Rochester, N. Y., October 8th, 1900.

E. N. Dow, Esq.,

Kodak Park,

Dear Sir:-

I enclose herewith another set of samples made on the Willis & Clements, American Aristo and Kodak Park platinum, which will give you a good idea of the difference in chemical effect of the three papers. On the half length of the lady, which is a very thin negative, the Willis & Clements shows a flat print. That it was good paper, however, is shown by the smaller prints which are from harder negatives. Which stock was used for our paper?

Yours truly,

G. Eastman
Treasurer.
