

KODAK

Let Kodak tell the Winter's Tale.

EVERY season is a Kodak season. The year is a succession of intimate personal stories, and the Kodak way has so simplified photography in all its branches that these stories may be easily recorded, whatever the season, whatever the condition.

Thus in winter all indoors invites your Kodak. This is the season for indoor portraiture. Groups, single figures, the children in familiar home surroundings—all these are easily made with a Kodak and Kodak Portrait Attachment. And at night the tedium of many a long winter evening can be pleasantly broken by taking flashlight pictures—the Eastman Flash Sheets and Flash Sheet Holder making this a simple matter indeed.

As for the outdoors, with its snowy landscape and hardy sports, it holds many a good time for you, and *every good time is a good time to Kodak.*

The general Kodak catalogue describes Kodakery more completely and lists a full line of Kodak accessories. It's free at the dealers or will be mailed on request.

Let Kodak make the most of the winter's pleasures for you.

EASTMAN KODAK COMPANY,

ROCHESTER, N. Y.,—*The Kodak City*

Vest Pocket Kodak

THIS little camera has literally taken the country by storm. So flat and smooth and small as to easily go into a Vest Pocket, it invites confidence by its businesslike appearance and fulfills it by the pictures it makes.

In other words, it is a thorough Kodak—well made in every detail—simple in operation—certain to perform the work for which it is intended.

It makes $1\frac{5}{8}$ x $2\frac{1}{2}$ pictures and is always ready for action. Just pull out front to its full extent and the Kodak is in focus for objects at any distance.

It is regularly fitted with a tested meniscus achromatic lens and Kodak Ball Bearing shutter fitted with Iris diaphragm and Kodak Autotime Scale—an ample equipment for ordinary work. But for those who want the greater speed and other advantages of an anastigmat lens, we offer the Vest Pocket Kodak Special. This is similar to the regular model in every respect, excepting that it is fitted with the Zeiss Kodak Anastigmat instead of meniscus achromatic lens. This lens provides a working aperture of f.6.9 and gives the Vest Pocket Kodak Special a most unusual efficiency.

Folding Pocket Kodaks

EXTREME light weight and compactness, combined with simplicity of operation in the highest degree, make these little Kodaks extremely popular with the beginner and with those who wish to make pictures with the minimum of effort.

Upon pressing a button the bed drops and the lens and shutter spring automatically into position—ready at once for making pictures of objects at any distance.

No focusing—no estimating of distances is necessary. When the view is composed in the reversible finder, pressure of the shutter lever makes the exposure.

No. 1A Folding Pocket Kodak

R. R. Type

THE No. 1A Folding Pocket Kodak makes excellent pictures within its scope, but the $2\frac{1}{2} \times 4\frac{1}{4}$ is such a desirable size that many amateurs prefer a model with greater capabilities. To meet this demand, at a modest price, we offer the No. 1A R. R. Type.

This model offers the advantage of double R. R. lens, which means more speed and better definition. And the lens is mounted in the Kodak Ball Bearing shutter. This equipment cannot be excelled outside of the anastigmats.

A compact, inexpensive outfit considering its capabilities, and one which, though suitable for the most serious work, will slip readily into the pocket, and is so simple that it may be effectively handled by the beginner.

No. 3A Folding Pocket Kodak

AS the 3A ($3\frac{1}{4} \times 5\frac{1}{2}$) is the most popular size of amateur picture, the 3A Folding Pocket Kodak is the most popular of amateur cameras.

It was the first camera made for this size, and every desirable improvement made during the years it has been on the market has always been incorporated in its construction.

Fitted with Kodak Ball Bearing shutter and the best R. R. lens obtainable, it is especially effective for instantaneous work, while its rising, sliding and falling front, automatic focusing lock, reversible finder and other features fit it for work of the most general character.

And it is so simple to operate that it can be effectively handled by the novice.

No. 4A Folding Kodak

FOR very large size pictures, we offer the 4A Folding Kodak, a camera which combines all the simple and convenient Kodak features in a very light and compact camera, considering the size of the picture it makes. It is fully equipped for out of the ordinary work, as well as for snap-shot and general amateur photography.

The shutter supplied with this model is a double valve automatic, which works not only for time and bulb exposure, but is also graduated in fractional parts of a second from $\frac{1}{100}$ to 1. The lens is an R. R. of the same high quality as those supplied with the preceding Kodaks.

