

To a professional photographer,
fast recycle is a must, a large number
of flashes per charge is a necessity,
the 350-II is a requirement.

Graflite[®]

STROBOMATIC[®] 350-II

STROBOMATIC® 350-II

The Graflite Strobomatic 350-II is a powerful and versatile, portable, electronic flash. Made of high impact resistant cyclac®, both flash head and power pack will withstand years of heavy professional use. Providing 3600 effective candle power (E.C.P.S.) at full power, and 1650 E.C.P.S. at half power, the lamphead covers an angle of 52° at 130 watt/second.

The 350-II has a totally new power pack which can be used with any existing 350, 500, or stroboflash (with adapter cord # 2256) lampheads. Capable of providing 95% more flashes per charge over the earlier 350 power pack. The 350-II also boasts a greatly decreased recycle time. The 350-II will perform at its optimum best when used with the 350-II lamphead.

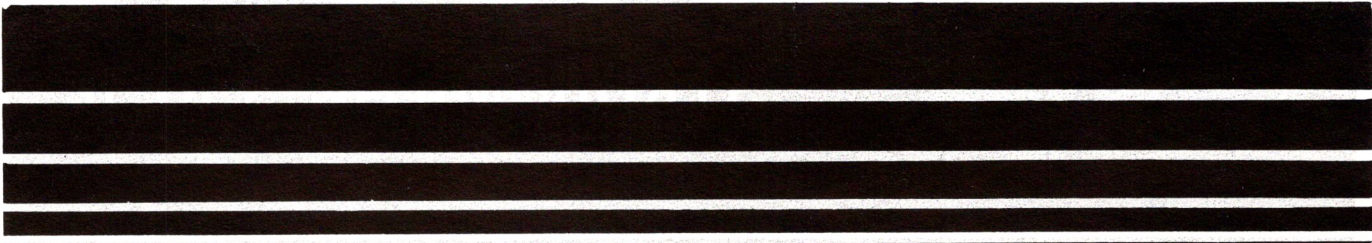

The 350-II is the most water resistant of Graflite's electronic flashes. A weather protected rocker-type switch enables the photographer to safely use his 350-II in many adverse weather situations where most other strobs would become a safety hazard rather than a photographic aid.

• *Even Lighting* — 52° angle of coverage, can be increased to 52° x 80° by using the wide field deflection lens Catalog (light loss only ½ f stop).

• *Weather Resistant* — can be used in adverse weather conditions where others can not be used.

• *High Flash/Charge* — the 350-II can provide 300 - 600 flash/charge at full power. That is 300% more than the earlier 350 model.

• *Fast Recycle* — the 350-II will provide a flash recycle of 2 - 3 seconds, most necessary for those action shots.

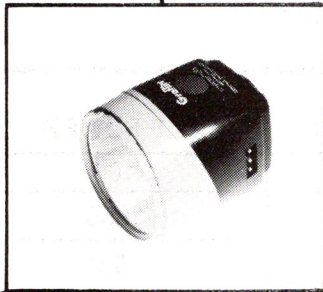

350-II POWERPACK
Cat. # 2376

INTERCHANGABILITY IS A Factor With Graflite - Here's How...

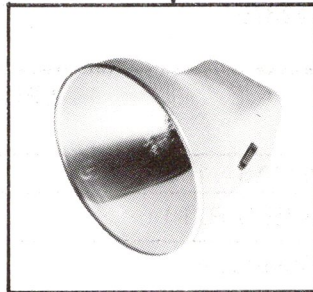

1. You start with a 350-II power pack
2. Interchange with any of four lampheads.
3. Choose and interchange with most Graflite Accessories.

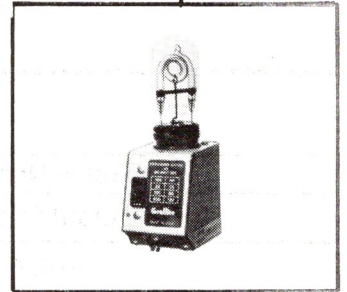

350 LAMPHEAD
Cat. # 2380

500 LAMPHEAD
Cat. # 2241

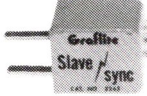

**STROBFLASH
LAMPHEAD**
Cat. # 2025

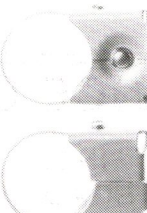

GLOBE STROB 500
Cat. # 2243

STROB® 350-II ACCESSORIES

Graflite® Slave Sync
Cat. # 2265

A solid state, plug in photoelectric triggering device. Excellent sensitivity at 150 feet or more. To only 100 B.C.P.S.

Graflite® Mounting Clamps
Cat. # 2771

Top and bottom clamps for all Graflite® mounting tubes & 250 flashgun. Quick positive action, heavy duty design.

Graflite® Tilt Brackets
Cat. # 2760 - Tilt L Bracket (35mm)
Cat. # 2761 Tilt Platform Bracket

Strong Durable & Professional

Automobile Charger Cord
Cat. # 2253

For recharging your ni-cad batteries. Usable with 250, 350, 500 and Strobflash rechargeable bases.

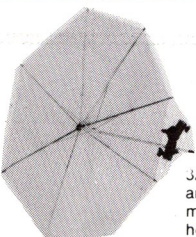

Wide Field Deflection Lens
Cat. # 2242

Extend normal 52° lamphead lens distribution to 52° x 80°. For use with Strob® 350 & 500 Lampheads only.

20' Straight Power Cord
Cat. # 2252

Enables you to use your lamphead up to 20' from your powerpack.

Umbrella Complete w / Mount
Cat. # 3802

32" white opaque umbrella and tilt mount for Strobomatic and Strobflash lampheads.

6" Adapter Cord
Cat. # 2257

Enables you to use 350, 500 or Globe Strob lampheads with Strobflash powerpacks

Modeling Light w / 100 Watt Lamp
Cat. # 3333

Will mount on your 350 lamphead when you use adapter bezel (Cat. # 3337).

ADDITIONAL STROB® 350-II ACCESSORIES

- 2380 - ADDITIONAL STROB® 350 LAMPHEAD
- 2251 - REPLACEMENT 350/500 7' POWERCORD
- 2241 - STROB® 500 LAMPHEAD
- 2291 - RG CHARGER
- 2243 - GLOBE STROB® 500 CONTROL HANDLE W / BARE TUBE.
