

TOYO VIEW 45G

4"x5" Multi-Format View Camera

The Toyo View 45G is a deluxe view camera of modular design featuring convertibility from 4"x5" to 5"x7" and 8"x10" formats, interchangeable bellows and monorail extensions. The meticulous care given to design and construction is exemplified by the camera's exceptional performance. Smooth focusing action, exact calibration of camera movements, and a positive rack and pinion lateral shift mechanism are just a few of the outstanding features. The Toyo View 45G is the logical choice of the professional and industrial photographer who demands a multi-format camera full time.

Key Features

- Standard 4"x5" 360° revolving back with cm square lined ground glass and built-in fresnel screen.
- Easily converts to 5"x7" and 8"x10" formats.
- Accommodates interchangeable wide angle, standard and extension bellows.
- Intermediate standard permits bellows to be coupled together.
- Accepts a variety of monorail lengths and extensions.
- Full range of camera movements: swings, tilts, lateral shifts, rising front and back.
- Two speed rack and pinion focusing and microfocusing.
- Swings and tilts are detented for easy zeroing.
- Reference scales for tilts, swings and lateral shifts.
- Accepts all standard 4x5 sheet film holders, Polaroid™ Land Film Holder Model 545, film packs and Graflok™ Polaroid Land Pack Film Holder Model 405.
- Large monorail for greater rigidity with elevated rib to maintain precise alignment of front and rear standards.
- Rigid tripod mounting block with two tripod mounting sockets for American and European threads.
- Large square lensboard accepts nearly all lens and shutter combinations.
- Rack and pinion lateral shift mechanism.
