

BOLEX

BOLEX PRECISION. The uncommon touch in Super-8 sound.

Suddenly, everything falls into place: the time, the people, the lighting, the mood. A perfect interplay of sights and sounds. Now, your camera must respond with instant, unerring precision. Any Bolex Sound-8 camera will, film after film, because superior quality is built into every Bolex.

Uncommon Sound Capabilities

Bolex begins with the most important feature in sound: *silence*. A whisper-quiet motor that lets you record the sounds you want without adding any of its own. Electronically stabilized to assure consistently accurate filming speed. Bolex combines this superior motor with a built-in, powerful amplifier with auto and manual recording-level control, monitored by a VU meter and LED indicators. The result is sound of such consistent quality that the only "wow" you'll ever hear will be from your audience.

Features To Spur Your Imagination

Bolex Macrozoom lenses produce images of surpassingly crisp quality and focus in tight for remarkable effects. Exposure is automatic and thru-the-lens. Image fades and other special effects capabilities are built-in. Brilliant reflex finders monitor all principal functions. And every model has a built-in intervalometer, an action light to signal "it's a take", and

a resettable film counter. All are engineered with the concern for excellence that's always been the Bolex heritage.

Bolex 551 XL Adds Dim Light Filming Capabilities

Ordinary roomlight and outdoor scenes at dusk or dawn are no barriers for its super-fast f1.2 lens. You also have powered zoom over a 5-to-1 range, in addition to all other Bolex Sound-8 features.

On the other hand, you may prefer the Bolex 5120, with a 12-to-1 Macrozoom lens. Or the Bolex 581, with 8-to-1. Both offer variable-speed zooming.

With a Bolex Sound-8 in hand, you'll explore new worlds in film-making magic. And capture them with uncommon precision. Your Bolex dealer can tell you more. Or write for Lit/Pak P-76 to Photo Products Division/Ehrenreich Photo Optical Industries, Inc., Woodbury, N.Y. 11797.
