"AURICON-1200" RECORDER... Model RM-30 for 16mm Optical Sound-On-Film Recording

- ★ Available for Variable-Area or Variable-Density Optical Sound-On-Film Recording. Can be supplied for use with existing Auricon Amplifiers.
- ★ 1200 ft. Film Magazines for up to 33 minutes of continuous recording. 600 ft. Magazines also available. Model RM-30 Recorder uses same Magazines as "Super-1200 Model CM-74" Camera.
- ★ Sturdily constructed of aluminum castings, precision machined and attractively styled. Finished in a gun-metal color baked-enamel.
- ★ Self-Blimped with sponge-rubber interior lining. Completely quiet in operation, can be run within 6 feet of the recording microphone. Push-button Control Panel with Indicator-lights for dependable operation.
- ★ Safety-interlocked film-flow. Recorder will not run unless takeup-belt is in correct position, etc.
- ★ Triple-filtered film-flow insures "flutter-free" and "wow-free" High Fidelity Recording.

Internally-illuminated geared footage-indicator, completely silent in operation, with convenient hand reset-knob.

CONVENIENT CARRYING HANDLES

PUSH-BUTTON CONTROL PANEL with "Safety-Interlocked" Film-Flow Indicator-Lights

The Indicator Lights on the RM-30 Recorder Control Panel, show at a glance that the machine is running film satisfactorily. The "Recorder On" Light glows only when energized by film-operated safety-switches which are part of the RM-30 Recorder film-flow path.

The Recorder is powered with a reversible, synchronous motor permitting "A" or "B" Wind emulsion-position sound-tracks to be recorded. Indicator-lights on the Control Panel show the position of the Recorder-Motor reversing-Switch for making "A" or "B" tracks. Full instructions for using "A" or "B" wind are furnished.

The film at the recording position is edge-guided by jewel-hard Sapphire surfaces (U.S. Patent 2,506,765) for precision placement of the Sound-track on film.
