

Underwater Housing

for Eclair 400' ACL camera

model
ACL 4

UNIQUE FEATURES:

- Lightest and most compact 16mm camera and housing with 400' capacity.
- Excellent vertical clearance for tight shooting problems and diver safety.
- Uses standard camera, cable and battery with 200' or 400' magazine.
- One camera to shoot above or below water.
- Camera goes in and out of housing simply and quickly.
- Reflex viewing available.
- Complete weight only 39 lbs. including camera, housing battery, lens, 400' of film.
- Easy to read and operate f/stop system.
- Change film magazines in less than a minute.
- All moving controls sealed with double "O" rings.
- Cast aluminum housing tested to 350'.
- Viewable footage counter.
- Simplicity in engineering — easy to maintain.
- Accessory mounting plate.
- An ideal 16 oz negative bouyancy.

NOW A 400' UNDERWATER HOUSING THAT REALLY WORKS!

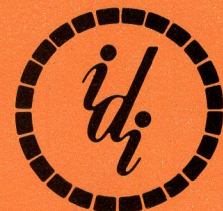

Shoot wide and fast: 10mm, 5.9mm or 3.5mm with dome correction, reflex viewing, and more features than any other underwater camera system!
