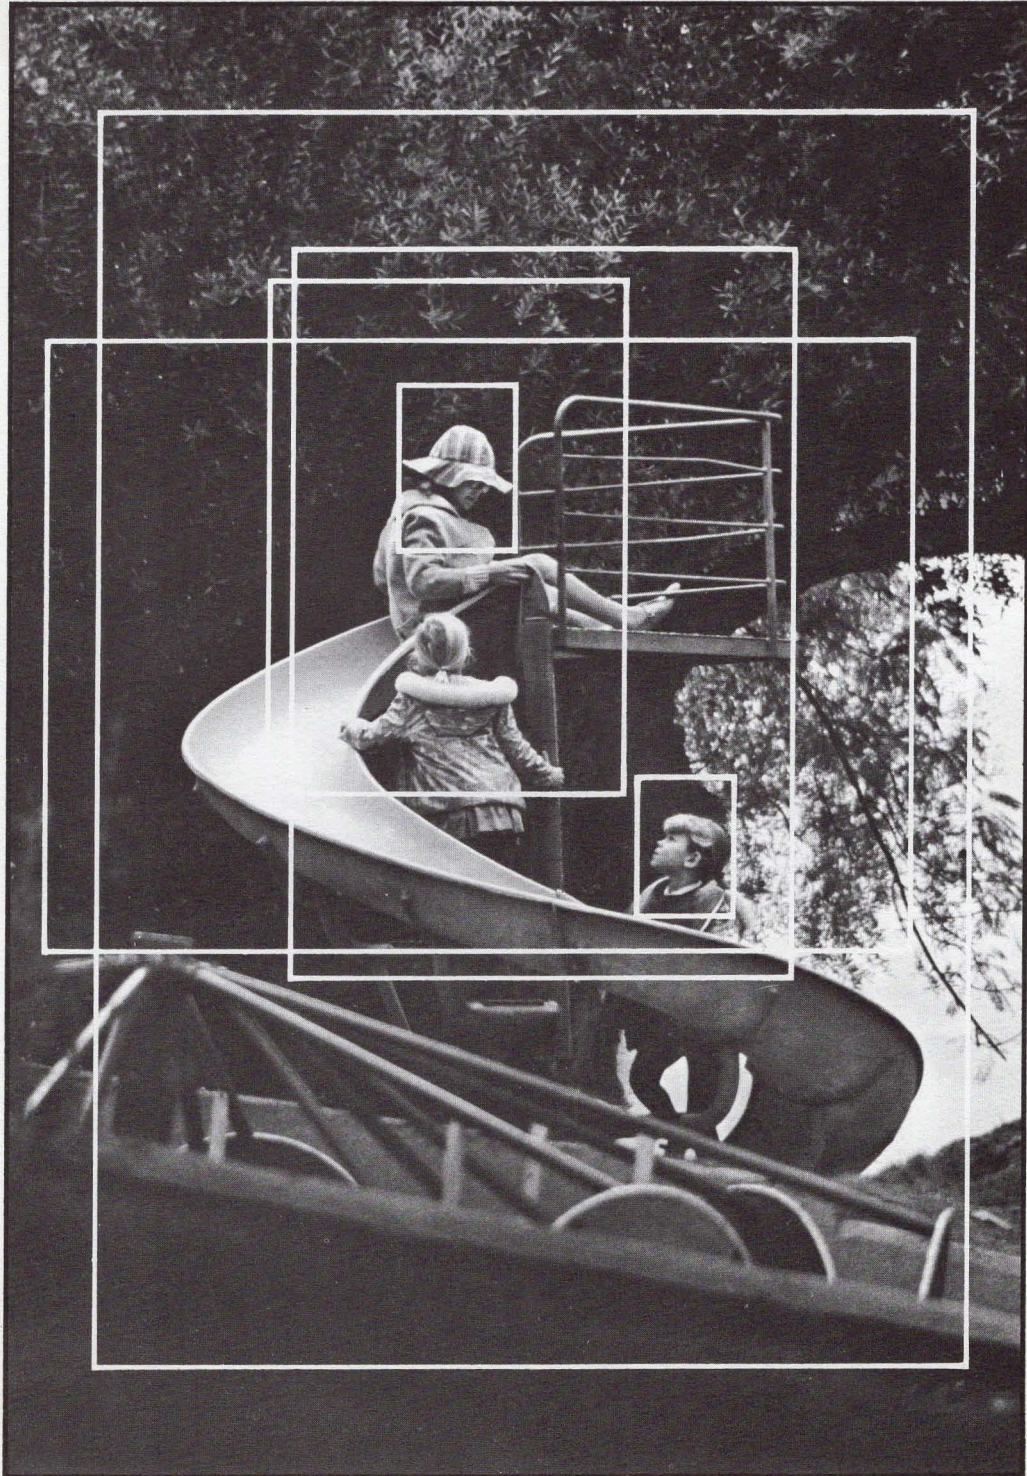

**Wide Angle,
Telephoto,
and Zoom Lenses
for 35mm SLR Cameras**

Vivitar Wide Angle, Telephoto, and Zoom Lenses for 35mm SLR Cameras

Vivitar lenses, manufactured to the highest optical standards, are among the world's finest. Their excellent resolving power, precise construction and mechanical reliability all serve to reinforce the Vivitar theory that the true value of a lens is measured in terms of performance rather than cost. The superb optical quality of Vivitar Prime Lenses make them equal or superior to the finest lenses available. Vivitar offers the photographer a selection of lenses which meets the requirements of most photographic situations:

- *Automatic Vivitar Lenses with mounts to fit Mamiya/Sekor—Pentax, Exakta, Nikon, Canon, Minolta and Topcon.*
- *Automatic Vivitar Lenses with interchangeable T-4 adapter system to fit Mamiya/Sekor—Pentax, Exakta, Nikon, Canon, Minolta, and Miranda.*
- *Preset Vivitar Lenses with compatible "T" system to fit most 35mm SLR cameras.*

Vivitar Automatic Lenses

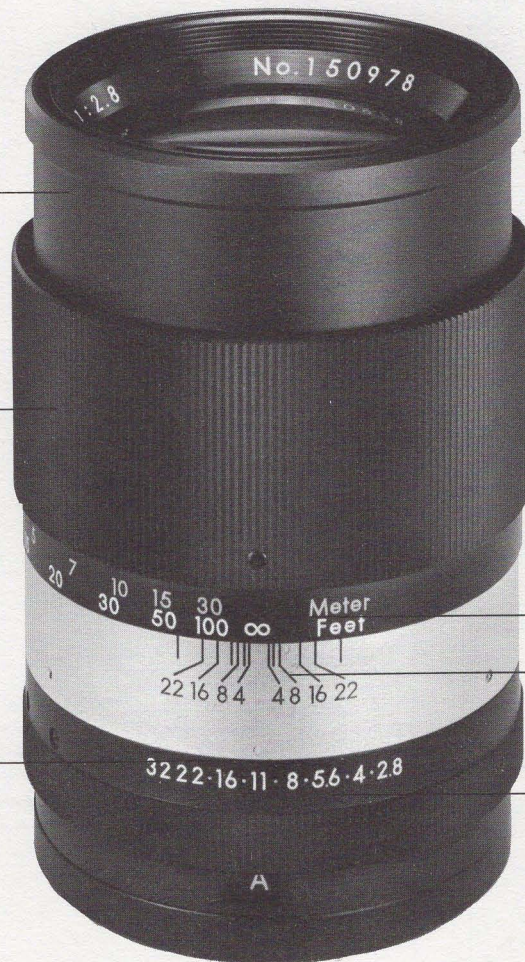

