DECKRULLO—

NETTEL CAMERAS

The Speed Cameras "Par Excellence"

For Plates and Film Packs

No speed camera can claim to be the equal of this Contessa-Nettel Deckrullo because there is but one Nettel Focal Plane Shutter. No more old-fashioned and awkward tension springs but a patented brake wheel permitting of a maximum speed of 1/2800 second (except in the size of 2½x3½—maximum 1/1200) and the gradual application of the brakes reduces this step

by step as desired. Of course, the shutter is self-capping. Lazy Tong Extension. Focusing by means of an ingeniously constructed focusing device at top of camera can be done whether camera be closed or open. The outfit includes: Camera, Lens, 3 double Plate Holders or 2 double Plate Holders and Film Pack Adapter, Release.
