

Optional Focusing Screens for Pentax

Optional focusing screens can be installed in the Pentax S and K series cameras. To order a particular model simply combine the catalog number with one of the following prefixes for a particular screen.

Prefix	Screen
XMT	Matt
XCR	Cross*
XRF	Rangefinder
XIF	Ideal Format

As an example, you wish to order a rangefinder screen in a Spotmatic F with f/1.4 SMCT. This is catalog number 7193. Your order should be written like this:

XRF7193. This will assure prompt attention to your order. Be sure to check the price list for the cost of the optional focusing screen.

T.V. Viewfinder Frame

Used as a guide when duplicating or making transparencies for television, it can be installed on the Honeywell Pentax Spotmatic cameras and on the Honeywell Repronar.

*Can only be used with 50mm to 200mm lenses.

Ideal Viewfinder Frame

Used as a guide when composing photographs in the viewfinder. As long as the subject falls within the frame, it will fit perfectly on 8" x 10" printing paper.

Mirror Lock-Up Modification for Pentax Spotmatic, II, IIa and SP500

Mirror Lock-Up Modification for Spotmatic F

Mirror Lock-Up Modification plus Matt Focusing Screen for Pentax Spotmatic, II, IIa and SP500

Pentax Modifications

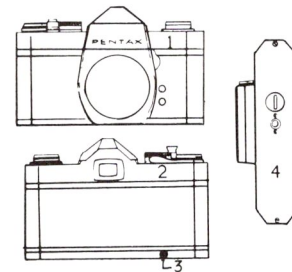

Custom Camera Engraving *for protection and beauty*

Custom engraving of owner's name or initials and social security number is available for all Honeywell cameras and lenses. Personalized engraving is a proven way to reduce theft and eliminate resale of stolen cameras. And it's accepted as positive identification of stolen or lost goods by police departments throughout the country. When ordering, be sure to specify the location by number and the color you want. Also type or print the name or number to be engraved, up to 20 characters.

Colors:

Black	White*
Gold	Silver*
Red	Blue
Green	Yellow*

*Not suitable for chrome finish.

Macro Focusing Stage

Simplifies alignment and focusing at extreme magnifications. After the camera is brought into rough focus, the fine focusing is accomplished by moving the object up and down. Operation of the stage is extremely smooth as it uses the lens barrel from a Super-Takumar.

Part No.

P36710001

"C" Mount

For adapting Super-Multi-Coated Takumar lenses to use with 16mm movie cameras.

Part No.

P3790210001
