

WORLD'S SMALLEST, LIGHTEST 35MM CAMERA

An inimitable technical miracle of Swiss Chronometer precision, carried as conveniently as a wallet, watch, lipstick, or pack of cigarettes, always ready to shoot—anytime, anywhere.

1. A masterpiece of Swiss chronometer precision literally custom-built for you, as only the watchmakers of Switzerland can do it.
2. Lighter than a wallet (5½ ounces), smaller than a pack of cigarettes (2½" x 2" x 1"), even smaller than any 16mm subminiature camera.
3. Both a subminiature AND a 35mm camera, of ultra versatility, with all desirable features.
4. Uses any standard 35mm film, color or black and white, prepackaged or self-loaded.
5. Large size 14 x 21mm pictures, 2 to 4 times bigger than those taken with other subminiature cameras.
6. Film length is more economical, renders 2½ to 3 times as many pictures as standard 35mm cameras.
7. Pressing the button takes the pictures, counts the exposures, cocks the shutter, transports the film, readying the TESSINA 35 instantaneously for the next shot.
8. Swiss precision miniature motor provides 6-10 automatic one-by-one shots without rewinding, ideal for rapid action photography.
9. TESSINA 35 L with cross-coupled exposure meter provides accurate light reading, automatically or manually.
10. Twin-lens reflex system offers parallax-corrected lenses for viewing and picture taking.
11. TESSINON 25mm f/2.8 (53° angle) renders critical sharpness, authentic tonal values, acute contrasts, and precise color fidelity.
12. Through-the-lens viewing with ground glass for accurate framing, focusing and depth-of-field control.
13. Continuous focusing range from infinity down to 9", for ultra close-ups.
14. Choice of reflex and sports-finder — for waist level, eye level and 90° angle shots — 8x magnifier or 6x prism finder.
15. Choice of lens stops from f/2.8 to f/22.
16. Swiss precision movement with electronically tested shutter speeds and equidistant click stops, from ½-1/500th second plus B.
17. Choice of X or M synchronizations, attachable TESSINA miniature flashgun.
18. Choice of haze, yellow, green, red or 85 type A filters.
19. Choice of any finisher who processes 35mm film, any 35mm developing tank.
20. Uses any 35mm enlarger for larger-than-life-size blow-ups, up to 16" x 20" and beyond.
21. Uses any 35mm projector to show your slides, with cardboard or Newton ring free glass mounts.
22. 17 jewel watch attaches easily to accessory clip of TESSINA 35.
23. Choice of chrome, black, red or gold finish, with detachable brief instruction guide.
24. You carry TESSINA 35 conveniently with you all year — in coat, hip or shirt pocket, on your belt, wrist or around your neck, in your purse, folio, etc.
25. The inconspicuous TESSINA 35 is also available in noise-free or noise reduced models, ideally suited for taking candid pictures—any time, anywhere.
26. Jewelled mechanism with ruby stones as used in fine Swiss watches eliminates friction and wear, guarantees smooth operation.
27. Swiss precision mechanism is geared for more than 100,000 operations.
28. Solid, virtually indestructible construction withstands the most rugged use, for lifelong durability.
29. Built to the most rigid precision standards, every TESSINA 35 passes the most scrupulous, 100% quality controls, certified by an inspection label.
30. ONE year guarantee for highest mechanical and optical performance.