Features

- Smooth operating controls.
- Color coated and corrected optics.
- Automatic aperture control.
- Automatic meter coupling mechanisms.
- Full and 1/2 stop settings.
- Large selection of camera mounts.
- 5 year guarantee.

Built-in retractable lens hood (on telephoto and zoom lenses).

Broad knurled focusing control ring providing positive grip.

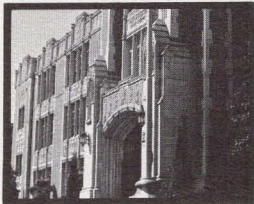

Designated 1/2 stop positions.

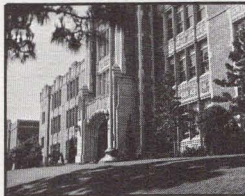

Deeply etched, easy to read:

- Distance scale
- Depth of Field scale
- Aperture scale

Vivitar Automatic T-4 Lens System for 35mm SLR Cameras

The Vivitar Automatic T-4 Lens System offers the photographer complete interchangeability between two or more 35mm SLR cameras with differing lens mounts. The T-4 lens and adapter feature an automatic diaphragm control mechanism, which couples to the behind-the-lens exposure control mechanism of the camera.

All T-4 lenses and adapters may be installed by the user without tools, special couplings, or bands. In 10 seconds, or less, you can couple a T-4 lens to an adapter.

