

studiostand
standard model

STUDIO STAND Standard Model

for ALL your studio work

The sliding arm is capable of rotating 360° around the column. The stand head is designed to accommodate the heaviest camera and can be adjusted in all directions.

The rise and fall movement of the sliding arm is very smooth and counter balanced by a weight inside the column. The counter weight consists of 7 parts each of 2,5 kgs. If required, more weights can be added to the basic 7 supplied with the stand.

The base is fitted with 3 retractable ball bearing swivel castors, thus providing effortless movement of the studio stand across varying floor surfaces.

The standard studio stand can be supplied in two lengths: viz. 210 cm and 270 cm.

Order code for 210 cm stand: SST I

Order code for 270 cm stand: SST II

Dimensions:

- A. SST I 82 $\frac{3}{8}$ " (= 210 cm);
SST II 106 $\frac{1}{2}$ " (= 270 cm)
- B. SST I 69 $\frac{1}{2}$ " (= 176,5 cm);
SST II 93" (= 236,5 cm)
- C. SST I + SST II 17 $\frac{1}{2}$ " (= 44,5 cm)
- D. SST I + SST II 13" (= 33 cm)
- E. SST I + SST II 19" (= 48,5 cm)
