

KEYSTONE K-5 Magazine Loading Automatic Electric Eye 3-Lens Turret Camera

K-5

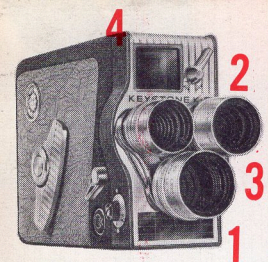

- Fully Automatic
- Versatile, easy to operate
- Hooded "Zoom" viewfinder

what does it have?

- FASTEST CHANGING ELECTRIC EYE SYSTEM
- Three-Lens Turret with f1.8 standard, wide-angle and telephoto lenses
- Hooded "zoom" viewfinder
- Exposure Indicator
- Built-in Booster
- Magazine loading
- Manual Exposure Control
- Two Built-in Filters
- Automatic Footage Indicator
- Three-way trigger

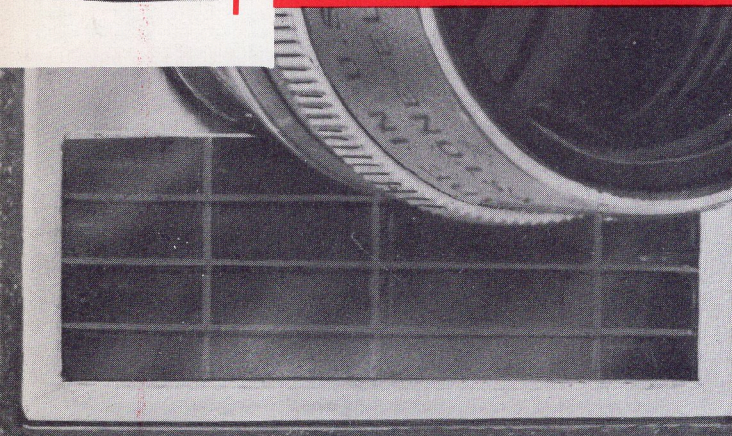

what does it do?

- Sets the lens instantaneously for a perfect picture, resets continuously if the light changes while you shoot.
- Lets you stand in one spot, get three kinds of shots; give your movies variety just by turning the turret.
- Frames the picture taken by each lens.
- Tells you how the lens is set at all times.
- Will accept new film speeds ASA-10 to 40.
- Loads simply in six seconds — lets you change film before roll is completed.
- Lets you deliberately over- or under-expose for special effects, including "fade-ins" and "fade-outs."
- One lets you shoot outdoors with indoor film; the other lets you get bright, clear movies on hazy days.
- Tells exactly how much film remains in the camera.
- Lets you run camera continuously for self-movies; single-frame for trick shots and animation as well as regular trigger action.

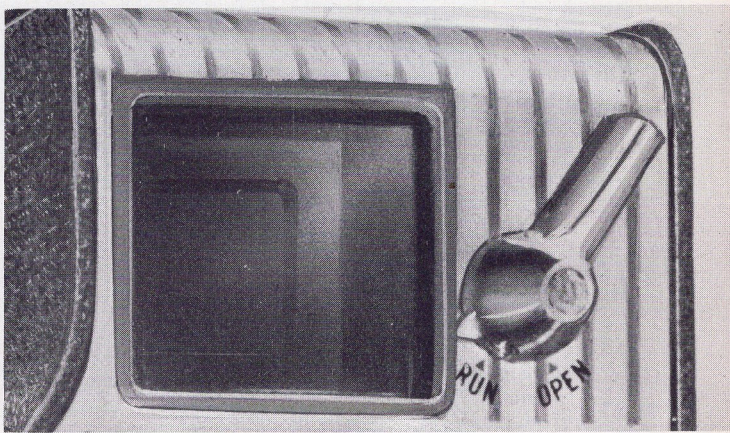

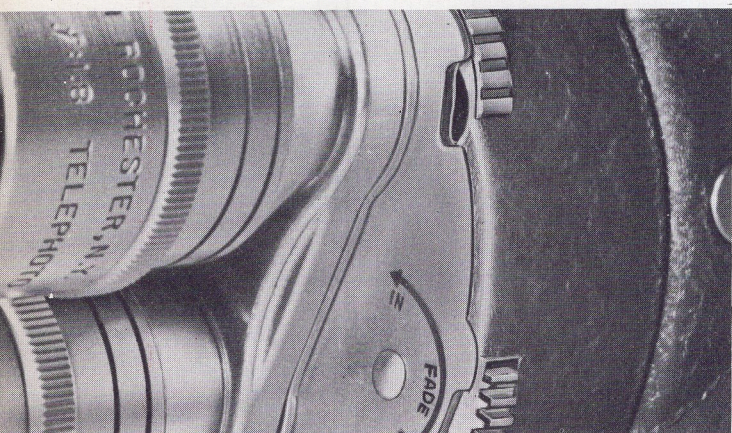

KEYSTONE K-5

Magazine Loading Automatic Electric Eye 3-Lens Turret Camera

1 **ELECTRIC EYE** instantaneously measures the intensity of light and adjusts lens aperture for correct exposure of the film, readjusts constantly if light changes. Keystone's Electric Eye system, the fastest changing made eliminates frame loss, adjusts for film speeds ASA 10, 16, 20, 25, 32, and 40.

2 **EXPOSURE SCALE**, visible in viewfinder, shows exposure value of scene being shot. Black flag indicates when light is insufficient for good movies.

3 **BUILT-IN "A" AND HAZE FILTERS**; a turn of the dial snaps the proper filter into place. Turret is equipped with three $f1.8$ fixed-focus lenses — $7\frac{1}{2}$ mm wide-angle, 13mm regular, 25mm telephoto.

4 **HOODED "ZOOM" VIEWFINDER** adjusts to frame the "field of vision" of each of the three lenses. Fine, optical ground glass, with hood to shield extraneous light.

CONSTRUCTION AND OPERATING FEATURES:

Governor-controlled motor for even, friction-free running. Simple, drop-in magazine loading, with automatic footage indicator. Safety lock will not permit camera to operate until cover is locked. Three-way trigger permits regular, locked and single-frame operation. Smart wrist strap permanently attached. Die-cast aluminum body, richly finished in gray vinyl and brushed satin chrome.

Keystone cameras are tested with live film at the factory and backed by a Lifetime Guarantee and Free Service Policy. Electric Eye mechanism guaranteed for one year.

Specifications are subject to change.
