IN EVERY SEASON

KODAK time is all the time.

Each season witnesses the passing of some recreation, but for those who Kodak, such changes only serve to present new delights.

Kodakery is not merely a delightful pastime in itself; it is an active ally of every other recreation, is as ready a companion in the winter days when the Frost King presents new pictures in a setting of feathery white, as in the softer days of summer.

And for the shut-in days the Kodak is always at your service to perpetuate the many pictures of the home life.

And the ever sustained interest in picture making the Kodak all by daylight way, is due not alone to the charm of the pictures themselves, but to the simplicity of all the operations and the certainty of results.

And as the pleasures of Kodak appeal to you, one other little suggestion may not come amiss—Make somebody happy with a Kodak, Christmas, 1910.

F. P. KODAKS—*Continued*

THESE dainty little Kodaks will especially appeal to those who wish to make good sized pictures with the minimum of effort.

No estimating of distances nor focusing is necessary, just locate the subject in the finder and press the exposure lever.

When closed the bed folds automatically over the front board and bellows, concealing all adjustments, and permitting the instrument to slip handily into the coat pocket.

Exceedingly light and compact, the camera body made of aluminum, with fine seal grain leather covering, these instruments appeal to the most fastidious.

F. P. KODAKS—*Continued.*

FULLY equipped to meet all requirements of the advanced amateur they are still so simple as to be used effectively by the beginner.

The remarkably accurate Kodak Ball Bearing Shutter, a part of the regular equipment, is especially effective for instantaneous exposures, and a simple adapter, taking the place of the regular back, will permit the use of glass plates with either instrument.

These Kodaks are exceedingly light and compact; seal grain leather covering; full nickeled fittings.

No. 3A FOLDING POCKET KODAK

IN DETAIL

No. 3A Folding Pocket Kodak—For rectangular pictures, $3\frac{1}{4} \times 5\frac{1}{2}$ inches. Capacity, 10 exposures without reloading. Size of Kodak, $9\frac{1}{2} \times 4\frac{3}{4} \times 1\frac{7}{8}$ inches. Weight, 41 ounces. Lens, double combination, Rapid Rectilinear, speed $f. 8$, focal length $6\frac{1}{2}$ inches. Shutter, Kodak Ball Bearing. Two tripod sockets. Brilliant reversible finder with hood. Automatic focusing lock. Rising and sliding front.

No. 3A F. P. KODAK—*Continued*

THIS model first introduced the $3\frac{1}{4} \times 5\frac{1}{2}$ picture, a size that has become remarkably popular, not only on account of its applicability to post-card photography, but also for the unusually effective landscape views which it produces horizontally, and the beautifully proportioned full-length portraits which it makes when used vertically.

With Kodak Ball Bearing Shutter, splendid lens, rising and sliding front, and automatic focusing lock, this model is fully equipped for the most serious branches of amateur photography. It is exceedingly compact and may be effectively handled even by the novice.

A combination back will adapt it for use of glass plates.

Double focusing scale for use with either film or plates. Rack and pinion for focusing. Rising and sliding front.

No. 3A SP'C'L KODAK—*Continued*

IT is hard to make a Kodak that is better than a Kodak. Nevertheless, we have incorporated in this model certain refinements that will appeal to those who command the best.

This model is equipped with the Zeiss-Kodak Anastigmat lens and the Compound Shutter, this most effective combination permitting the making of fully timed exposures in the shade without the use of the tripod. In size of picture and general lines this camera corresponds to the regular 3A Folding Pocket Kodak, but includes spirit level and rack and pinion for focusing. By means of a combination back the camera may be used for glass plates. The bellows is made of black leather and the camera is covered with finest quality black Persian morocco.

Weight, 4 pounds, 4 ounces. Lens, double combination, Rapid Rectilinear, speed $f. 8$, focal length $8\frac{1}{4}$ inches. Shutter, B. & L. Automatic. Rising and sliding front. Rack and pinion for focusing. Two tripod sockets. Brilliant reversible finder with hood.

No. 4A F. KODAK—*Continued*

THE taking of large pictures no longer necessitates a cumbersome outfit, as it has required but a slight increase in the dimensions of the popular Folding Pocket Kodaks to produce this light and compact instrument, taking $4\frac{1}{4} \times 6\frac{1}{2}$ pictures.

Retaining all the popular features of the Folding Pocket Kodaks, this camera exactly meets the requirements of the photographer who must have large size pictures.

Has rising and sliding front, rack and pinion for easy focusing and tripod sockets. Camera body made of aluminum and covered with finest black seal grain leather.

By means of an adapter, glass plates may be used, and the Kodak Portrait Attachment will permit the making of excellent bust portraits.

Automatic safety blind for protecting film when shutter is wound. Covered with the finest seal grain leather and all exposed metal parts in gun metal finish.

No. 1A SPEED KODAK—*Continued*

THE mile-a-minute automobile, race horses, athletes at their highest strain, instantaneous indoor pictures, home portraiture, ordinary time exposures—these are all as one to this new and remarkable Kodak.

Capable, as its name implies, of making pictures of the most rapidly-moving objects in any position, it is thoroughly satisfactory also for any branch of ordinary amateur photography. It can be easily carried in a topcoat pocket, and the beginner can readily use it.

