PENTAX SERVICE INFORMATION

(Pentax Photographic and Sport Optics Products Only)

Normal repair time is ten working days after receipt of a product covered by warranty, or after receipt of approval on a chargeable product repair. Of course, this may vary due to volume.

REPAIR OF PRODUCTS UNDER WARRANTY

Products sent to Pentax for repair which are covered under a warranty must be accompanied by a copy of the owner's dated proof of purchase (sales receipt, cancelled check or charge slip).

REPAIR OF PRODUCTS OUT OF WARRANTY

Out of warranty products sent to Pentax for repair are examined by our service technicians. The cost of repairs (parts and labor) to bring the equipment back to factory specifications is estimated. This estimate/quotation is sent to the individual/dealer requesting authorization to proceed. No work will be done until authorization is returned. We also require that full payment for the repairs accompany the authorization. The only exception is for those having an open account with Pentax. In this case, after receipt of authorization, repair charges will appear on the next statement from Pentax.

REPAIR WARRANTY

All Pentax photographic equipment repair work is covered by a warranty on material and workmanship for one year from the date of repair. Should the equipment malfunction during this one year period, please return it to the service center that originally repaired the equipment, along with a copy of the Pentax Repair Order. This type of situation is handled on a priority basis. The reverse side of the Pentax Repair Order explains the terms of the repair warranty.
