NIKON REPAIR SERVICE PROGRAM

Nikon photographic equipment and accessories are assembled within strict tolerances and manufactured under rigid quality control supervision in order to provide photographers with unsurpassed performance. If Nikon owners need to have their equipment serviced, this program will assist and guide you in processing the repair order.

The Nikon Repair Service Program provides for prompt and efficient repair service. To expedite service, you can estimate repair costs for Nikon products brought in by customers. This procedure eliminates the waiting for initial repair estimate approvals, so repairs can start as soon as the equipment is received.

Please use this program as a guide for accepting and sending in equipment for service. You will find it an easy reference for estimating customer repair cost based on our pricing system.

Important: "Re-Estimates"

Periodically, after initial inspection and estimate, hidden damages such as impact, liquid or sand are found by a technician actually performing repairs. In such a case or in the case of major parts requirements, re-estimates are necessary.

You, the Dealer, can greatly help to reduce re-estimates by asking your customer questions and writing on your tag the following in **bold letters**:

- 1. Impact (to what area...)**
- 2. Liquid damage**
- 3. Sand damage**

Most of the above will require "D" category – factory estimate only.

Thank you for helping us to serve you better.

REPAIR CLASSIFICATIONS

Limited Warranty Repair Service

1. Nikon photographic products which are distributed by Nikon Inc. in the USA, include a Nikon Inc. warranty and are warranted by Nikon Inc. to be free from defects in materials and workmanship for a period of one year from the date of purchase, subject to the limitations and exclusions contained in the Nikon Inc. warranty cards. See the Limited Warranty Information.
2. Nikon equipment repaired by Regional Service Centers carries a 180 day limited repair warranty (from the original date of repair) against defects in materials or workmanship, provided the problem is directly related to the repair service for the original defect.
3. Nikon Inc. makes no other warranties for its equipment or for its repair services and in no event shall Nikon Inc. be liable for the payment of any consequential or incidental damages.

Out-of-Warranty Repair Service

Equipment which falls into the following categories will be considered out of warranty:

1. Warranty period has expired.
2. Paper warranty documents are not attached to the product sent in for repairs. (Receipt of purchase and warranty card.)
3. The warranty is null and void under the limitations and exclusions contained in the warranty cards when, among other things:
 - Customer is not the original consumer purchaser of the equipment.
 - Defect is caused by misuse, abuse, negligence or accident.
 - Defect is caused by either impact, liquid or sand damage.
 - Defect is caused by use of unauthorized replacement parts or repair work performed by unauthorized personnel.

REPAIR CLASSIFICATIONS

Repair Estimates

To estimate the repair costs for Out-of-Warranty Nikon equipment, please refer to the information on page 12 (Out-of-Warranty Repairs). Use this information as a guide to inform your customers of the repair category and estimate repair costs when the equipment is brought in for service.

Refused estimates will be returned with a \$6.00 shipping charge applied to your account (or higher depending on weight, size and/or any COD charges).

Equipment Beyond Repair

Badly damaged equipment in which the defect has been caused by immersion (in fresh or salt water), sand, fire or hard impact may be possible to repair. However, in most cases the cost of the repair may exceed the original purchase price of a current model and repair, is therefore, not economically feasible. **If the equipment being sent in for service falls into this category, Nikon will advise that the equipment is beyond repair and that replacement equipment is recommended.**

Non-Repairable Equipment

The list below indicates Nikon products that have not been manufactured for a long period of time. Parts are either no longer available or are very scarce. Consequently, such equipment is not repairable.

Accordingly, do not accept this equipment for repair from your customer.

- Requests for AI conversion
- All Nikon rangefinder cameras (M,S,S2,S3,SP)
- Nikon Zoom 8 and Super 8
- Older-type accessories
- All Nikkormat cameras
- Older-type motor drives
- All Nikkorex cameras
- Nikonos I, II, III, IV, SB-101
- Older-type lenses
- All F, F2 meters
- Older Speedlights
- Older Camcorders

Note: In general, Nikon products which have not been manufactured for about 10 or more years will fall into this classification. If no longer repairable, we will return the item unrepared and an appropriate shipping charge will be applied. See "Repair Estimates" above.

GENERAL REPAIR PRICING SYSTEM

Repair and Pricing Process

To simplify and speed up the repair process and to provide the best service, repair prices are stated by item and repair work category (pages 13-38). Category D which includes extensive repairs will be estimated only, but we reserve refusal if damage is too extensive.

Prices shown are suggested list prices. Prices shown in parenthesis () are dealer's cost and reflect the 20% discount offered by Nikon Inc. to Nikon Consumer Products and Nikon Advanced Systems Dealers. **All prices are subject to change without notice. Contact Nikon Inc., Photo Service Department, for repair prices of recently released equipment not listed.**

Repair Pricing Procedure

When you accept your customer's equipment for repair, please indicate the category and cost of the repair to your customer (based upon your personal evaluation of the problem using the chart on page 12). Obtain your customer's immediate approval, then forward the equipment to Nikon Inc. for immediate repair based upon your evaluation.

