

EASTMAN KODAK COMPANY

ROCHESTER, N. Y.

June 9, 1921.

ADDRESS REPLY TO
SERVICE DEPARTMENT

Miss Dorris Peeler,
Alliance, Nebr.

Dear Madam:

The films which you sent with your letter of May 23 were developed on order #D-21638, and were shipped June 4.

The Pyro Developing Solution which is used for roll films and plates, can also be used for developing film packs, but the development should be continued about 1/3 longer, owing to the fact that these films have an extra coating of gelatine which necessarily requires more time for the complete penetration of the developing solution.

Yours truly,

EASTMAN KODAK COMPANY OF NEW JERSEY.
