

More picture-taking capabilities for MAMIYA 23 cameras

LENSES and ACCESSORIES

With the expanded lineup of 7 interchangeable lenses to draw upon, the Mamiya 23 user enjoys greater-than-ever pictorial control. And he can depend on the critical definition and superb color correction of these Mamiya-Sekor optics to produce consistently high quality pictures.

Each lens is mounted in a helical focusing system and fitted in M-X synchro shutter with speeds from 1 second to 1/500th, plus B. Shutters can be locked "open" for ground-glass viewing. All can be used with any Mamiya 23 camera, except the 250mm which is designed for use only with the Super 23. Lens hood is included with all lenses 90mm and larger.

Lens	Cat. No.	Picture angle		Closest focus*	Filter size
		2 1/4 x 3 1/4	2 1/4 x 2 3/4		
50mm f6.3 †	**	90°	82°	3.3 feet	72mm
65mm f6.3 †	60100	75°30'	68°12'	3.5 feet	43mm
90mm f3.5	60101	58°36'	52°12'	3.5 feet	40.5mm
100mm f3.5	60105	53°36'	47°36'	3.5 feet	40.5mm
100mm f2.8	60103	53°36'	47°36'	3.5 feet	72mm
150mm f5.6	60102	37°12'	32°42'	7 feet	40.5mm
250mm f5 ‡	60104	22°48'	20°	8 feet	105mm

* without extension tubes
 † supplied with auxiliary optical finder
 ** expected early 1968
 ‡ for Super 23 only

ACCESSORIES

FILM HOLDERS for cameras with Mamiya back*
