

Rugged and durable is what the professional needs — Powerful, even lighting is what he requires — STROBOFLASH is what he demands!

Graflite[®]

STROBOFLASH IV

STROBOFLASH IV

The PROVEN Strobflash IV is a system designed for the professional who demands a rugged and light efficient electronic strob. In use for over 22 years the Strobflash IV avoids the non-essential accessories but delivers the dependable and remarkably even lighting for which the strobflash has always been known. Built of high impact Boltaron[®], both Lamphead and Powerpack can withstand the use and abuse of the professional and deliver repeated flash after flash consistently with accuracy.

The Strobflash IV is a 200 watt second unit rated at 4400 effective candle power (E.C.P.S.) at full power. Variable F/Stop requirements are easily attainable through the four level switch on the top of the powerpack. The Strobflash Lamphead which weighs only 9 1/2 oz. employs a 63° angle of coverage. It is well known for its' soft, even lighting coverage.

The Strobflash IV can be used with three different power supplies; *High Voltage [Dry Cell]*, *Re-Chargable [Nickle-Cadmium]* or *A.C. [Household Current]*. The re-chargable uses the same battery as the 500 R.G. This means that batteries can be interchanged as well as the charger which can be used with any Graflite[®] rechargeable electronic strob.

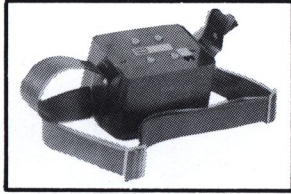

-
- Four Power Levels— Full power (200 watt-seconds), Three-Fourths power (150 watt-seconds), Half power (100 watt-seconds), Quarter power (50 watt-seconds).
 - Thyratron Triggering— Saves needless wear on camera sync connectors due to small amount of triggering energy required.
 - Wide Field Lighting Coverage— 63° angle provides that soft yet remarkably even lighting.
 - Three Power Base Supplies Available— Each can be interchanged with the common power top to provide portable or studio lighting.
 - Quality/Durability Assured— With thousands of Strobflash IV's sold, you can be assured that the quality and durability which we claim, is indeed a fact. Ask any owner of a Strobflash.
 - 25 Years of Dependability— We use the same simple circuitry which has been used for years. We may not be the state of the art, but our equipment continually works, reliably and efficiently, year after year. This is a fact, proven for the past 25 years.
 - Interchangability— Interchangability has always been a big plus with Graflite[®] strob equipment, and it was the Strobflash line which began that tradition, close to 25 years ago. Many of these 25 year old units are still in use today. All Strobflash bases are interchangeable with any Strobflash II, or IV power top, be they new or old.

GLOBE STROB 500**
CAT. # 2243

STROBOMATIC 500*
LAMPHEAD
(w/ Built-In Slave)
CAT. # 2241

* Requires adapter cord - Cat. # 2257 Or 2260

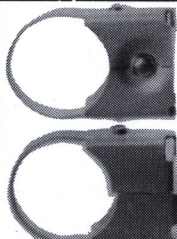

** Requires adapter cord - Cat. # 2260

STROBOFLASH ACCESSORIES

Graflite® Slave Sync
Cat. # 2265

A solid state, plug in photoelectric triggering device. Excellent sensitivity at 150 feet or more. To only 100 B.C.P.S.

Graflite® Mounting Clamps
Cat. # 2771

Top and bottom clamps for all Graflite® mounting tubes & 250 flashgun. Quick, positive action heavy duty design.

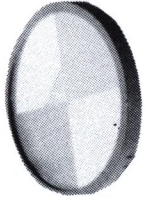

Graflite® Tilt Brackets
Cat. # 2760 - Tilt L Bracket (35mm)
Cat. # 2761 - Tilt platform bracket

Strong, Durable & Professional.

Automobile Charger Cord
Cat. # 2253

For recharging your nicad batteries. Usable with 250, 350, 500 & Stroboflash rechargeable bases.

Wide Field Deflection Lens
Cat. # 2242

Extend normal 52° lamp-head lens distribution to 52° x 80°. For use with Strob® 350 & 500 lamp-heads only.

20' Extension Cord
Cat. # 2050

Allows you to use two or more lampheads.

Umbrella Complete w/ Mount
Cat. # 3802

32" white opaque umbrella and tilt mount for Stroboflash & Strobomatic lampheads.

6' Adapter Cord
Cat. # 2257

Enables you to use 350, 500 or Globe Strob lamp-heads with Stroboflash powerpacks.

Stroboflash R.G.
Base w/ Battery & Charger
Cat. # 2140

ADDITIONAL STROBOFLASH ACCESSORIES

- 2025 - ADDITIONAL STROBOFLASH LAMPHEAD
- 2293 - 500 & STROBOFLASH NICKLE-CADMIUM BATTERY
- 2291 - STROBOFLASH & STROBOMATIC RECHARGER
- 2243 - GLOBE STROB® 500 CONTROL HANDLE W/BARE TUBE
- 2245 - HANDLE KIT FOR GLOBE STROB® 500
- 2241 - STROB® 500 LAMPHEAD W/BUILT-IN SLAVE
- 2380 - STROB® 350 LAMPHEAD
- 2242 - WIDE FIELD LENS - INCREASES COVERAGE OF BOTH CAT. # 2241 & 2380 TO 52° X 80°
- 2294 - BATTERY BOOSTER-ANALYZER - FOR USE WITH ANY GRAFLITE® HIGH VOLTAGE OUTFIT
- 2260 - 5' ADAPTER CORD - PERMITS USE OF BATTERY BOOSTER-ANALYZER WITH STROBOFLASH POWER PACKS