The shutter is incorporated in the body of the box and is of the well-known Graflex focal plane construction, permitting exposures varying from $\frac{1}{1000}$ second to slow instantaneous.

IN DETAIL

No. 4A Speed Kodak—For rectangular pictures $4\frac{1}{4} \times 6\frac{1}{2}$ inches. Capacity, 6 exposures without reloading. Size of Kodak, $11\frac{3}{4} \times 3\frac{7}{16} \times 6\frac{1}{2}$ inches. Weight, 6 pounds. Shutter, Kodak Focal Plane, speed $\frac{1}{1000}$ of a second to slow instantaneous. Rising and sliding front. Rack and pinion for focusing. Two tripod sockets. Brilliant reversible finder with hood. Also, direct view finder and focusing scale.

4A SPEED KODAK—*Continued*

THIS camera, while designed for the photographing of rapidly moving objects, is equally well adapted to all other classes of work.

The important feature is the Kodak Focal Plane Shutter, by means of which automatic exposures, varying from slow instantaneous up to $\frac{1}{1000}$ of a second may be made. It is also, of course, adapted to time exposures.

The shutter is in no way complicated, and is simple to operate.

Equipped with this type of shutter, the 4A Speed Kodak is ideal for photographing all objects in rapid motion—such as athletes, automobiles, birds on the wing—and is also well adapted to home portraiture.

This camera is very compact—less than half the size of other focal plane cameras that are adapted to the taking of large pictures.

BROWNIE

ENLARGING CAMERAS

THE amateur usually thinks of enlarging as a complicated, expensive process, requiring considerable apparatus and experience. But the Brownie Enlarging Camera has changed all this.

It consists merely of a light tight cone with attachments to hold a negative at the small end, and a sheet of Bromide or Velox paper at the other; the lens is fixed inside the cone at just the right distance to insure perfect focus. Exposure is made by daylight and dark room is necessary only for loading and development. The entire operation may be performed in daylight when Velox paper is used, but in such cases the exposure is somewhat longer.

No. 2 Brownie Enlarging Camera, for 5 x 7 Enlargements from 2¼ x 3¼ negatives.	-	\$2.00
No. 3, ditto, for 6½ x 8½ Enlargements from 3¼ x 4¼ negatives.	- - - - -	3.00
No. 4, ditto, for 8 x 10 Enlargements from 4 x 5 negatives (will also take 3¼ x 5½ negatives).	- - - - -	4.00

KODAK FILM TANK

THE tank development of films does away with the dark room. By simple methods it gives quality that was unattainable by the old methods.

To develop in the tank the film is simply wound on the transferring reel in a light tight box, a process as simple as loading the Kodak; transferred in daylight to the cup containing the developing solution; left for ten or twenty minutes, according to the strength of developer, rinsed and removed in daylight to the tray of fixing solution.

It is entirely self-contained, all parts packing easily within the transferring box when not in use.

KODAK FILM TANK—Continued

And with its greater convenience, its elimination of the dark-room, its portability, tank development combines one even more important feature and that is better results—the assurance that every roll of film put into the tank by anybody, where the simple instructions are properly followed, will come out developed as well or better than that roll of film could have been developed, by the old methods, by the most experienced photographer. The experience is in the tank.

No. 2

BROWNIE DEVELOPING BOX

THE No. 2 Brownie Developing Box is a modification of the Kodak Film Tank, made possible by the short lengths of No. 1 and No. 2 Brownie Film. It is a metal box fifteen inches in length, just long enough to accommodate a roll of No. 1 or No. 2 Brownie film in one loop.

To develop, the roll of film is inserted in the spool carrier, and is unrolled and carried around a roller bearing, thus exposing the film to the action of the developer.

After the film has been developed, the developer is poured off and the box filled with water, after which film is removed and fixed in daylight.

ZEISS KODAK ANASTIGMAT LENS *f.* 6.3.

THE Zeiss-Kodak Lens is designed and constructed with the sole purpose of gaining the highest possible efficiency in hand camera equipment. It admits over 40 per cent. more light in a given time than the rapid Rectilinear Lens, and makes snapshots a simple matter under almost every out-door condition.

The Zeiss-Kodak lens meets the most exacting demands. It combines the anastigmat advantage of speed (*f.* 6.3) depth, definition and flatness of field.

May be fitted to any Folding Kodak, excepting the Nos. 1 and 1A models, and is furnished in the regular equipment of the No 3A Special Kodak. The Kodak Catalogue, free on request, gives prices in detail on special anastigmat lens and special shutter equipments.

KODAK

PORTRAIT ATTACHMENT

AN auxiliary lens slipped on in front of the regular lens, by means of which the focus is so altered that the camera may be placed close to the subject and still produce a sharp picture. Give the exact designation of instrument and shutter when ordering.

FLASH SHEETS

EASTMAN Flash Sheets give a broad, soft light, and as they burn more slowly than other flash mediums, do not startle the sitter. Most conveniently used in an Eastman Flash Sheet holder, but if you prefer—just pin to a card and touch with a match.

No. 1 Flash Sheets, per pkg. $\frac{1}{2}$ doz. sheets, 3 x 4,	\$.25
No. 2 Flash Sheets, per pkg. $\frac{1}{2}$ doz. sheets, 4 x 5,	.40
