## GRAFMATIC 4 x 5 CUT FILM HOLDER

- Holds six pieces of 4 x 5 cut film — one Grafmatic cut film holder does the work of six.
- The exposure number is imprinted on the side of each exposed piece of film as it is used.
- Mounts on a Graflok 4 x 5 back in seconds.
- Smooth, even movement of dark slide will not cause film to become scratched or damaged.
- Each Grafmatic has a "write in" area on the back for additional information.
- Dark slide lock mechanism prevents the chance of double exposure once all six exposures have been made.
- Septums are notched so that film identification can be rapidly and simply made in the dark-room.
- For medical, industrial and professional photographic use.
