STROBOMATIC® 250

STROBOMATIC 250

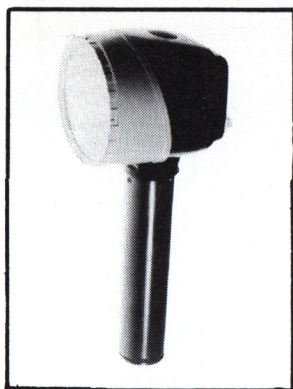

The proven Strobomatic 250 is a lightweight and dependable 75 watt second strob rated at 2,000 effective candle power (E.C.P.S.). With it's circular 52° angle of coverage, the photographer is assured of even and consistant light. The flashgun and powerpack are both built of cycolar® , the same material used in the manufacture of professional football helmets.

The Strobomatic 250 can be used with three different power supplies; High Voltage (dry cell), Re-chargeable (nickle-cadmium), or A.C. (household current).

The same flashgun can be used with any of these power supplies. The High Voltage powerpack uses a 510 volt battery which provides up to 1,000 flashes per battery. The NEW rechargeable powerpack allows the photographer to shoot 75 shots, remove the discharged battery and replace it with another set of freshly charged batteries. The discharged battery can then be recharged either in the powerpack or out of the powerpack using Graflite's charger adapter Catalog #2398. When using A.C. power you can by-pass the powerpack completely and plug your 250 A.C. Adapter, Catalog #2392 directly in you 250 power cord, Catalog #2350. A shorter version of this cord, Catalog #2261, is also available.

The Strobomatic 250 also has a wide range of accessories most of which can be used with other Graflite electronic Strobs® .

-
- Even Lighting — 52° angle of coverage, can be increased to 52° x 80° by using the wide field deflection lens Catalog #2242 (light loss of only ½ f stop).
 - Three Power Supplies Available — RG (rechargeable) H.V. (high voltage) and A.C. (household current) all use the common 250 Flashgun.
 - New Rechargeable Base — provides 75 flashes per set of batteries. Battery (nickle-cadmium) can be removed from battery pack and recharge in the unit or out of the unit.
 - 1,000 Flashes — a 510 high volt battery can be installed in seconds and can provide 1,000 flashes non-stop.
 - 360° Lighting — available when you add the 250 Globe Strob control handle, Catalog #2343, to any of the 250 Powerpacks or A.C. Adapter.

250 Flashgun
Cat. #2340

INTERCHANGABILITY, Not Just A Word With Graflite® - Here's How...

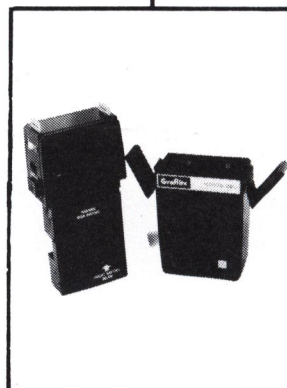

1. You start with any 250 Flash.
2. Choose any one of three power supplies.
3. Interchange even your accessories.

250 Globe Strob®
Control Handle w/ bare tube
Cat. #2343

250 H.V.
(High Voltage)
Power Pack
Cat. #2315

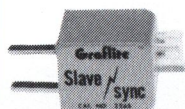

250 R.G.
(Rechargeable)
Power Pack w/o battery
Cat. #2319

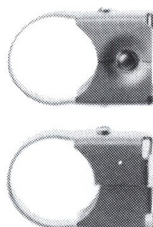

250 A.C. Adapter
Cat. #2392

STROB® 250 ACCESSORIES

Graflite® Slave Sync
Cat. #2265

A solid state, plug-in photo-electric triggering device. Excellent sensitivity at 150 feet or more. To only 100 B.C.P.S.

Graflite® Mounting
Clamps
Cat. #2771

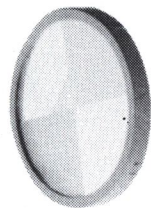

Top and bottom clamps for all Graflite® mounting tubes & 250 flashgun. Quick, positive action, heavy duty design.

Graflite® Tilt Brackets
Cat. #2760 - Tilt L-Bracket (35mm)
Cat. #2761 - Tilt Platform Bracket
Strong, Durable & Professional

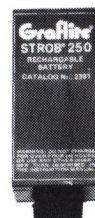

Automobile
Charger Cord
Cat. #2253

For recharging your ni-cad batteries. Useable with 250, 350, 500 & Strobflash re-chargable bases.

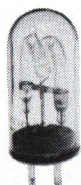

Wide Field
Deflection Lens
Cat. #2242

Extend normal 52% lamp-head lens distribution to 52% x 80%. For use with Strob® 350 & 500 lamp-heads only.

Ni-Cad
Replacement Battery
Cat. #2391

Can be charged in or out of unit to give 75 flashes per charge.

Bare Tube
Replacement
Cat. #2247
Fits Globe Strob® 250 & 500

250 Charger Adapter
Cat. #2398

For recharging of 250 RG battery - Cat. #2391. Must be used with either auto 12V. Charger - Cat. #2253 or standard RG Charger - Cat. #2291.

R.G. Charger
Cat. #2291

Standard charger for use with all Graflite® Rechargeable Power Packs and 250 Charger Adapter - Cat. #2398.
