767 Photo Trail Back Pack

Size: 10 $\frac{3}{4}$ "W x 6D x 14 $\frac{1}{2}$ "H
27 x 15 x 37cm
Colors: Black, Gray

The 767 is the compact pickup truck of our Photo Backpack family. While providing excellent protection for your equipment, it is not overly complex. It will hold cameras with attached lenses up to 11" long, making it excellent for wild life and action sports photography, yet it is not too big for everyday multi-purpose use. The main compartment is comprised of adjustable foam-padded compartments that will hold a multitude of lenses and equipment. Windowpane-Mesh™ pockets on the inside of the front panel are perfect for filters and small accessories. The shoulder straps and hip belt are foam

padded to allow long-distance treks with a bag full of heavy equipment. An adjustable sternum strap assists in assuring a comfortable fit. The entire backpack harness and hip belt can be stored in the zipper-closing back panel, allowing the pack to be carried by the top handle like luggage. The shoulder straps have "D" ring attachments if you want to add our accessory backpack camera straps (N-11). A light rain jacket and other bulky accessories can be stuffed in the large pocket on the front of the pack. Lash tabs on the bottom and sides of the pack allow you to tie on extra equipment and tripods, while the side tabs will hold the same accessory pockets

Accessory Side Pockets for model 767

For those who need more storage space when carrying our 767, these side pockets make the perfect accessory. See model SP-777 on catalog page 31.

We Survived The Northridge Earthquake

For many years Tamrac camera bags have held up under the most rigorous and adverse conditions. This year our company experienced a different kind of test—a 6.6 earthquake to be exact, centered approximately one mile from our factory and offices. And what an unsettling experience it was. Although camera bags don't break, there are plenty of other things at our facility that do, including the building. We have worked hard to recover from this disastrous occurrence and will continue to provide our customers with innovative, high quality, top performing products. For this reason, we are offering this catalog supplement in place of a whole new catalog.

as Model 777. The 767 is our basic backpack and, when matched to the equipment needs of the traveling photographer or the photographer who just wants to cover distance with camera equipment comfortably on his/her back, the 767 is ideally positioned in the Tamrac Backpack lineup.

Half Moon Hip Pack

Size: 13W x 6½D x 6¼H
33 x 17 x 16cm

Colors: Black, Gray, Navy

This comfortable, contoured hip pack is a step up in size and features from our Quarter Moon Hip Pack. It was created for those photographers who need to carry more equipment, yet want the same comfort and easy access of our Quarter Moon Hip Pack. The fast-action zipper top opens away from the body for quick and easy access, is covered by a rain flap, and has an internal filter pocket. Inside, the padded camera compartment is flanked by six adjustable, foam padded lens and accessory compartments. The large rain-flapped front accessory pocket is supplemented by two zippered side pockets for quick access to small items such as lens caps, batteries and lens cleaning materials. Lash straps can hold a windbreaker or a small tripod. Adjustable suspension straps are located on each side of the bag and are attached to the hip belt to help transfer the weight to the hips and balance the load. This well-engineered and fast access design will allow the photographer to carry a full complement of action-oriented camera equipment with the weight close to the hips and the hands free for action photography.

Compact Zoom Traveler

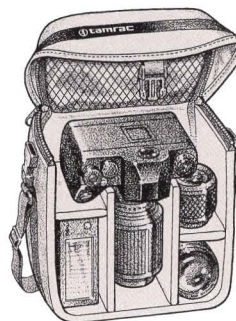

Size: 7¼W x 4D x 8H
18 x 10 x 20cm

Colors: Black, Gray, Navy,
Burgundy, Sage

This addition to our family of slim profile camera bags will allow you to slip through a crowd easily with your camera bag comfortably hanging near your side. Model 632 is designed for the newer, shorter lenses and more compact accessories. It will safely hold most 35mm cameras along with enough extra lenses and accessories to get one through most situations. The dual action top is totally rain protected and has quick-release buckles, velcro and zipper closing systems to assure protection under the toughest weather conditions. Inside the top is a flat Windowpane Mesh™ accessory pocket for filters and the front pocket is compartmentalized for organization of your film, accessories and personal items. The Compact Zoom Traveler offers great protection,

is very compact and holds your camera and accessories ready for quick access.
