

Rolleiflex SL26

The Cartridge Loading Camera With Professional Capabilities

The SL26 is the smallest single lens reflex cartridge camera on the market, measuring 3½" x 4" x 2¾" and weighing only 19 ounces. Exposures are set with the through-the-lens CdS metering system by leveling the indicating needle within the viewfinder. The meter is automatically set for the correct ASA film speed by a notched coding on each film cartridge.

A 40mm f/2.8 ZEISS TESSAR lens is standard and has a 52° angle of view. A 28mm, f/3.2 Pro-Tessar wide angle lens with a 70° angle of view is also available. Only the front elements are exchanged when changing lenses, thus protecting the camera interior from stray dust and resulting in lighter and smaller lenses.

The Compur shutter offers X flash synchronization through its full range of speeds from ½ to 1/500 second plus bulb.

The camera comes equipped with a hot shoe built into the top of the pentaprism, a rapid advance lever, built in neck-strap loops and an easily accessible meter battery compartment on the side. Neck strap included.

ROLLEIFLEX SL26 with 40mm Zeiss Tessar f/2.8 lens, lens cap and neck strap.

Cat. No. 760 010 (11660)

Specifications:

SIZE: 4" x 2¾" x 3½", including standard lens.