Constructed with the usual Kodak care and attention to detail, the No. 4A is simple to use and attractively finished.

Special Kodaks

AN ANASTIGMAT lens equipment enables you to make pictures under adverse conditions, where the ordinarily equipped camera would fail utterly, as for instance, quick exposures on dark days, snap-shots indoors, and the like.

The Special Kodaks are made to meet just such conditions. In a word, aside from ultra-rapid focal plane work, there is no condition under which amateur pictures can possibly be made in which the Special Kodaks will not produce the best of results.

Each is fitted with Zeiss-Kodak Anastigmat lens and Compound shutter, and in equipment and appearance they match up fully with the high grade of work for which they are designed.

No. 1A Speed Kodak

ATTAINING a maximum speed of $\frac{1}{1000}$ of a second, this Kodak, as its name suggests, will easily make pictures of the fastest moving objects. Its high speed is obtained by the incorporation of a Graflex focal plane shutter in its construction, and this shutter permits a latitude of exposures from $\frac{1}{1000}$ of a second to very slow instantaneous, "bulb" or time.

With this range of exposures, the camera is perfectly suitable for general amateur work, for it is very simple to understand and operate.

In a word, the Speed Kodak will do all that an ordinary camera will and offers the additional advantage of great speed. You don't need the speed always, but when you do need it, you have it in a Speed Kodak.

Brownie Enlarging Camera

MANY a Winter's evening may be very pleasantly spent by making enlargements from your favorite negatives, and this is a very simple matter indeed, with a Brownie Enlarging Camera. The negative is held at one end, a sheet of Bromide or Velox paper at the other, and the exposure made. It's as easy as printing with a printing frame.

Kodak Metal Tripod

COMBINING light weight and compactness with rigidity, this is an ideal tripod for cameras up to 5 x 7.

Has telescoping legs of brass tubing—lower ones nickeled—the upper black enameled, and should a part become inoperative through wear or accident, any section may be removed for repairs. This is a unique feature among metal tripods. When extended, each section catches and holds firmly. To close, it is necessary to press in top catch only.

The Nos. 1 and 2 have revolving heads for attaching to camera so that the camera may be swung, so as to take in the desired view without moving tripod. The Nos. 1 and 2 also have straps for holding the legs in place when closed.

Flashlight Material

WINTER is the great flashlight season.

Take the little gathering of friends at some home. Nothing can afterwards tell the story of the good time like a picture of it. And then there are portraits and studies to be made of the members of one's

own family—interesting work, which will make the Winter nights seem shorter.

The Eastman Flash Sheet method makes it easy for anyone to make flashlight pictures.

The sheets burn slowly, producing a broad, soft light, and are best used in the Eastman Flash Sheet Holder. This holds the sheet safely and provides for lighting it from the back, so that the holder is always between the operator and the flash sheet. The holder may be held in the hand or screwed on a tripod.

The Price.

Velox Transparent Water Color Stamps

YET another interesting and really pleasurable diversion which the Winter holds for the photographer is the coloring of prints.

While actual color photography is by no means practical for general amateur use, anyone can make beautifully colored prints by the use of Velox Transparent Water Color Stamps.

No special artistic skill, no knowledge of painting whatever is necessary. Just a brush or two and the book of stamps, which includes simple directions for coloring both prints and lantern slides.

Each book includes twelve sheets of colors and each sheet is divided by perforations into twenty-two stamps. To use any color merely tear off a stamp, place in a small saucer or ordinary butter dish, and cover with about a teaspoonful of water.

As they are perfectly transparent and blend harmoniously, you will find that the application is very easy and that no great pains are necessary in treating objects of different colors.

Velox Transparent Water Color Stamps, complete booklet, 12 colors,	\$.25

No. 2 Brownie Developing Box

OFFERING the same assurance of perfectly developed film as the Kodak Film Tank, the Brownie Developing Box is a modified form of the same, so simple to use that any boy or girl can understand and operate it.

It consists of a metal box, with cover, just long enough to accommodate a roll of No. 1 or No. 2 Brownie film in one loop.

To develop, the roll of film is inserted in the spool carrier, and by means of a cord and winding shaft the film is unrolled and carried around a roller bearing thus exposing the film to the action of the developer.
