NIKON "F" AUTOMATIC REFLEX CAMERA — 35mm; 36 exposure, 1 x 1½. Available with interchangeable Photomic Finder (Nikon F Photomic) combining a meter and prism finder in one housing — or with a conventional pentaprism eyelevelevel finder. Features instant return automatic mirror and instant reopen automatic diaphragm; built-in depth-of-field preview control; built-in ground glass rangefinder — interchangeable with other types of ground glasses. Provision for locking mirror up. Accepts electric motor drive, accessory waist level finder. 13 shutter speeds, click-stop, from 1 to 1/1000 plus T & B, on single non-rotating dial; full synch plus electronic flash at 1/60; auto zero reset exposure counter; calibrated delayed action self timer; removable back; fixed take up spool; single stroke rapid film advance; high speed film rewind; tripod socket built into camera body.

REFLEX LENSES

NIKKOR LENSES — NIKKOR lenses for the Nikon F and Nikkorex F represent a full line of high speed, high resolution lenses in lightweight mounts. The 28, 35, 50, 105, 135 and 200 mm lenses are fully automatic, with internally coupled instant reopen diaphragms. All have click stops. All glass-to-air surfaces are anti-reflection coated. Front lens caps are included. Lenses from 105mm up are furnished with lenshoods. The addition of adapter coupler LNP2350 permits direct, accurate mounting of the 180mm, 250mm, 350mm, 500mm lenses on Nikon F and Nikkorex F cameras.

REFLEX ACCESSORIES

NIKON PHOTOMIC FINDER SYSTEM — Combines an exposure meter and prism finder in the same housing. Uses cadmium sulphide cell, couples to both shutter speed & lens diaphragm (of automatic lenses). 'Match' needle is visible in prism finder, permitting the setting of correct exposures (as well as framing and focusing) without removing the eye from the finder. Can be removed & interchanged with standard Nikon F Prism. Supplied with converter tube and incident light attachment.

MR55	Photomic Finder System, Nikon F	99.50
MR50	Exposure Meter, Model 3, Nikon F	39.00
MR77	Incident Light Attach. for Model 390
MR80	Incident Light Attach. for Photomic	1.35
AC81	Converter Tube, for Photomic	1.35
MR60	Nikkorex F Coupled Exposure Meter — couples to shutter speed dial and diaphragm (of automatic lenses)	27.50
MRP65	4X Light Amplifier	7.50

NIKON REFLEX ELECTRIC MOTOR DRIVE — takes single frames, bursts of 2 or more exposures or continuously through a full film load. Exposure firing rate may be varied up to 4 per second. Motor is housed in an accessory back which is interchangeable with the standard camera back.
