

Press Camera

Cat. No. 701-050

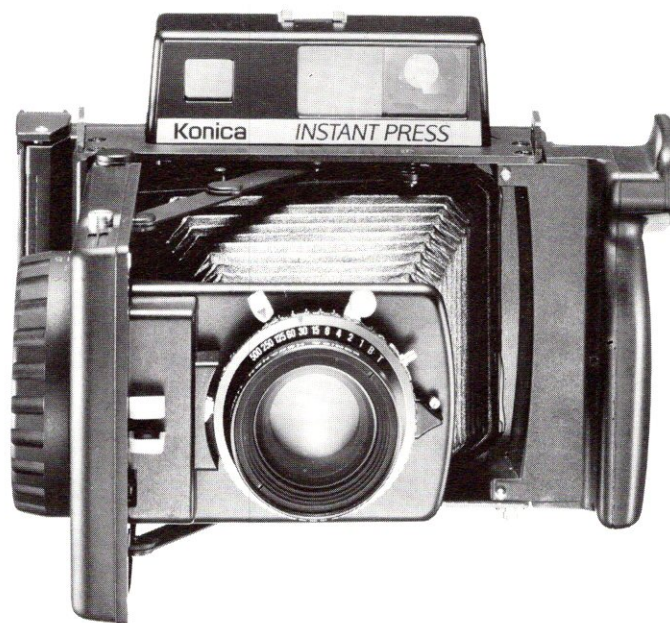

Key Features

- Size when folded is a very compact 8.2" x 5.5" x 3.5" (210 x 142 x 90mm). Weighs approximately 44 oz. (1.2kg). Handy design makes it convenient for carrying, and the built-in handgrip is molded for firm, steady shooting.
- Standard format 110mm f4 five group, five element Hexanon lens offers extremely high resolution and outstanding peripheral brightness.
- Complete range of speed and aperture settings, from 1 to 1/500 sec, f4 through f64 provides the flexibility required for virtually all lighting conditions and film speeds. Bulb and time settings are provided for long exposures.
- Large, bright viewfinder shows 110% of image area. Size and position of bright frame in the finder shows actual image area, and adjusts automatically as focus knob is turned to compensate for parallax.
- Coincidence-type double image coupled rangefinder (base length 70mm) makes focusing fast and easy. High visibility and precise response.
- Large focusing knob turns 60° to cover the whole focal range from 23.6" (60cm) to infinity in one quick sweep.
- No accessories or attachments are needed to focus in as close as 23.6" (60cm) for close-ups or document copying at 1/3 magnification. Automatic parallax correction effective throughout close-up range.
- Accessory shoe and base socket provided for attachment of electronic flash units. X-terminal for flash synchronization.
