# A Sensational Camera

The revolutionary features of the CONTAREX surpass all existing standards in single-lens reflex cameras. For the first time the exposure meter is coupled with the lens diaphragm and shutter speed settings of the focal plane shutter. The instant-return mirror immediately re-shows the finder image within a fraction of a second after shooting. In poor light, the sensitivity of the exposure meter can be increased by the equivalent of four lens stops. These are just a few important features of this camera. An outstanding point, however, is that the CONTAREX covers all fields of pictorial, scientific, as well as amateur and professional photography with amazingly few accessories. That is why the CONTAREX is truly a camera of the future.

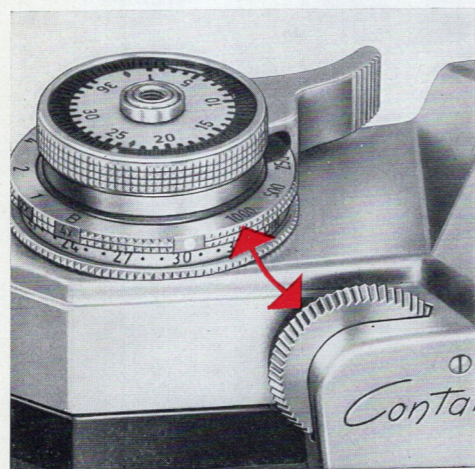

# Contarex<sup>®</sup>

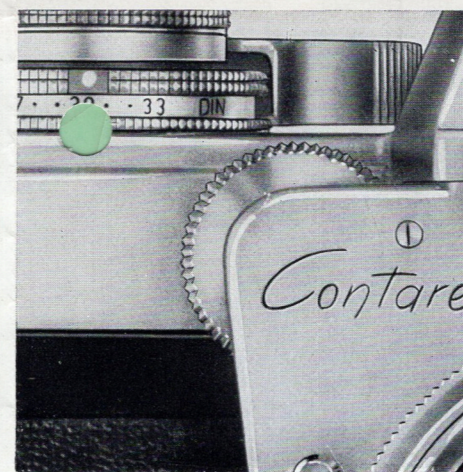

The sensible camera system for photographic perfection with 2 inch (50 mm) ZEISS PLANAR f/2 lens

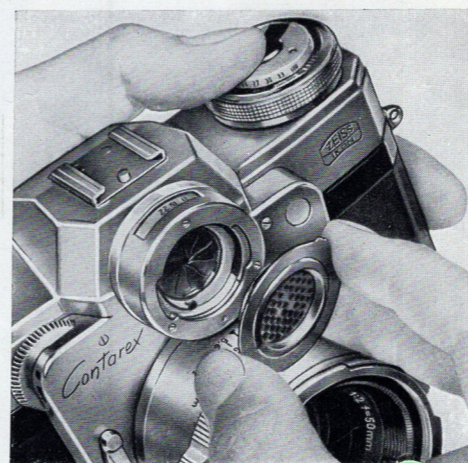

Focal plane shutter to 1/1000 second - unique in coupling shutter speeds as well as lens diaphragm stops with the exposure meter

Removable light baffle of meter cell increases range by four lens stops

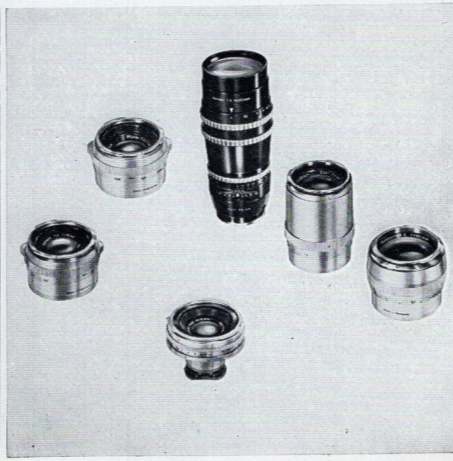

Coupled exposure meter of exceptional sensitivity

Universal setting control wheel for exposure manipulation while viewing

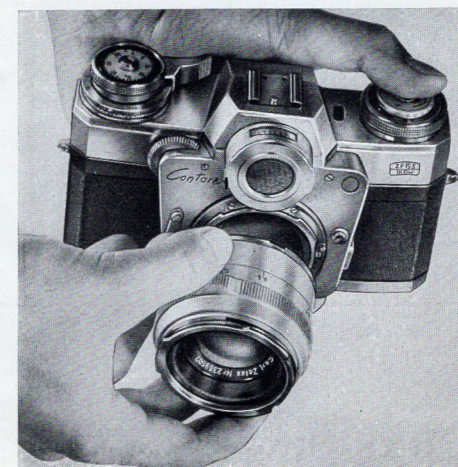

Instant return mirror: finder image re-appears immediately after releasing

Close-ups without supplementary lenses as close as 12 inches from the film plane with the standard 2 inch (50 mm) ZEISS PLANAR f/2 lens

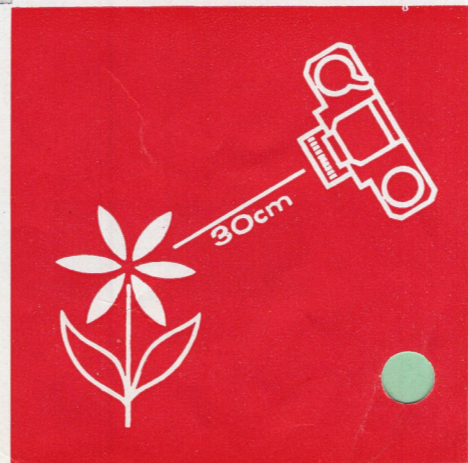

Automatic exposure compensation for close-ups with the 1 3/8 inch (35 mm) and 2 inch (50 mm) lenses

Distance and exposure are set and checked in the finder

Six high-quality ZEISS lenses with an amazing range of focal lengths from 7/8 inch (21 mm) to 10 inches (250 mm)

All lenses with bayonet mounts and rectilinear helical focusing mounts

And the Most Important Point:

The CONTAREX covers all fields of pictorial, scientific, and amateur photography with amazingly few accessories!

## CONTAREX Accessories

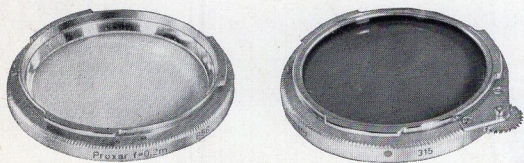

Leather Eveready Case

### Interchangeable lenses & viewfinder

BIOGON f/4.5, 21 mm, with plastic case