We will promptly repair and return the equipment at the charges indicated, unless you have made an error in your evaluation and selection of the category for the repair. In the case of hidden damage (rust, impact, sand, liquid, etc.) we will advise you accordingly and the repair will be subject to approval of the revised estimate. **Be sure to advise your customer if we determine the evaluation submitted is not correct, Nikon Inc. reserves the right to reappraise the repair estimate.**

If the reviewed estimate is not approved within 45 days, the equipment will be returned to you as is (no work done). Shipping plus handling charges will be applied to your account.

Taxes

Tax is not included in the prices indicated in the Nikon Repair Price Guide and will be added to the invoices where applicable.

ACCEPTING EQUIPMENT FOR REPAIR

Procedures to Follow When Accepting a Repair:

- Check if the malfunction is caused by defective battery (i.e. exhaustion, incorrect installation, non-designated battery or corroded battery contact).
- Check if the malfunction is caused by customer operating error.
- Check if equipment was damaged by liquid, sand or impact. Look for corrosion on iron-based metals such as screws or other camera body parts. Look for green oxidation on brass, copper and bronze such as camera covers, internal parts or electrical connections.
- Explain to the customer that the repair of equipment that is immersed, or impacted may be expensive or irreparable. If the equipment is older and cannot be found within this price guide, it also may no longer be repaired by Nikon Inc. You may call 1-800-NIKON SV to verify.
- All unusual damage must be noted on the repair tag.
- Do not accept batteries, accessories, or other parts of the camera system such as case, hood, strap, etc., unless pertinent to the repair.
Any accessories you do accept must be clearly written on the repair tag.
- When entering customer's repair request on your repair tag, please attempt to specify the malfunction such as "out-of-focus, uneven exposure, light-leak, etc."
- Advise customers we will not assume responsibility for film left in the camera body. (Remove the film when possible).

SENDING EQUIPMENT FOR REPAIR

When Sending Nikon Equipment to Regional Service Stations:

- Be sure to attach your repair tag or repair memo with details explaining service required. Please attach any sample such as negatives, etc., if available.
- In the case of in-warranty service, be sure to attach the appropriate documents to substantiate warranty status. Failing to provide valid warranty documents will result in appropriate repair charges.

Note: Nikon Inc. includes a copy of its limited warranty with all Nikon products covered by the warranty and sold by Nikon Inc. Products which do not include the warranty are not warranted by Nikon Inc. Refer to the Nikon Inc. warranty for details.

