

KEYSTONE K-4C 3-LENS TURRET AUTOMATIC ELECTRIC EYE CAMERA

K-4C

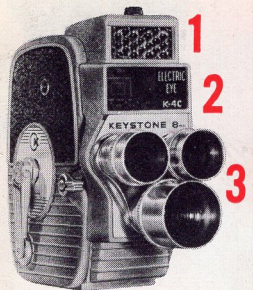

- Fully Automatic
- Versatile
- Easy to Operate
- Light and Compact

what does it have?

- FASTEST CHANGING ELECTRIC EYE SYSTEM
- Three-Lens Turret with $f2$ normal, wide-angle, and telephoto lenses
- Film Speed Selector
- Color-Coded Viewfinder
- Exposure Indicator in Viewfinder
- Manual Exposure Control
- Two Built-In Filters
- Automatic Footage Indicator
- Three-Way Trigger

what does it do?

- Sets the lens instantaneously for a perfect picture, resets continuously if the light changes while you shoot.
- Lets you stand in one spot, get three kinds of shots; give your movies variety just by turning the turret.
- Provides automatic lens setting for all 8mm films present and future.
- Shows you what the camera "sees" with each lens.
- Tells you how lens is set at all times, warns you when light is insufficient.
- Lets you deliberately over or under-expose film for special effects including professional fade-ins and fade-outs.
- One lets you shoot outdoors with indoor film, use the same film for all your movies; the other lets you get bright, clear movies on hazy days.
- Tells you exactly how much film is left in the camera.
- Lets you run camera continuously for self-movies, single-frame for trick shots and animation, as well as regular trigger-action.

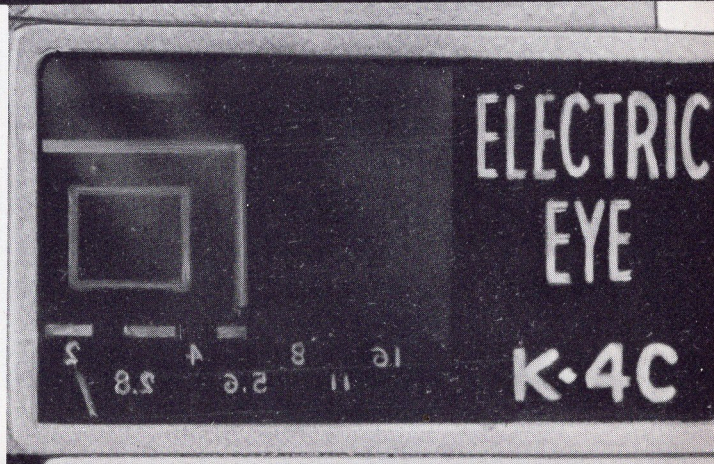

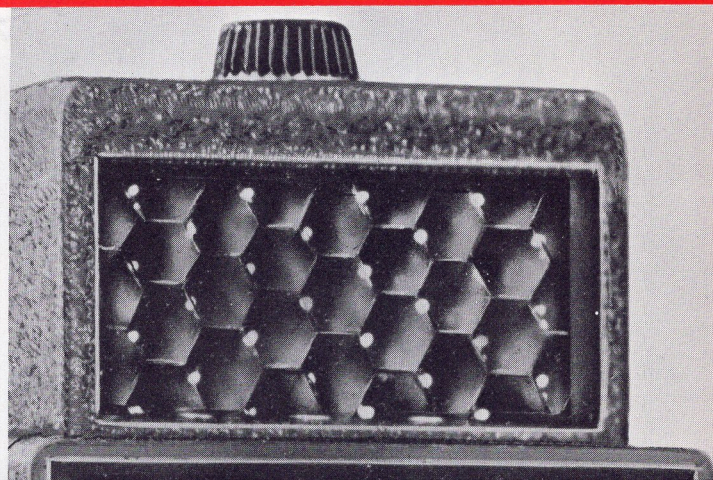

KEYSTONE K-4C

3-LENS TURRET AUTOMATIC ELECTRIC EYE CAMERA

1 ELECTRIC EYE instantaneously measures the intensity of light and adjusts lens aperture for correct exposure of the film, readjusts constantly if light changes. Keystone's Electric Eye system, the fastest changing made, eliminates frame loss, adjusts for film speeds ASA 10, 16, 20, 25, 32, and 40.

2 VIEWFINDER is genuine optical ground glass. Needle shows lens setting at all times. Red area warns operator when light is insufficient. Viewfinder is color-coded to show exact field of vision for each lens.

3 BUILT-IN "A" AND HAZE FILTERS; a turn of the dial snaps the proper filter into place. Turret is equipped with $f/2$ fixed-focus 12.7mm normal lens, conversion lenses for 9mm wide-angle and 25mm telephoto.

CONSTRUCTION AND OPERATING FEATURES:

Governor-controlled motor provides long, even, friction-free running. Retractable claw makes possible simple drop-in rollfilm loading. Footage indicator sets automatically. Three-way trigger permits regular, locked and single-frame running. Crank-type windup handle folds away into recess in body. Built-in socket for light bar or tripod on flat underside. Built-in wrist strap need not be removed for tripod use. Body of camera is die-cast aluminum handsomely finished in two-tone grey.

Keystone cameras are backed by a Lifetime Guarantee. Electric Eye mechanism guaranteed for one year.