Vivitar T-4 lens adapters are available for the following 35mm SLR camera mounts:

*Mamiya/Sekor-Pentax
Exakta*

*Nikon
Canon*

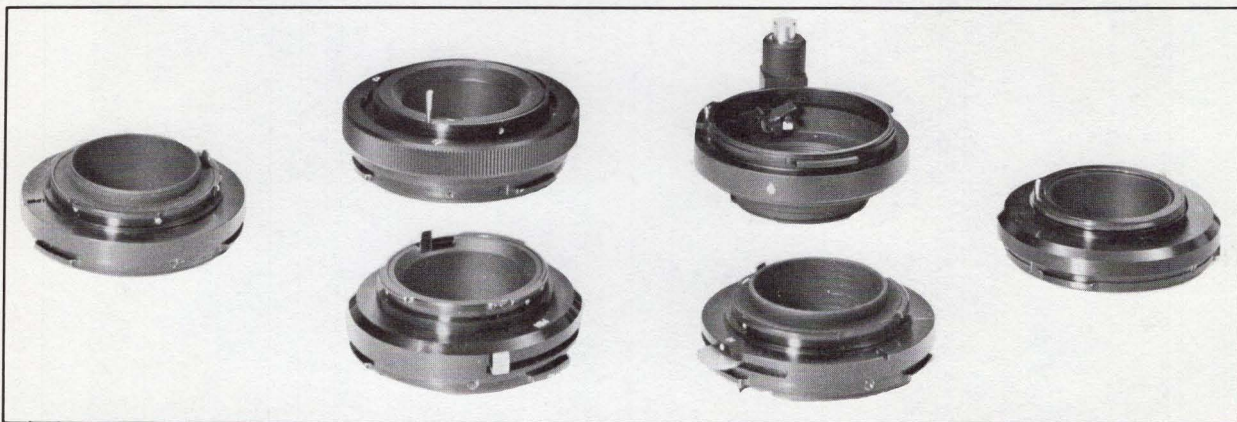

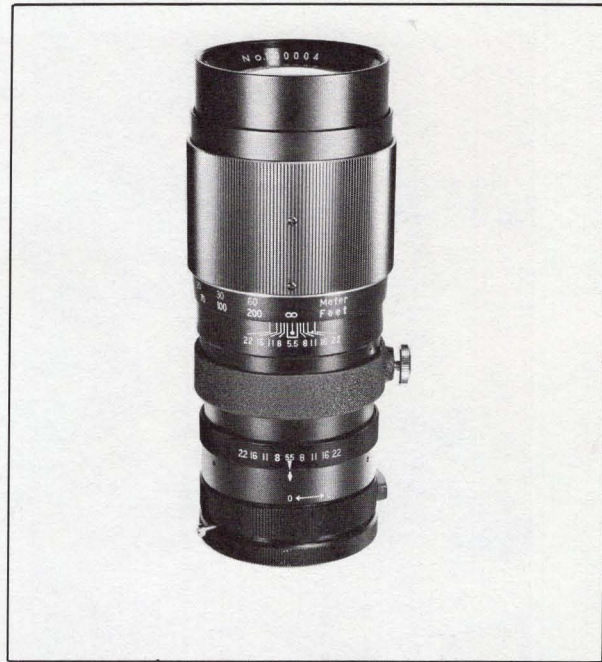

*Minolta
Miranda*

Vivitar Automatic T-4 Lens Adapters

Features :

- **Diaphragm Coupling:** *Automatic diaphragm control and meter coupling between camera and lens.*
- **Fast Coupling:** *Only 10 seconds required for switching an adapter from one lens to another, or for interchanging a lens between two different adapters. Requires no tools or special accessories for coupling.*
- **Positive Locking:** *Breech-locking bayonet. Provides secure, positive locking of lens to adapter.*
- **Sealed Components:** *Dust and dirt are completely sealed out by cinch-type locking of adapter to precision-finished facing on rear of lens component.*

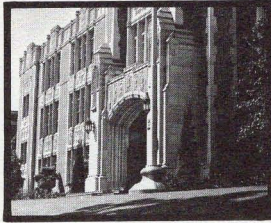

Vivitar Automatic T-4 Adapters are available for the following camera lens mounts :

Vivitar Preset Wide Angle, Telephoto, and Zoom Lenses with Compatible "T" Mount System

The compatible "T" Mount system makes it possible to use Vivitar preset lenses on a variety of SLR cameras simply by changing adapters. The photographer who owns two or more SLR cameras with different lens mounts, or who wishes to change from one camera to another, has no need

to purchase a whole new assortment of lenses to maintain his versatility. If he is using the Vivitar "T" mount lens system, he simply purchases the adapter needed for his new camera and continues to use his present lens.

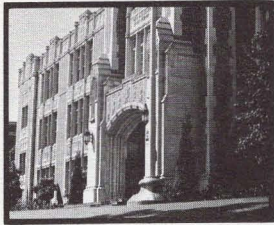

Vivitar "T" Adapters are available for the following camera lens mounts.