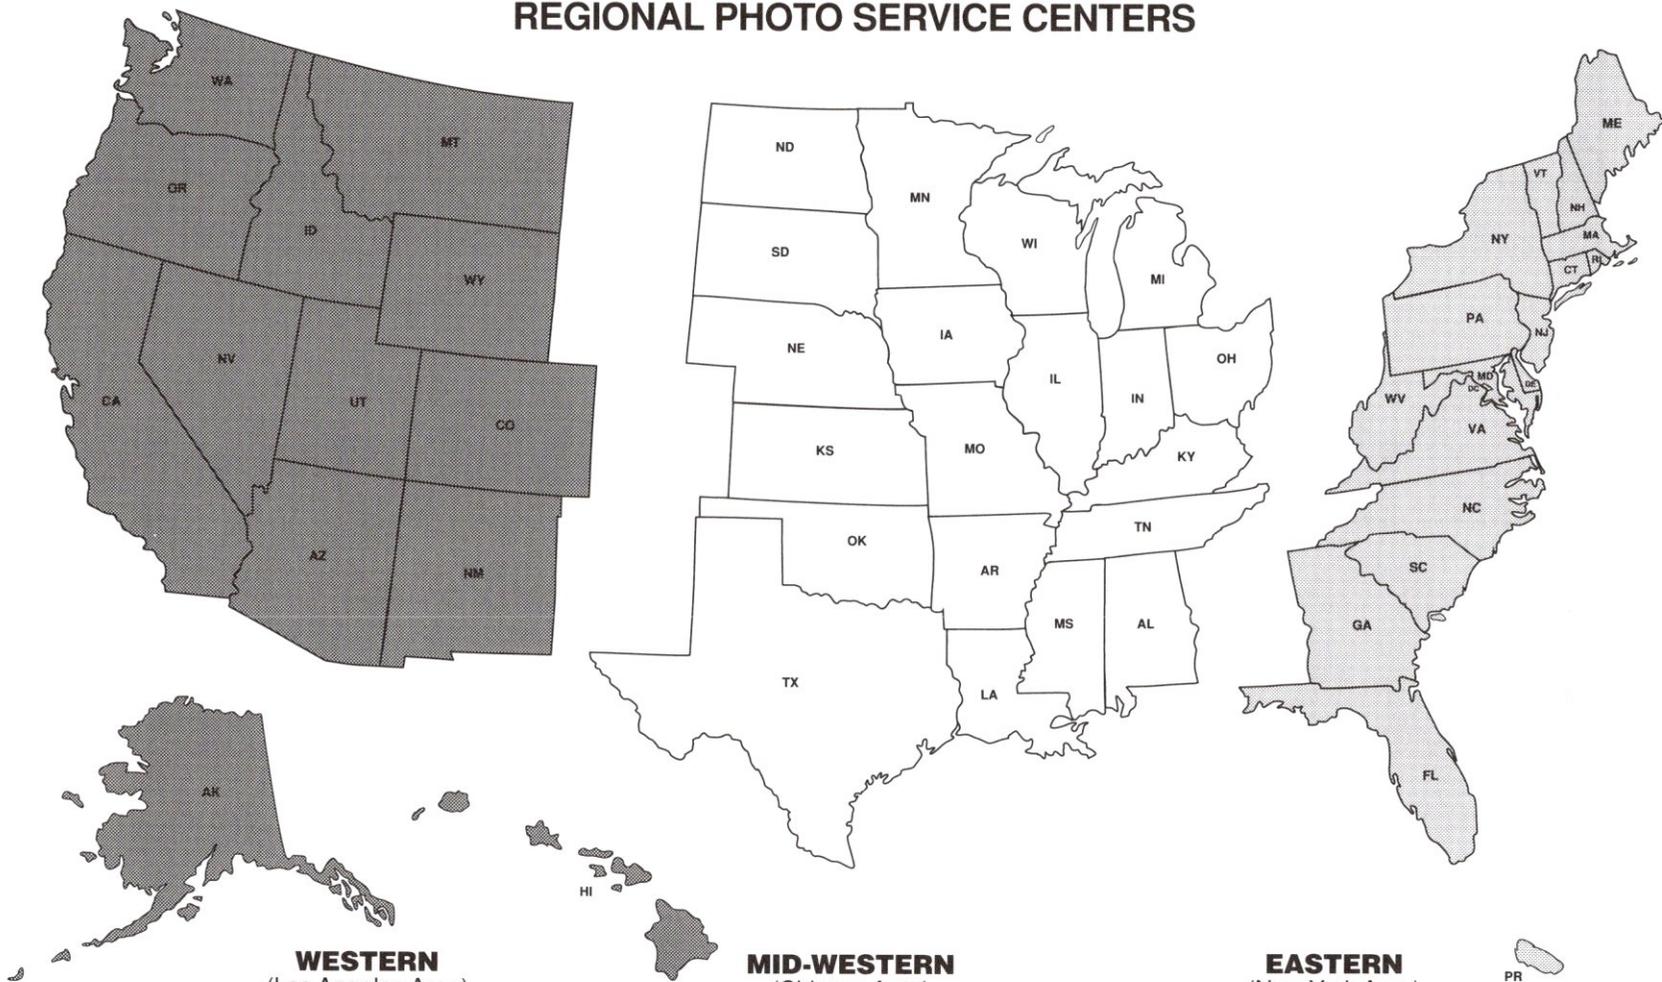

- In order to avoid damage, during transit, be sure to securely pack equipment with shock-absorbing materials.
- **Be sure to insure the shipment. Nikon Inc. will not assume responsibility for loss or damage during transit to Nikon.**
- **Equipment which is repaired or serviced under warranty is returned with normal transportation charges paid by Nikon.**

Note: You may be charged return transportation costs when sending your equipment to one of our Nikon Authorized Repair Stations (NARS).

- **Equipment which is not covered under warranty is returned prepaid by Nikon and the transportation charge will be added to your invoice.**
- **Write your Nikon Repair Account Number on all correspondence.**

OUT OF WARRANTY REPAIRS – CATEGORIES

| REPAIR CLASSIFICATION | REPAIR WORK TO BE PERFORMED |
|-----------------------|--|
| <p>CK</p> | <p>Check – This category has no warranty since no repairs are made. Equipment will be checked only. Underwater equipment will not be water pressure tested. (No warranty is offered and no dealer discount will be applied.)</p> |
| <p>A</p> | <p>For equipment in fair operating condition: Minor – A simple function check and cleaning will be performed and minor adjustments made. Minor external parts may be replaced.</p> |
| <p>B-1</p> | <p>For equipment moderately worn in operating condition: Limited – An overall function check, cleaning, and any necessary adjustments. Repairs requiring minor internal and moderate external part replacement will be done.</p> |
| <p>B-2</p> | <p>For equipment moderately worn and generally non-working: Routine – Equipment will be semi-disassembled. Any moderate internal parts or major parts will be replaced. Film test will be performed as necessary.</p> |
| <p>C</p> | <p>For badly worn or older equipment in non-working condition: Major – complete overhaul of equipment including replacement of major internal parts. Repair of minor liquid or moisture damage.</p> |
| <p>D</p> | <p>For equipment with major damage in non-working condition: Special – Repairs requiring replacement of major sub-assemblies usually due to severe impact or major liquid damage. Items requiring factory repair in Japan (most ED IF lenses requiring glass element replacement.)</p> |
