

Konica

Autowinder F for Konica FC-1 system

Cat. No. 705-363

The Konica Autowinder F provides tremendous flexibility and versatility to the Konica FC-1 Systems. Imagine shooting 36 exposures in 24 seconds flat or couple it with the Konica Interval Timer and let it take one exposure each hour for 36 consecutive hours. The Konica Autowinder F also couples to the unique automatic film loading system of the Konica FC-1.

Key Features

- Provides fully automatic loading for the Konica FC-1 System. Drop the film cassette into the Konica FC-1, extend the leader and close the back. The Konica Autowinder will automatically advance the film to frame No. 1.
- Compact and lightweight. Only 5.6" long, 1.4" high and weighing just 6½ ounces.
- Provides single frame or continuous film advance for shooting at 1.5 frames per second.
- Can be used with all shutter speeds, from 2 seconds to 1/1000 second.
- Red LED indicator blinks each time the film is automatically advanced and remains on to indicate the end of roll.
- Sealed camera coupling mechanism does not require special dust cover.
- Powered by just four (4) AA penlight batteries.
- Attaches to camera by large knurled mounted knob.
- Convenient on/off power switch.
- Standard tripod socket provided.
