BOLEX CABLE RELEASES

Cable releases are absolute necessities when shooting single frames since they prevent movement of the camera during or between exposures. All Bolex cameras have provision for a cable release. The Bolex cable releases are metal sheathed and feature an exclusive swivel socket to avoid damage when bent. All have a standard straight thread.

Universal Cable Releases: Can be used with any camera having a standard straight thread including all the small Bolex 8mm models. Available in three different lengths.

8" cable release	Code DECOR	No. 410	\$1.95
21" cable release	Code DETEL	No. 413	5.00
40" cable release	Code DECBE	No. 414	6.00

Cable release for Rex cameras equipped with Rexofader

On Bolex H-16 Rex cameras equipped with Rexofader, single frame exposures can be made by attaching a Bolex Universal cable release in the threaded hole of the blade #10 of the Rexofader (see Rexofader instructions). This arrangement works satisfactorily only on cameras equipped with a grooved and knurled release button (above serial #172201). The buttons are easily interchangeable and owners of cameras below this serial number should exchange the old button for the new type.

Continuous running of the Rexofader equipped camera is obtained by attaching the Universal cable release over the front release button of the camera by means of the special adapter CLOIC.

Cable release adapter for Rexofader Code CLOIC No. 431 Price \$3.00
Cable release: see Universal cable releases.

Cable release for all other Bolex H-8 and H-16 cameras.

A combination of a 21" or 40" Universal cable release and a special H camera attachment which is mounted over the side release button on the camera by the turn of a knurled screw. The attachment is designed so that the cable release can be used for continuous or single frame exposures.

Bolex H cable release 21"	Code DETRE	No. 422	\$6.50
Bolex H cable release 40"	Code DELON	No. 424	7.50

The 21" Universal or H Cable Release also fits the panhandle of the Bolex H Tripod.
